Correspondents. Items of Interest Dished up for the Delectation of "Watchman" Readers by a Corps of Gifted

LEMONT.

Edwin Benner is home from the ar-

The two Lemont schools closed last week.

The rains last week were needed by the plants and trees, had it been a bit

William E. Grove had the misfortune to lose two valuable farm horses the past week.

William Wasson, of Howard, spent a few days in town, visiting at the home of his sister, Mrs. Payne. Mrs. R. F. Williams spent a few

days in Centre Hall last week, visiting at the home of her parents. The leaves of the forest trees are coming out, which makes people long to spend some time in the woods.

A few of the farmers have their oats and corn out but most of them have been kept back by the rains.

The Oak Hall Lime and Stone company resumed operations on Monday. and are now putting out several car loads of stone a day.

Sunday morning, May 18th, Rev. Shultz will hold a Mothers' and Fathers' service in the United Evangelical church of this place. All are invited

Williams and Emanuel Frank Houser are busy erecting a sheep pen 16x80 feet, for the Department of Animal Husbandry, at State College, on farm No. 5 at Houserville.

BOALSBURG.

James Gilbraith spent a few days at Linden Hall last week. John Roush, of Madisonburg, is visiting his daughter, Mrs. A. J. Ha-

D. K. Mothersbaugh, of Hepburn-ville, is visiting friends in this vicin-Mrs. Charles Mothersbaugh and

Charles Jr. spent Monday at State Col-Ed. Houser and daughters and Miss Kreamer, of State College, were guests of Mr. and Mrs. Harry Markle on

Mrs. Jacob Meyer is visiting her

daughter, Mrs. Lee Brooks, at Pleasant Gap. The Y. W. C. A. girls of State College will give a play in Boal hall on

Saturday evening. Mrs. L. E. Kidder and daughter and Mrs. Duncan, of State College, spent Thursday evening in town.

Mrs. Eliza Poorman and Mrs. Harry Markle and daughter Madeline spent Tuesday in Bellefonte.

Lewis Rothrock, of Port Matilda, a Penn State student, was the guest of Charles Hosterman recently. Mr. and Mrs. J. M. Mitchell and

Miss Maude Mitchell, of Lemont, were in town on Tuesday evening. Mrs. Fred Weber is seriously ill and is being cared for by her daughter, Mrs. Charles Ross, and Mrs.

Miss Geraldine Hackenburg, of Rebersburg, attended the commencement exercises and spent the week-end with her friend, Miss Mary Hazel.

Mr. and Mrs. Harold V. Coxey and daughter Eleanor and Miss Helen Coxey, of Altoona, spent part of last week with Mrs. Nannie Coxey.

OAK HALL.

Mrs. Sue Benner, of Johnstown, is visiting relatives in this vicinity. Flora Snyder, of Boalsburg, visited recently with her sister, Mrs. Walter

Mrs. Ada Benner, of State College, spent a day recently with relatives in our town.

Seven scholars, from the Oak Hall school, took the examination for Boalsburg High school, at Boalsburg. Mr. and Mrs. W. W. Tate and children, of Pleasant Gap, spent a day with Mrs. Tate's sister, Mrs. Charles

Whitehill. Quite a number of people from this place attended the Sunday school convention held in the Methodist church

at State College.

Mr. and Mrs. Walter Korman and children and Mr. and Mrs. Wayne Rishel and daughter visited at the Frank Reish home at Pleasant Gap.

David Gi'liland and friend, Miss Esther Raymond spent last Sunday with Miss Raymond's friend, Ralph Hassinger, in Bellefonte.

A surprise party was given in honor of Merril Houser, it being his seventeenth birthday. About thirty-five guests were present and all spent a very pleasant evening.

Roy Raymond, who recently returned from France, after being there for nineteen months, after visiting with friends for a few weeks, returned to Pitcairn last week, where his job was awaiting him.

Less Than 4,000 Legs and Arms Lost by Yanks.

Washington.—Less than 4,000 arms and legs were sacrificed by the A. E. F. on the battlefields of France. This figure was revealed by the War Risk Insurance Bureau which provides artificial limbs for all men disabled in military service against

Germany.
One hundred and tweny-five men suffered total blindness from Hun gas and shells, although there is hope that some of these may regain their sight.

Five hundred artificial limbs have already been furnished disabled men.

