William I. Betts for Efficiency, Economy and Reform

The people have made real sacrifices for their government and they will not be controlled any longer by a set of political bosses. This political campaign is a battle for the freedom of the government away from the control by political rings. The old order has passed away and now they are going to exercise their free and untrammeled rights guaranteed to them under the constitution. The issues at stake are clean cut and the voters will decide for themselves the kind of government they desire to live under, and not the kind of government that the political boss has been giving the people of Pennsylvania. Economy, Efficiency, Reform and Welfare Legislation is what the people are demanding and to rid themselves of a political system which has grown up in this State, utterly disregarding the rights and welfare of all the people. Public opinion is looking for the greatest possible service from all departments of our government and to see our Commonwealth returned to the control of the people. The people want a government that will really serve in the highest sense of the word. The people of Pennsylvania desire a clean government and clean politics. They are opposed to political trickery and underhand methods. They believe politics should be as clean as their churches, their homes and the kindred organizations to which they belong.
