#### PLEASANT GAP.

Another kiln was started at the Whiterock quarries on Monday last. Never let your right hand know the actions of your left, and you will never suffer from ingratitude.

Humanity is liable to attempt too much of life in one day. Better spread it out and it will last longer.

Superintendent S. M. Hutten, the former live wire operator of our knitting mill, has left for his former home in Tennessee to accept a position in one of the knitting mills that he was formerly employed with. The three houses of the late Daniel Schlottman, situated at Pleasant Gap, will be sold at public sale in a few weeks. It is reasonable to suppose that fair prices will be realized, since there are still four or five families who want to make Pleasant Gap their permanent home, and who are unable to rent houses, since there is not one vacant house at the Gap today.

Some persons have the power to do or not do whatever they please. These can reform at any time; and they usually make a habit of reforming frequent-

Every evil has its corresponding good; it is therefore impossible for good; it is therefore impossible for more than one-half of the world to be a complaint or cross word. She kept u. S. Senator. And people are scarcely so bad but what they have some redeeming quality, and if they have only one, the passport on the strength of one. So it's not so terribly hard to get through the world after all, when one qualification will do it; learn to do one thing and do it well, and you are a guaranteed success.

Grandmother Bilger says we are all liable to make mistakes. The good old lady should know as she will celebrate her ninety-third birthday next month. If common sense and age counts for anything we should endorse her on this particular old saying. Come to think over it, a mistake is not such a terrible thing; if you profit by it, for then the good that it does you, compensates somewhat for your inadvertance; and thus mistakes may bear with them a certain amount of remedy; unless it be a mistake in marriage; but even here it is a mooted question—on which side the mistake is, and if, as some contend, it is on both, one balances the other, accounts

William Noll Jr., in commenting on the chronic borrower says he is about tired lending. He says that the Noll Bros. have loaned about half they possess to numerous pious pretenders, one-half of the number forgetting that they have a bunch of items in their possession that don't legitimately belong to them. There are evidently some cogs missing in their memory It just occurred to the writer that a person who borrows a thing from you and keeps it is worse than a thief, for the thief takes unawares; while the borrower comes into your presence, appeals to your generosity, and you, wishing to improve in virtue, thus endeavor to accommodate him; but when he fails to return the article, he has not only done what the thief does, but has also abused your feeling, destroying your confidence in humanity, thus rendering you less generous to your fellow beings.

Mr. Otis Hile, of Horntown, is about to embark in a new enterprise. The day before Christmas George S. Horner, retired farmer, presented the con-

tractor with a litter of pups. At first Mr. Hile did not know what to do with Horner's generous presentation, but after due consideration the enterprising Otis concluded to go into the dog raising proposition. He argues that since we live adjacent to Greens valley, and the small game abound abundantly in the aforesaid valley, he is Luke's Lutheran che satisfied that the new proposition lar hour on Sunday. would be a paying venture, more especially since the puppies are of the hunting variety. Otis says any way work is a little scarce, and he sincerely believes that this new side line will

go a great way towards keeping the wolf from the door. Everybody in this vicinity is awaiting results. Generally speaking, our community is highly favored with good health, no epidemics, and few diseases of a serious character prevail. However, our physician is overworked looking after patients who are afflicted with cold, owing, probably, to the unsettled and changeable weather conditions. Few diseases require more attention than this, and few are more generally neglected. So many, when they take cold, consider it of no importance, and let it run its course, without reflecting a moment on its consequences. We should remember, that neglected colds are generally dangerous, and frequently result in incurable diseases. The cold produces cough, often a fever follows, and finally ends in consumption, and often ends in an untimely death. Colds are the effect of

turbs the even tenor of nature's way than the falling of a leaf. In the social world the death of a good man is lamented. His personal influence is missed during his generation. The best he can do for succeeding generations is to leave his name, the mention of which will recall deeds of virtue. It is not the death of a man that yields the good results, but his name and his actions. It must be said of Penrose, that with his love of liberty and sense of honor he would not yield a point Abraham Lincoln, there are more horses than stalls" in our pleasant vil-himself, his friend, or a principle to Abraham Lincoln, there are "more the last. A woman who resides in our vicinity goes on to say that she was housekeeping for a widower for the space of seven years, during which time she received a weekly stipend of four dollars, including boarding and all the comforts afforded by the home. Her duties were clearly defined, and the master of the house knew his place and kept it. As a rule things went things in excellent trim, and her employer gave her due credit for it. In quality, and if they have only one, the liberality of humanity exempts the trim that she is now the ruler of the others, and allows them a thorough mansion. It would be well for women to make a careful study of the situation before leaping hurriedly into the vortex. The seriousness of such consid-

erations require careful thought. A young man in Noll's store wanted to know why it is that women, since they have a vote, are so determined to run the whole universe. If there is one thing that woman will kick stronger against than another, it is against rules. She will suffer herself to be encased in rigid stays, endure skin-tight shoes and wear her hair twisted painfully, and wear dresses to run down to her knees only; yet she cannot endure ironclad relating to domestic affairs, especially if they are made by men. #### SPEEDING IN THE YEAR 1834

Costly Pastime for New York Stage Driver, Who Was Fined \$10 Twice in a Day.

Speeding is an ancient evil in New York streets. As long ago as 1834 the police had their troubles with "road Roy Henry went to Bellefonte on burners," although, of course, the drove horses then, not motor cars. Here's what a newspaper said about the ancestors of the present day son. of Jehu, one of whom was arrested twice in one day, the New York Sun points out:

Portuguese Said to Have Been Responsible for the Modern Corrupted Spelling.

The English word "Japan" and the Japanese "Nihon" or "Nippon" are alike corruptions of "Yih-pen," the Chinese pronunciation of two characters literally meaning "sun origin"; Mrs. Sue A. Peters, in a quiet way, that is, "the place the sun comes from," a name given to Japan by the Chinese on account of the position of the archipelago to the east of their own country.

## WHEN THE FLESH "CREEPS"

Sensations of Fear and Horror Cause Progressive Centraction of the Erective Muscles.

When one is greatly frightened and mpulses go out from the brain centers to the erector muscles the progressive contraction of the latter can be distinctly felt. This sensation commonly attends the emotions of fear and horror and is popularly described as a "creeping" of the flesh.

Impulses which pass out over the nerves from the brain affect various muscles in addition to those attached to the roots of hairs. This fact accounts for the peculiar behavior of the heart when one is badly scared, for the tenseness of the throat and the vocal cords and for the trembling of the hands, etc. A contraction of the muscular tissues controlling the blood vessels partly closes them and so shuts off the supply of blood to the skin.

This, of course, results in paleness. At the same time the numerous sweat glands in the skin are excited and pour forth an unusual amount of perspiration. This causes the oftmentioned "cold sweat." In reality it is no more cold than any other sweat, but it seems so because it occurs when the skin is chilled, due to the constriction of its arteries and capillaries. -Cleveland Plain Dealer.
