PUMPING FACILITIES TO BE IMPROVED.

Important Business Transacted by Borough Council.

W. C. Coxe appeared before borough council on Monday evening with a petition signed by residents of east Bishop street asking that the extension of east Logan street be opened to traffic. The petition stated that over thirty years ago, when that part of the town was laid out in lots, a street forty feet in width was provided for; that the same had been open to traffic continuously until within the past year when it was partially closed by Harry Keeler after purchasing a lot in that section. The matter was referred to the Street committee and borough solicitor to ascertain the borough's rights in said street.

Secretary Kelly presented the bond of borough treasurer Edward M. Gehret in the sum of \$16,000 and that of borough solicitor N. B. Spangler in the sum of \$500, both of which were approved.

The Street committee presented the borough manager's report which included the collection of \$16,000 for work done. The committee also reported that they had interviewed the County Commissioners relative to repairing the Lamb street bridge and they agreed to appropriate \$500 toward the expense. The committee also presented a bid from H. S. Moore who agrees to put the steel beams necessary to strengthen the bridge in place and paint same for the sum of \$570. The total cost for repairing the bridge will be about \$1,100, and when the work is completed it will be capable of carrying a load of fifteen tons. Council authorized the committee to proceed with the work.

The Water committee reported the collection of \$39.50 on the 1920 water duplicate. At the last meeting of council the committee suggested the installation of a new turbine wheel at the Phoenix mill pumping station as a matter of economy, and were instructed to ascertain figures and present the same to council for consideration. In connection therewith Mr. Cunningham stated that according to actual figures the present pump at the Phoenix station pumps 864,000 gallons of water in a continuous run of twenty-four hours; the electric pump will throw 864,000 gallons in a continuous run of sixteen hours, while the Aldrich pump at the old pumping station throws 185,000 gallons in a continuous run of twenty-four hours, making a total of 1,913,000 gallons, which is about the daily consumption in Bellefonte. With a new turbine wheel at the Phoenix station the capacity of the pump there will be increased to 1,400,000 gallons, and adding to this amount the water thrown by the Aldrich pump would leave only about 350,000 gallons to be pumped daily by the electric pump, or less than half the amount now drawn from that source. The monthly bills for the electric pump run over four hundred dollars and by the reduction in time as above noted these bills would be cut down at least one-half, which would mean a saving of over two thousand dollars a year. As to the cost of installation of a new wheel, the wheel and new fixtures needed will cost close to \$700, while the committee estimated the total cost of installation at approximately \$1,000. A motion was passed authorizing the committee to purchase the new wheel and have it installed.

The Finance committee asked for the renewal of notes for \$500, \$2,000, \$1,200, \$1,800, \$1,500, \$2,500, \$5,500 and \$7,000, a total of \$22,000, which was authorized.

President Walker called attention to the fact that the boys in the manual training department at the Bellefonte High school, under the direction of Prof. Menold, had made a number of street markers and he instructed the Street committee to take a look at the markers and make a survey of the town to see if they can be used to advantage.

Borough manager J. D. Seibert reported that the fire alarm motor had been sent to the Scranton Electric company for examination as to whether it can be repaired but so far no word has been received from the company.

President Walker reappointed as members of the Bellefonte board of health Col. W. Fred Reynolds, whose term will expire in 1924; James C. Furst Esq., whose term will run to 1925; Dr. M. J. Locke, 1926; John Blanchard Esq., 1927, while Dr. David Dale's term will end in 1923. The appointments were approved by council.

Mr. Brouse inquired as to the legality of parking cars on south Water street, especially adjacent to the Bush Arcade, and this promoted a general discussion of the traffic ordinance, the rights of automobilists, etc. Finally the president referred the entire matter to the Fire and Police committee and the borough solicitor to solve all questions and get things in shape so that the ordinance can be enforced. It might be stated that the attitude of council is not to be understood as one of hostility to owners and drivers of cars show such utter disregard of even the most simple road rules in driving on the streets of Bellefonte that it is time some action is taken for the protection of pedestrians as well as automobilists themselves. Just what plans will be worked out remains to be seen, but if all drivers of cars observe general road rules they will find little to complain about. One thing, especially, which drivers should not do is to drive on the wrong side of the street. Some drivers in Bellefonte

not only disregard this rule but stop their car on the wrong side of the street then become offended when told about it.

Bills to the amount of \$1342.53 were approved and council adjourned.
