

VICTORY TO SUPERIOR RACE

Teuton Hosts at the Marne Overwhelmed by Men Possessed of Love of Liberty.

The following passage is from an article entitled "The New Men and the Old World," in Inter-American. The writer, Jesus Semprum, is a noted Venezuelan man of letters, the author of many biographical, historical and literary works. He employs the allegorical style of writing.

"Therefore, men died by the thousand, from Nieuport to the black Vosges," writes Mr. Semprum. "An advance here, another there, thousands of prisoners, hundreds of cannon; but the channel ports continued to be denied them; Amiens and Chalons and Paris unattainable in the distance. The tired chargers went so far as to drink the fateful waters of the Marne. "Suddenly the wind of wrath blows against the monarch's hosts. In the front rank fight with skillful daring the new men, like veterans seasoned in long campaigns. Without knowing the whips of the sergeants, the destroyers of free will, without having lured covered by the yoke of minute and iron discipline, without calling themselves the favorites of the Most High, Pershing's men pursue the veteran conquerors of the world and throw them back upon the Moselle, astound them with their numbers, their strength, their simple and serene valor. They went forward at a quick and measured pace, and under their feet the soil of France quivered in the joy of liberation.

"The new men had arrived in time!"

YOUNG WIFE'S FIRST LESSON

Mrs. Newlywed Evidently Beginning to Learn Her Household Duties From the Ground Up.

The newly married man came home from his office happy. He was greeted as newly married men are greeted, with a kiss, and this, in fashion of his kind, he returned with interest.

"Of course we shall go out to dinner, darling," he remarked.

"Yes, dearest," replied the happy young woman.

"But one of these days we shall have a dinner here, darling, shall we not, of your own cooking?"

"Of course, dearest," she replied, "I am getting along famously with my cooking lessons."

"And it will be such a change," he continued, "from the monotonous fare of the restaurants."

There were more kisses.

"Did you take cooking lessons today, darling," he asked.

"Yes, dearest."

"And what did you learn?"

There was pride in her tone as she replied, "Today, dearest, I learned how to boll water."—Ohio Observer.

Something to It—After All.

The hostess had talked about her wonderful ancestry until her guests were bored to distraction. No one made any comments, but still she was determined to win some. So she turned to the young woman next to her and said: "Isn't it splendid to have an ancestry of which one can be proud?"

The young woman, who was very successful indeed, smiled and calmly rejoined: "I really don't know. You see I've been so busy all my life trying to do something worth while so that my ancestors, should they suddenly come to life, would not feel ashamed of me, that I've had very little time to hunt information about them."

Temperament and Watch.

That particular kind of temperament exercise a baleful influence on watches seems to be a common experience.

"I once carried four in three months," writes a correspondent, "and all stopped. A watchmaker told me that they behaved as watches do when the spring of the balance gets magnetized, though why they should have done so he could not say."

The fact when mentioned to Prof. Sylvanus Thompson, distinguished electrician, noticed that the clock-stopper fidgeted a good deal, and ventured to suggest that such movements probably generated a small amount of frictional electricity at high tension, which might at times magnetize the spring.

RED CROSS GIVES FULL ACCOUNTING

War Council Tells How Millions Contributed by Public Were Used For Relief.

BIG TASK IS DESCRIBED

In Twenty Months \$154,000,000 Was Spent Overseas and \$119,000,000 in the United States.

Washington. (Special.)—Through a complete report of the work of the American Red Cross in the war by Chairman Henry P. Davison, on behalf of the war council, the organization on the eve of its annual enrollment of members during the Third Red Cross Roll Call, November 2 to 11, has rendered an accounting of the many millions given it by the American people to help our fighting men and our allies. The statement is, in part, as follows:

"The war council of the American Red Cross is now prepared to make a complete accounting to the American people of money contributed and expended, as well as the work done by the American Red Cross during the period in which the war council was in control of its affairs. The war council was appointed May 19, 1919, and went out of existence February 28, 1919.

"It was the practice of the war council to give complete publicity to its policies and finances, but it is only now that a picture of the war period as a whole can be presented. It is the feeling of the war council that a report in this summarized form should be made directly to the public which provided the money and gave the effort which made the American Red Cross a success.

"A statement of the American Red Cross effort and finances since the war council relinquished its control will be made to the public through the executive committee, and it is important, therefore, that the fact that this report covers the period only until March 1, should be carefully noted."

