Scrofula Most Progressive Now.

Sudden changes of weather are especially trying, and probably to none more so than to the scrofulous and consumptive.

The progress of scrofula during a normal autumn is commonly great.

It is probable that few people ever think of scrofula—its bunches, eruptions, and wasting of the body—without thinking of the benefit many sufferers from it have derived from Hood's Sarsaparilla, whose success in the treatment of this one disease alone would be enough to make it what it is, one of the most famous medicines in the world.

There is probably not a city or town where Hood's Sarsaparilla has not proved its merit in more homes than one, in arresting and completely eradicating scrofula, which is almost as serious and as much to be feared as its near relative—consumption.

Hood's Pills, the cathartic to take with Hood's Sarsaparilla, in cases where one is necessary, are gentle in action and thorough in effect.

Italy's Lumber Requirements.

Destruction of the invaded district of Italy, although bad enough, has not been so great as anticipated. Unless there is a tremendous industrial development as a consequence of the war, it seems likely that even with favorable freight rates Italy's requirements in the lines of rough and sawn lumber for ordinary commercial use will not exceed 2,000,000,000 to 2,500,000,000 board feet a year.