Protection the Oceans Afford Us. An American is quoted by an English review as rebuking his countrymen who have not risen avidly to the bait of "resonsibility and duty to the world" in these words: "The Atlantic and the Pacific are just as wide to most people in America now as they have been during the whole of American history." The inference intended to be conveyed is that the world war disclosed that our geographical icolation is more imaginary than real; that, instead of being protected by the great waters, our shores have been made as vulnerable to aggressive enemies in Europe or Asia as is the soil of France to Germans. Hence, we are instructed that a league of nations is the only possible prescription for safety and it is our duty to accept mandatories in the Near East and anywhere else that Europe may desire to have us take up its burden. Is the Atlantic ocean any narrower than it was before the war? The question is not raised here with any object of pointing an argument against a league of nations or of beittling conceptions of American duty that are being vigorously asserted. What did the war experiences impress as to the probability of a foreign enemy successfully invading our land by way of the seas? That is the only way any country except Can-ada or Mexico could attack us. For some years before 1914 the popular British nightmare took the form of a German invasion of England by sea or air. The British navy made short work of the German marine. Although air raids could not be prevent-George Coble and wife came and Saturday to pay a visit to the home of Mr. Coble's parents, Mr. and Mrs. hostile force that need be feared could be landed in England from the could be landed in England from the enemy shores and enemy bases in Belgium. The ill-starred ennterprise at Gallipoli demonstrated the futility of operations of the kind which would have to be undertaken by an Euro-pean or Asian enemy of the United

States. But did not the ferrying of hundreds of thousands of Canadian and millions of American troops across the Atlantic with practically no loss due to enemy activities prove the feasibility of military operations, backed by naval powers, against a distant country? We incline to the negative? Only in case this country should be derelict in providing adequate naval and coast defense would it be possible for an enemy to affect a landing on our shores. No country could successfully carry on war against the United States until it had swept our flag from the seas. Should any one do that we might surrender, but we still would have our coast defense and army with which to repel invasion. We might be bottled up, which would be uncomfortable and humiliating, but we would be in a pretty large bot-tle and would not suffer greatly.

The ocean remains our great natural defense and their narrowing by modern inventions cannot be justly pleaded as reason why we should form alliances which before the world-war were repugnant to us.

Historic Guns at Capitol.

Harrisburg.—Two of the three can-non presented to the Continental Congress by Lafayette when he came to the aid of the Colonies in the Revolution are to be mounted at the en- Great, who died 194 years ago. Petrance of the Capitol, carriages corresponding to the period in which they were used having been bought by the State. These cannon were part of a quintet that were placed on trestles in front of the Mexican war monument in Capitol Park and which were removed to the State Arsenal, where they were ordered overhauled recently by Adjutant General Beary. A third cannon, which bears the Laayette arms, is to be mounted in the Capitol Park extension when the landscaping work is finished. Near it will be placed two cannon captured from the Mexicans. One of these which bears the name of Cerro Gordo is a fortification piece and will be mounted on one of the old style carriages used on ramparts.

A number of Civil war cannon which

are at the State Arsenal and some which were used in the Spanish war also will be placed in the park. The captured Spanish cannon brought from Cuba has been remounted and placed at the entrance of the State Library. In all probability some of the German cannon captured by the Pennsylvania troops will be displayed in the park. Except for the War of 1812 and the war with Germany every war in which troops from this State participated is represented here by ordnance.

Compensation.

She put down the book with a sigh. "What is it darling?" he asked. "Ah, dearest, I'm so happy," she re-

Pure Tonic Value

In Peptiron, to the Last Particle of the Medicine.

The new and real iron tonic, Peptiron, is prepared in the convenient form of chocolate-coated pills, easy to take, easy to carry about with you; no water, no alcohol, no opiate. Peptiron is the essence of economy, the acme of efficiency. It is readily assimilated, acts promptly and powerfully upon the blood and nerves, corrects all run-down conditions, creates an appetite, gives stomach comfort and healthful digestion. It wards off impending illness, bridges over the danger spots, and increases power of resisting disease.

Do not put off treatment in these times so perilous to health, but get Peptiron and begin to take it today, two after each meal.

You'll not regret being particular to get Peptiron, and no other. Like many others, you will be surprised at its promptness in building you up.

New Wireless Achievements.

In a recently published article Dr J. A. Fleming, a British wireless expert, calls attention to some notable developments of wireless telegraphy and telephone in the past few years. Among the most important, he says, are the advances in the directional wireless telegraphy. Directional receiving stations are operated in pairs so that with the aid of trigonometry it is an easy matter to determine the exact location of ships or air craft. This method was used by the Germans to locate their airships when hidden from view by clouds. The British also made use of it for spotting German aircraft with quite a differ-

ent object in view. Dr. Fleming says that four directional wireless stations are now estab-lished on the coasts of Canada. These but if reforestation had followed cutmake it possible for ships, fog-bound ting from the first and all lumbering several hundred miles distant, to ascertain their position with comparatively little dificulty. He believes been made perpetual and there would that the control of air craft by means | be great stretches of timber today of directional wireless stations is destined to be of the greatest impor-