Following are certain round figures covering American Red Cross participation in the war, as revealed by the war council's report:

Some Outstanding Figures.	
Contributions received (material and money)	\$400,000,000
Red Cross members:	
Adults, 20,000,000	
Children, 11,000,000	31,000,000
Red Cross workers	8,100,000
Relief articles produced by volunteer workers	\$71,577,000
Families of soldiers aided by Home Service in U.S.	500,000
Refreshments served by canteen workers in U.S.	40,000,000
Nurses enrolled for service with army, navy or Red Cross	23,822
Kind of comfort articles distributed to soldiers and sailors in U.S.	2,700
Knitted articles given to soldiers and sailors in U.S.	10,900,000
Tons of relief supplies shipped overseas	101,000
Foreign countries in which Red Cross operated	25
Patient days in Red Cross hospital in France	1,755,000
French hospitals given material aid	3,780
Spills supplied for American soldiers	294,000
Gallons of nitrous oxide and oxygen furnished French hospitals	4,340,000
Men served by Red Cross canteens in France	15,376,000
Refugees aided in France	1,726,000
American convalescent soldiers attending Red Cross movies in France	3,110,000
Soldiers carried by Red Cross ambulances in Italy	148,000
Children cared for by Red Cross in Italy	155,000
Of the \$400,000,000 in money and supplies, contributed to the American Red Cross during the twenty months the war council was in existence, \$263,000,000 was allotted to national headquarters, while \$137,000,000 went to the chapters to finance their activities. Expenditures in the twenty months totalled \$273,000,000, divided as follows: By national headquarters in France, \$57,000,000; elsewhere overseas, \$64,000,000; in the United States, \$48,000,000; cost of chapter-produced articles distributed in France, \$25,000,000; elsewhere overseas, \$9,000,000; in the United States, \$28,000,000, making total expenditures in France, \$82,000,000; elsewhere overseas, \$72,000,000; in the United States, \$119,000,000.	

NEW DRIED FISH TO EAT

The United States Fisheries Bureau has tacked on to its building in Washington an annex that is to be devoted to laboratory investigations relating to the salting, drying and otherwise preserving of aquatic food animals.

There are in the fishing industries great wastes, due in part to the throwing away of much good food material, but also largely to imperfect methods of preservation.

Experts of the Fisheries Bureau have newly found out how fish may be preserved by salting when the temperature is as high as 88 degrees. This is accomplished very simply by carefully removing all blood, roe (or melt) and entrails as a preliminary. They "go bad" at 20 degrees lower than the flesh.

Pacific coast fishermen are being taught how to pickle herring by the Scotch method, which will help to make available incalculable stores of food now unutilized. Europe is largely fed on herring caught in the North sea, and our own population might enjoy an equivalent advantage by drawing upon inexhaustible supplies of the same kind of fish obtainable from the waters of Alaska and the northwest coast.

Experiments are to be made in the preservation of oysters by drying. The Indians of the Chesapeake region and tidewater Potomac, long before Columbus landed, dried oysters in great quantities in the sun, maintaining an important trade in them with tribes far inland. Thus the idea is no novelty, and it would presumably be applicable to clams as well.

The method adopted, however, would probably be somewhat like that recently tried for the drying of mussels, warmed air being blown by power-driven fans over and through wire trays (on lattice shelves) containing the "meats." The mussels through a sausage grinder and, assuming thereupon the appearance of brown granules, would keep well in glass jars or paper cartons. They were thus made available at any time for soup or chowder.

A serious drawback in the case of the mussels was that the product had an unpleasant odor. No such trouble would be likely with oysters and clams.

"They are all good enough, but the "Watchman" is always the best.

National Duck Pond One of the Sights of Washington.

One of the most interesting features of the National Zoological Park in Washington is the duck pond.

This pond covers perhaps half an acre of land, is prettily set in trees and shrubbery, and has been made by superintendent Ned Hollister, the home of a collection of wild ducks and geese which are native to America.

Here the hunter can see the great gray honker, the cackling goose and the California wavy, the mallard, teal, pintail and most of the other wild fowl that he has shot from boat and blind, all very tame and very much at home. Each duck has had one wing clipped so that he cannot get over the fence, but this does not seem to affect either his appearance or his happiness.

This spring a number of the wild fowl brought out broods of downy youngsters. A pair of Canada geese appeared one day at the head of a troop of six yellow goslings. Very dignified children were these, too. They walked behind their parents in a compact little troop, each gosling picking up his feet very precisely and making complacent remarks to himself in a minor key. When they entered the water it was the same way. They swam in a neat row and never strayed far from mother.

