Tax the Billboards.

Many State Legislatures, as well as the Federal Congress, are casting about for new subjects of taxation, and some one has suggested that there should be a tax on billboards.

Doesn't this strike you as a good suggestion?

Newspapers and magazines and other advertising mediums pay taxes. Why should the billboards escape?

True, it is a poor advertising medium, but really that is one of the best of reasons why it should be taxed. Taxing billboards out of existence would not be a step in the wrong direction.

A billboard is an eyesore at best, and the more you think about it the less reason there seems to be for its existence.

Ford Turns Out 6,000,000th Motor.

Ford motor No. 6,000,000 was lifted from the assembly line in the Highland Park Ford plant at Detroit, at 9:14 a. m., May 18th. Just five and one-third seconds later No. 6,000,001 was finished. The unusually heavy demand for Ford cars and trucks at the present time has necessitated the building of 5400 motors daily. These are shipped in carload lots to the various assembling plants throughout the United States.

The first Model "T" Ford motor was completed on October 1st, 1908; number 1,000,000 left the assembly line December 10th, 1915; and number 5,000,000 came through May 28th, 1921. Although the Ford Motor company turned out a number of different models prior to 1908, the present numbering system began with the first Model "T."

Some Folks Think the Counting of Sheep Will Put Them to Sleep.

Counting all the sheep in the world will not bring repose if insomnia is caused by nervousness due to eye-strain.

Reliable physicians will not prescribe medicine for sleeplessness until the patient has had his eyes examined by a thorough optometrist.

Eighty-five per cent. of all ailments are due to overtaxed nerves.

Better have your eyes examined.
