The Most Remarkable Book.

I am sorry for the men who do not read the Bible every day. I wonder why they deprive themselves of the strength and of the pleasure. It is one of the most singular books in the world; for every time you open it, some old text that you have read a score of times suddenly beams with a new meaning. There is no other book that I know of, of which this is true; there is no other that yields its meaning so personally, that seems to fit itself so intimately to the very spirit that is seeking its guidance.—Woodrow Wilson.

ONE GOOD THING FROM WAR

Cocone Nut, Hitherto Considered Only as Nuisance, Has Been Made Article of Commerce.

Before the war the cocone, which grows freely in the Southern Americas, on large trees of the palm family, was literally such a hard nut to crack that its vegetable oil had no place in commerce, and the tree was known chiefly as a botheration to banana planters when they wished to enlarge their plantations. Eighteen hundred pounds' pressure is required to crack the cocone nut, and there was no machinery for doing it. Then government experts said that nothing else in the world would provide such good carbon for gas masks as the cocone nut, and the United States financed the creation of machinery for cracking it, thus starting a new and important industry. Hereafter it will be well worth while breaking the shells for the vegetable oil inside them, valuable for cooking, lighting, and the making of nut butter; and the shells, happily no longer needed for masks, can be used as fuel or in the manufacture of gas. And so, out of an effort to prevent the expansion of autocracy by conquest, the Southern Americas find opportunity to expand by commerce.—Scientific American.

Aristocrats in Gutter.

We hear rumors of grand dukes and other members of the old nobility of Russia driving cabs and peddling bootlaces in Petrograd. This is no new thing in Europe. In England the descendants of the great Plantagenets have been found in very lowly occupations. A few years ago a lawsuit proved that a genuine Bourbon was then hawking vegetables in the streets of Paris. A few years earlier a son of a cousin of Empress Josephine, Napoleon's first love, was sent to prison for petty larceny. In 1892 the Marquis DeFoligne was an omnibus conductor; the Comte de la Marche was a house painter; the Marquis DeTorcy d'Etallinde kept a small inn at Carnac, and the Marquis d'Hauteroche, a descendant of the nobleman who, at the battle of Fontenoy, called out to the English: "Tirez les premiers," was a gendarme.

Antimony in the Transvaal.

A new body of antimony is reported to have been opened near the Komati river, in the district of the Stensdorp gold fields, Transvaal. As the ore is found to be valuable, a mining company is now carrying on smelting operations on the spot. Three shafts have been sunk to a depth of 50 feet, besides open workings. One is continuous throughout. A furnace capable of smelting ten tons of ore per day is in operation and it is stated that there is sufficient ore in sight to keep the furnace working while developments are being made.—Scientific American.

Roberts Predicted Foch's Victory.

When Lord Roberts was in Canada ten years ago at the dedication of the Plains of Abraham park and playground he made this prediction: "They refuse to believe me, and we are asleep under a false security, for I do not hesitate to affirm that we will have a frightful war in Europe, and that Great Britain and France will have the hardest experience of their existence. They will, in fact, see defeat very near, but the war will finally be won by the genius of a French general named Ferdinand Foch, professor in the military school in Paris."

Now—Not in the Spring

It is imperative that the progressive farmers of Centre County who are going to get the most out of their acreage with limited labor next year with a TRACTOR be warned at this time that practically no FORDSON TRACTORS will be available in the spring.

Orders Should be Placed

Henry Ford's Greatest Achievement

MECHANICALLY the Fordson Tractor is as nearly perfect and trouble-proof as any machine ever built. There is practically nothing to get out of order. Its strength is sufficient to do the work of any six horses at one-half the cost, including the investment. A demonstration will prove.

FORDSON TRACTORS are strictly guaranteed. You can have YOURS now, and in the spring if it does not cause you to refuse to part with it, we will gladly buy it back from you. You take no chance whatever. FORDSON TRACTORS will do the work on thousands of farms this year.
