PLEASANT GAP.

Mrs. C. C. Baumgardner was on Saturday night summoned to the bedside of her sister, Mrs. Kramer, residing near State College, who is reported to be seriously ill.

If capital competing with capital foreign and domestic, is its greatest enemy, is not then labor competing with labor, foreign and domestic, your greatest enemy? Is not your duty clear, then, to let capital look after itself, while you look after yourselves.

Our lumbermen were elated when they read an account of the address of Supt. McCrea, of the Pennsylvania railroad, last week, who asserted that they expected to expend \$100,000,000 during the coming year and that \$800,000 would be required for improvements in the vicinity of Pittsburgh alone.

As women grow weaker physically they probably grow wiser, if book knowledge can be counted as wisdom. They read more, talk more, and should know more. But is the knowledge gained thus of any benefit to the world? Will all their reading of novels, conversations on social topics and politics, or their ability to speak French, relieve the misery of a boy who has been eating green apples.

A noted writer recently said, that "a mother's love is the only virtue that did not suffer by the fall of Adam." It strikes one that whether Adam fell or not, it is quite clear that the unselfish love of a good mother is the crowning glory of the race.

Yes, one day of sunshine this time of the year will make a wonderful change in a house. Our women, since moving time and housecleaning are all the rage, are too busy to ever give one a gentle smile. The piano is locked, the work-basket packed away in a closet, brass hammering tools exchanged for tack hammers, and crochet needles for dust pans and feather dusters.

From time immemorial our farmers as a rule held a deep seated grudge against the right of dogs; simply, as they say, because they kill so many of their sheep and other animals. The dog has his place in the world, and is, I think entitled to the respect due to his position.

is higher and better than the dog only in a moral point of view, and just how much higher and better depends entirely upon how he stands according to the established standard. According to statistics for 1921 the dog proved a great benefactor to the taxpayers of our Commonwealth. The fact in a nut-shell is this: The dogs in the State in 1921 increased to 355,293; while the number of sheep killed fell to 3,228, in a total of 450,870, or less than 1 per cent. The State paid out \$50,519 for damage for all kinds of live stock; at the same time the State received from dog licenses \$459,293, leaving a substantial balance in favor of the dog end proposition.

TAKE GUDE'S PEPTO-MANGAN

It is the Safe and Reliable Tonic Used by Physicians for 30 Years. There are "new styles" even in medicines. A new "fad" comes, is popular for a while, and then fades out of public view. A remedy that has stood the test for thirty years must have remarkable merit and cannot be called a "fad."

Bath a Japanese Institution.

From the very earliest days baths and bathing have been known in Japan. And at a time in European history when the Valois kings of France were requesting their courtiers to use perfumes to counteract the lack of bathing, the Japanese, high and low, were reveling in hot steam and warm baths, which are still to be found in every corner of the country.

In one of the earliest books, called the "Wakun Shiori," the Detroit News observes, it is stated that the "Yuva"—the "hot water house"—is a sacred house, in the book called the "Teijozaki" the phrase "O yu dono" is used. This also has a double meaning "Drinking water," or "place for making hot water," and from this latter meaning there comes the use of it to denote "bathing place." But the word "O yu dono" was really used by mistake to denote the place near the kitchen where hot water was prepared. All these books were written before 1200 A. D.
