The second trial of the case of M. E. Shaughnessy vs. the Director General of Railroads, again resulted in a verdict for the defendant. The case went on trial last Saturday morning and did not go to the jury until Tuesday afternoon. In just one hour a verdict for the defendant was returned. The case was an action brought by Mr. Shaughnessy to recover damages for alleged injuries sustained in a railroad accident near Julian several years ago. It was first tried about a year ago when the jury found for the defendant. The case was appealed to the Supreme court and they sent it back to the lower court for a new trial and now a second jury sustains the findings of the jury at the first trial.

At the Rally day services in St. John's Reformed Sunday school, last Sunday, the boys won the pennant by a majority of one. Only regular members of the school counted in the contest. In the offerings towards the support of their mission station in Japan the school contributed \$86.50.

### Potato Grower's Seed Test.

About twenty-five Centre county farmers and potato growers attended the potato raising at the farm of A. C. Kepler, two miles west of Pine Grove Mills, last Saturday. Among those present were J. M. Campbell, J. T. Fleming, Ellery Parsons, of Pennsylvania Furnace; J. J. Markle, W. H. Moyer, Dr. Kerns and Dr. Nixon, Profs. Thurston and Overholts, of State College; J. G. Miller, of Pine Grove Mills, and A. H. Spayd, of Centre Hall. The result of the seed source test, all of russet variety, was as follows:

Source	Year	Bu. per Acre
Michigan	1922	399
Cambria	1922	396
Potter	1922	373
Michigan	1921	383
Potter	1921	370

The potatoes from Michigan, 1922 seed, were generally conceded to be more uniform in size and shape. In another and probably a trifle better section of the field four rows were left unsprayed on the Michigan 1922 seed. The unsprayed rows yielded 316 bushels per acre, which would ordinarily be considered a very good yield in Centre county. There was very little blight on these unsprayed rows and only a few rotten potatoes, probably less than 1 per cent. The sprayed rows just next to the check rows yielded 445 bushels per acre, the highest yield yet recorded in Pennsylvania this year, an increase of 129 bushels, or 40 per cent., at a cost of almost \$12.00. Any one can draw his own conclusion as to the efficiency of spraying. 34 per cent. is the average increase for spraying in Pennsylvania. After the spuds were raised E. L. Nixon, extension plant pathology specialist, gave a very interesting discussion on Pennsylvania's prospects as a potato producing State. He pointed out the fact that Pennsylvania does not begin to supply her own markets.

In most seed source tests in other sections of the State the difference is usually much greater than in this case, but with the same sources leading in most cases. The same test will be run next year, for one year's results are not sufficient from which to draw definite conclusions.

—A communication from "A Citizen" in the interest of the American Legion was crowded out of this week's issue of the "Watchman" but will appear next week.

### Farming is our basic industry

Prices of food-stuffs are determined by foreign markets, for our surplus stock is sold abroad. We cannot sell abroad unless we buy—there must be an exchange of goods. Hence legislation that tends to lessen foreign trade operates directly against the farmer.

Swift means of communication have brought the world so close together that no nation can rely on itself alone.

Poverty in Europe means dull times here. We must buy abroad if we hope to sell.
