

A Good Chance for Timber Dealers.

All of the chestnut trees on the State forests were thrown on the market on Wednesday by Gifford Pinchot, the chief forester of Pennsylvania. He declared he was convinced they could not survive the blight which has caused widespread destruction among the trees of that species during the last ten years. Forester Pinchot said he was ready to receive offers for the removal of chestnut timber from any of the State forests. Explaining that the chestnut trees are rapidly dying from the effect of the blight, Forester Pinchot said he desired to clean up the diseased timber so that the forests will be better able to grow healthy and desirable trees of other species. Furthermore, it was pointed out, the removal of the trees that will eventually die and fall will also eliminate a vast fire trap, which is of paramount importance in the State forests.

L. E. Staley, chief of the Department's bureau of operation, who will handle the timber sales, said there are excellent opportunities now to cut and market the chestnut timber. The telephone pole market is active; the extract companies are buying large quantities of chestnut timber, chestnut shingles are in demand because of the high prices of other roofing materials, and there is a brisk market in barrel and keg staves made of chestnut. Mine and railroad cross ties are selling well, and there is an unprecedented demand for building materials manufactured from chestnut.

Mr. Staley said the proposed sale was not an attempt to stem the progress of the blight—that hope has passed. It is merely a movement toward better forestry in Pennsylvania.
