G. OSCAR GRAY, Bellefonte. An Episode of the World War.

For County Chairman

Four years and six months have passed since the United States entered the world war and many things then are now viewed from a more dispassionate angle. In a certain section of Centre county there was at that time, and still is, quite a German settlement. The men had for years worked hard and regularly and the families were frugal in their tastes and manner of living with the result that most all of them had very comfortable balances in bank.

Shortly after the United States entered the world war officials of the bank where the Germans kept their money were attracted by the fact that cemetery. they were withdrawing their money. At first it was thought the withdrawals might be for business reasons but the practice became so persistent and extended to such large amounts that ne bank officials reported the matter no ways endangered by the cash fifty-three years ago. His boyhood puzzled them was what became of the but thirty-five years ago he went to experiment of marking the bills when a withdrawal was made. In this way it was believed that if the money was being used for any purpose detrimental to the welfare of the United States it would prove a tracer to the guilty parties, but nothing of the kind was ever discovered.

The war ended in due time and the matter had almost been forgotten when, strange as it may seem, the marked bills began to trickle back into the same bank that had paid them out. And only a few days ago a woman from the German settlement made quite a large deposit in the bank and included in the roll was a number of the marked bills. Inasmuch as none of the bills had ever been taken in through regular commercial channels the only conclusion reached is that when the Germans withdrew their money it was through fear of it being confiscated and that the greenbacks had been buried for safe keeping, and now, when all danger is past, it is being gradually dug up and re-deposited in the bank.
