## Would You Dare Test Your Suit Like This?

DO N'T try it-for water will wreck most suits—they're not built for such usage.

But Clothcraft Clothes ARE—the famous water-test proves it—proves that the many little parts that make up Clothcraft Clothes are built into a whole that will give real service.

See the "Water Test" display in our window this week. It will tell you one thing about clothes, that you ought to know.

## TWO TINY WIRES

Each Bellefonte Bell Telephone subscriber is connected to the Bellefonte central office by wires—two tiny wires.

These wires pass through a maze of cables and coils, through delicate apparatus that must be kept in careful adjustment.

And that isn't the end of it, for there must be apparatus to connect each Bellefonte telephone with any other Bell telephone in the nation.

The job of building and maintaining this complicated equipment is done by two-fisted men—men who think in terms of never failing service.

Theirs too is the task of installing new telephones, and of maintaining them.

One outstanding quality characterizes these men—they are imbued with the spirit of courtesy.

When they come into your home or your office, you find them anxious to do their work quickly, efficiently and neatly.

They want you to feel that should they return at some future day you will welcome them.

For they know, as do all Bell people, that *courtesy pays.*