A few days later a little wood duck came out with a brood of youngsters—and what a contrast! Those young wood ducks skittered about the surface of the pond like so many water spiders. Although no bigger than a man's thumb, they seemed to be able to swim as well as anything on the pond. Their fond mother never knew where they were, and they simply sailed in joyous circles around those pompous and well-behaved little geese.

Non-Essential!

The returned soldier pushed aside the elaborate array of knives, forks and spoons beside his plate, retaining only one of each. "Too much equipment to keep clean," he smilingly remarked to the hostess.

A HALLOWE'EN WISH FOR YOU!

May your pumpkins turn to coaches, and the mice to footmen FOUR. As bechanced dear Cinderella in those magic days of yore.

A Style Show for Men

There's one thing mere man can learn from woman—and that is she doesn't buy clothes till she has shopped around—and seen "what they are wearing." Come in and see the Fall Exposition of

High Art Clothes

Made by Strouse & Brothers, Inc., Baltimore, Md.

and you'll learn the correct things for Fall. Style has taken a radical turn, last season's suit won't do—it will be "spotted" easily. We'll look for you.

Fauble's

58-4 Allegheny St., BELLEFONTE, PA.

Give the world the once over

LISTEN, fellows, to some straight talk. Many a man when he gets to be 40, misses something. He may have lots of money, and a fine family but—

He never "got out and saw things". After he gets settled down, it's too late.

Every man wants to see the world. No man likes to stand still all his life. The best time to TRAVEL is when you're young and lively—right NOW!

Right NOW your Uncle Sam is calling, "Shove off!" He wants men for his Navy. He's inviting you! It's the biggest chance you'll ever get to give the world the once over!

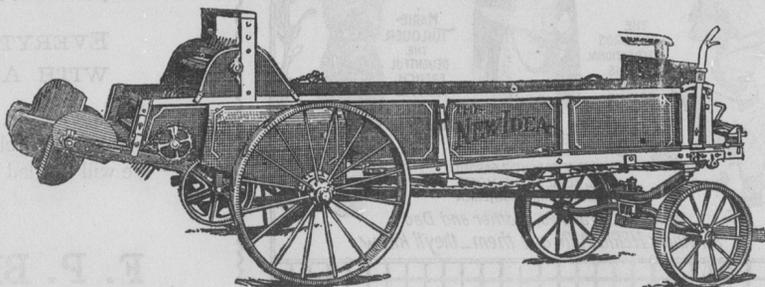

The Navy goes all over the world—sails the Seven Seas—squints at the six continents—that's its business. You stand to see more odd sights, wonderful scenery and strange people than you ever dreamed of.

You'll work hard while you work. You'll play hard while you play. You'll earn and learn. You'll get, in addition to "shore-leave", a 30-day straight vacation—which is more than the average bank president can count on.

You can join for two years. When you get through you'll be physically and mentally "tuned up" for the rest of your life. You'll be ready through and through for SUCCESS.

There's a Recruiting Station right near you. If you don't know where it is, your Postmaster will be glad to tell you.

Shove off! - Join the U.S. Navy

BUILT like a wagon. Solid bottom bed with heavy cross pieces, and supported by full width of sides. Front and rear wheels track. Axles coupled together with angle steel teeth; coupled short, dividing load between front and rear axle. Wide-tired wheels. No moving parts on rear axle. Axle not used as a bearing for gears to run on. Chain-Driven Exclusively. Positively not a worm or cog gear on the machine. No clutch. Operated by only two levers. The lightest, easiest running and most practical Spreeder.

Just received a carload of Coaklin Wagons. All sizes and for all purposes. 62-47 Dubbs' Implement and Seed Store.

Your Banker

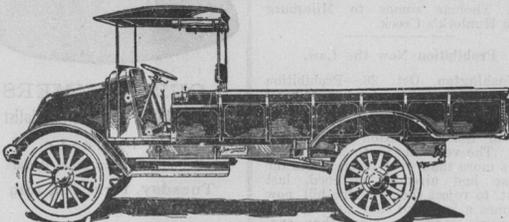

The institution with which you maintain banking relations can be of service to you in many ways.

The Centre County Banking Co.

does not consider that its service to its patrons ceases with the safeguarding of their funds. It keeps in personal touch with all of them in such a way as to be of assistance very often when other matters develop affecting their interest.

It Invites You to Take Advantage of Its Unusual Service.
