Though past seventy-seven years old he is active as most men at fifty, so the life he has led evidently agreed with him.

During the hard electric storm which passed over this section on Monday the barn on the Daniel Irvin farm at Baileyville was struck by lightning and burned to the ground. The farm was tenanted by Mr. Irvin's son Clarence and they were just hauling a load of hay in the doors when the barn was struck. Fortunately none of the men were shocked and they hurriedly backed the wagon out and saved the hay. Has Prohibition Caused Increase in Crime?

Recently the Anti-Saloon League made inquiry of the District Attorneys of Pennsylvania as to whether there had been in their respective counties an increase or decrease in crime in recent years. In order to obtain explicit information we took the year 1914 and asked for a comparison with 1920. In comparing these two years it should not be forgotten that we selected the last year before this country began seriously to feel the disturbances of the war and compared it with the year in which the after effects of the war were likely to be most in evidence.

It should not be forgotten that between those two years there was a large increase in population in many of the counties under consideration. This was especially true of Philadelphia and Allegheny counties.

We requested the district attorneys to furnish us the number of cases returned to court for trial by committing magistrates in the two years under consideration. We received accurate and definite reports from thirty counties. Two of these were Philadelphia and Allegheny. The other twenty-eight are fairly representative of the entire State. From the reports received we are able to compile the following tables showing the number of cases returned by committing magistrates in 1914 and in 1920; also showing the decrease and the percentage of decrease.

	1914	1920	Dec. % Dec.
Philadelphia	8,624	8,446	175 .02
Allegheny	4,267	4,053	184 .04
Other Counties	8,982	7,594	1,380 .15

In eleven counties there was an increase and in nineteen counties a decrease. The greatest decrease was found in Schuylkill county where the

number of cases fell off from 1,742 to 914. The largest increase was in Beaver county where there were 361 cases in 1914 as against 476 in 1920.

In addition to the above we secured reports from 24 counties on the number of cases returned for trial for infraction of the liquor laws. The number of such cases in 1914 was 716. In 1920 there were 544 cases, being a decrease of 22 per cent. This marked decrease of prosecutions for violation of the liquor law may mean one of two things: It may mean that there is a greater laxity in prosecuting this particular crime than there was under the old high license system in 1914. On the other hand if the vigilance and efficiency of the officials in 1920 was on a par with that of 1914 it proves that there is less actual violation of the law than there was under the old high license system. Be that as it may these figures give a black eye to

the argument that men are more obedient to restrictive laws than they are to prohibitory laws. The comparisons furnished herewith are from counties containing over 60 per cent. of the population and prove conclusively that there has been a decrease instead of an increase in crime in this State since prohibition went into effect. They also indicate that violations of the liquor law are more frequent under license than under prohibition.

MANY SIGNS point to a turn for the better in business. Things have been growing worse for a year and a half. We think they will soon begin to show signs of recovery. The United States cannot stay long out of business. We are too big, and rich and enterprising. We must keep going. Many people are not buying because they foolishly spent all they had when times were booming. This makes bad times, but it brings its own cure in forced economy and saving.
