FLYING TO ALASKA.

Ford-built Liberty motors carried the four army air-planes which on October 20 completed the 9,000 mile journey from Mitchell field, Long Island, to Nome, Alaska, and return.

The fleet was greeted over New York city by a flotilla of forty army planes which escorted it to Mineola. The returning planes touched their wheels to earth at 3:15 in the afternoon.

The Alaskan flying expedition, commanded by Captain St. Clair Street, undertook the journey to demonstrate the durability of modern airplanes and motors, and to effect the establishment of an aerial route to the northwestern corner of the American continent and Asia.

Such a route would bring mail from Alaska to the States in two or three days, whereas the present method of transportation requires thirty days.

"Talk about service," said Captain Street. "Those planes and motors sure stood up. Why, the only trouble we had on the entire trip was caused by the worst bit of weather we ever flown through or want to fly through. We had everything—rain, snow, hail and sleet, clouds, fog and mist. But we kept right on flying."

"The 230 miles of glaciers we traversed was a wonderful sight, but there would have been little hope for rescue had we cracked up in that wilderness. Altogether, it was a rough trip. I never want to fly through such weather again, but the planes stood it magnificently. Instead of battered hulks, flopping to earth after winded flight, they looked brand new. Even the turn-buckles were polished and the motors looked as if they had just come off the testing block."

"We never changed a spark plug. Never a cylinder missed on us the entire trip. The motors are in as good condition today as when we set out."

Before the flight, all the pilots asked for ships equipped with Ford made Liberty motors.

Due to the nature of the work which engaged the expedition, the fleet required a period of three months to complete the trip. Since all of the original motors completed the journey without repairs or replacements, this is believed to be a record for aerial navigation. It will be recalled that during the war, it was generally the practice to overhaul the airplane motors after approximately each twenty hours of flight.

This is the second notable event in which Ford Liberty motors have figured prominently, the first being the trans-Atlantic jump of the Ford Liberty-equipped NC 4, a feat which commanded world-wide interest.

Discloses Evil in Prohibition.

Housework is a Burden

Woman's lot is a weary one at best. But with backache and other distressing kidney ills life indeed becomes a burden. Doan's Kidney Pills have made life brighter for many Bellefonte women. Read what Mrs. J. T. Gordon, 130 E. Beaver St., Bellefonte, says:

"I and another member of my family, have found great benefit from the use of Doan's Kidney Pills which were procured at Parrish's Drug store. My trouble was dull, constant backache which kept me in misery at times. Mornings I was so sore and lame I dreaded to begin my housework, for it was a burden. Doan's Kidney Pills, taken according to directions restored my kidneys to a normal condition. I have had no return of the backache or kidney disorders. Doan's surely have my gratitude for the lasting benefit they brought me." (Statement given April 12, 1914).

On October 19, 1918, Mrs. Gordon said: "I gladly confirm my previous statement for Doan's Kidney Pills, as I certainly have found them to be all that is claimed for them. Doan's cured me, for which I am very thankful."

Seed Potatoes for Growers in Pennsylvania.

In his efforts to improve the quality and yield of potatoes in Lancaster county, Farm Bureau Agent Bucher, it was announced, had bought right out of the fields of northern Michigan a carload of disease-free Russet seed potatoes, that will be sold at cost to Lancaster county farmers.

The car holds about 1,100 bushels, and as soon as a number of local potato growers were appraised of the fact there were requests for at least half the lot, the price being in the neighborhood of \$2.25 per bushel.

The Russet potato has come into strong popularity in Lancaster as well as other counties of Pennsylvania the past few years, being both of fine quality and a strong yielder. Out of 118 tests conducted last summer on the Russet potato by Prof. E. L. Nixon, of State College, the Russet proved the largest yielder in all but two tests.

The past summer Prof. Nixon himself went to Michigan and personally rouged all the fields where these seed potatoes were taken, so as to have them absolutely disease-free.

There were but 20,000 bushels of seed, and Prof. Nixon in his recent trip, in which Farm Agent Bucher joined, picked up 16,000 bushels, Lancaster county getting one carload. The rest will go to Dauphin, Lehigh, Centre, Cumberland, Franklin, Lebanon, Carbon and Schuylkill counties.

It was stated at the Farm Bureau that the potatoes would be distributed from Landisville, where they were shipped from Michigan, and that small amounts might still be allotted to early applicants.—Ex.

Rheumatism--Relief

From Its Dreadful Pains and Aches, Stiffness, Soreness—

Hood's Sarsaparilla comprises remedies that every physician prescribes for rheumatism, combined with other blood-purifying, tonic and strength-building ingredients in a formula vastly superior in make-up and in curative power. It does give positive relief. Thousands say so. So will you. For a fine laxative take Hood's Pills. 65-43
