Mrs. William Irvin spent several days last week at Petersburg with her daughter, Mrs. Mabel Campbell.

Mr. and Mrs. Howard Biglow and family, of Altoona, spent the week-end at the home of William Hoover.

The little mole has recently been recommended for membership in the society of big eaters. It is so very voracious, even in captivity, that it will some times eat more than its own weight of earth-worms in twenty-four hours. One little glutton, weighing four ounces, devoured seven and one-half pounds of worms in one month. When the diet changed to raw beef, mutton, chicken heads and rabbit liver, its appetite was unchanged. Cheese when mixed with either worms or beef, was the most toothsome bit of all.

**Packers' Costs and Profits**

How much do you think it costs—

1. To dress beef, cure hides, and prepare all the numerous by-products?
2. To cool the meat for two or three days before shipment?
3. To freight it to all parts of the country in special refrigerator cars, iced daily?
4. To carry it in hundreds of branch houses, each with its refrigerating plant?
5. And to deliver it to the retailer—sweet and fresh—in less than two weeks after dressing?

Swift & Company did all this for you in 1917 at an expense of less than 2½ cents per pound of beef sold, including an average profit of ¼ of a cent a pound.

Figure for yourself how little effect this cost and profit had on prices you paid for beefsteak.