We are reminded by the article that telephonic sounds can be made suffi- be wantonly destroyed. Millions of ciently loud to be heard by aviators dollars are spent every year for the above the noise of their engines. (It will be recalled that wireless experts connected with the U. S. army and navy have worked out wireless while the rivers are allowed to reek apparatus which was successfully with filth, the game birds, animals used in the latter days of the war and and fish to suffer and the woodland to used in the latter days of the war and since for transmitting the sound of the human voice between stations on sufficient money to protect them prop-

from an aerial wire electric wave whose amplitude is regulated according to the air pressure of the air wave produced by articulate speech. Aerial messages from a distance are received by means of a valve director which makes it possible to hear cleary. These receivers are so sensitive

that aircraft no longer requires a long trailing aerial wire but may receive by means of a small inclosed directional aerial mounted on the ma-To a limited extent wireless tele-

phone messages can now be transmitted across the Atlantic and probably between Great Britian and Australia. The Marconia company, according to a statement made by one of its officials, expects the establishment of a regular commercial wireless telephone service between London and New York early next year. Calls to central offices may be necessary at first in order to talk between Europe and America, but the company hopes in time to evolve methods for relaying messages over private wires so that subscribers on either side of the Atlantic may converse with persons on the other side the same as by ordinary

telephones. Pocket wireless, the Marconi official predicted, will be in every-day use at no distant date. Then, he said, a man may be called by the ringing of a telephone in his pocket. On putting the receiver to his ear he may hear the voice of someone in an airship traveling at a high rate of speed, perhaps hundreds of miles distant.—Ex.

Russia's Greatest Ruler.

St. Petersburg, the modern capital of Russia, now known as Petrograd, was founded in 1703 by Peter ter first built a small hut for himself and a few wooden hovels. The majority of nobles, however, preferred that Moscow should remain the seat of government, but Peter was determined to build a new capital, and in 1711 he laid, with his own hands, the foundation of his palace, which was built of brick. Peter was an extraordinary character and Russia's rise to a great power was entirely due to his

Another Bellefonte Case

IT PROVES THAT THERE'S A WAY OUT FOR MANY SUF-FERING BELLEFONTE

FOLKS. Just another report of a case in Bellefonte. Another typical case. Kidney ailments relieved in Bellefonte

with Doan's Kidney Pills. Wm. McClellan, 244 E. Lamb St., Bellefonte, says: "I suffered for a long time with a lame back and pains

through my loins. Some mornings I could hardly get out of bed, I was so sore and lame. My back ached con-stantly and I had a great deal of annoyance with my kidneys. They were weak and acted irregularly. I heard so much about Doan's Kidney Pills that I concluded to give them a trial. I got a box from the Green Pharmacy Co. and I can tell you Doan's certain-ly cured me. I haven't had a lame or aching back since I used them. My kidneys are now regular in action. I can recommend Doan's Kidney Pills to anyone who has suffered as I have. They are a positive cure for kidney trouble." (Statement given October 21, 1907).

On October 19, 1918, Mr. McClellan said: "I haven't had occasion to use Doan's Kidney Pills for a long time, for they cured me. I am glad to confirm my former endorsement recommending Doan's."

o-A SPECIALTY-o AT THE

WATCHMAN OFFICE. There is no style of work, from the cheapest "Dodger" to the finest BOOK WORK,

that we can not do in the most satisfactory manner, and at Prices consistent with the class of work. Call on or communicate with this office.

"Why, I don't know. What in the

world do you want with a tank?"
"I'm tired o' these road hogs in big
tourin' cars crowdin' my flivver into ditches. I'd like to jog down the road a piece in a tank just to see what would happen."

About the Lumber Famine.

This week the newspapers contained the news that a lumber famine is imminent. But this is whatever, as how could it be otherwise when one of our heritages has been ruthlessly wasted and the surprise is that the lumber has not been exhausted long ago. What a splendid land this was years ago, when covered with a vast expanse of virgin timber. Of course much of it had to be cleaned over vast sections of wasteland as des-olate as a desert. It seems strange that a great country like ours should allow its splendid natural heritages to the ground and airplanes in the air.)
To effect wireless telephony, Dr.
Fleming says it is necessary to radiate

To effect wireless telephony, Dr.
Fleming says it is necessary to radiate

face of the earth, and is truly enough to make us hang our heads in shame when we think how much superior in this respect the European countries are to us, where the natural heritages are guarded with jealous care.

The Big Health Drive Has Started

TO BUILD UP THE BLOOD OF BELLEFONTE.

Spring is the Time When People, Worn and Weary after a Hard Winter Need a Tonic to Restore the Blood and Renew Energy and Ambition.

It's one of the most persistent traditions of the people to take a tonic in the spring, and like the accunulat-ed wisdom of mankind it has a sound GOLDINE is used in the treatment

of stomach, heart, nerves, indigestion, physical decline and debility, to build you up and create strength. GOLDINE ALTERAC is used for catarrh, kidneys, bladder, liver, blood, rheumatism, weak back, eruptive and

skin diseases and to purify the entire GOLDINE LAXATIVES are used for constipation, costiveness, liver

trouble, gall troubles and for cleansing the organs of digestion and excre-tions. Remember you can secure these remedies at Green's Pharmacy, where they will be glad to tell you what they have done for others.
