Nash Cars More Popular Than Ever.

As evidence of the country's return to that condition described in the past as "good times," and indicating also increasing preference on the part of the public for Nash cars, shipments from the factories of the Nash Motors company for the first month and one-half this year exceeded total combined shipments of January, February and March, 1922.

"In 1921 there were built and shipped 20,000 Nash cars," said E. H. McCarty, sales manager of the Nash Motors company. "Last year 40,000 Nash cars went into the hands of buyers. This year the demand is far greater than at any time in the history of the company, as evidenced by shipments during the first month and one-half of 1923. This progress is both swift and sound; improvements and refinements embodied in Nash cars, which met with instant approval on the part of the public, have made certain a continuance of the demand. There will be a shortage of Nash cars this spring. This is plainly indicated in the heavy demand and present condition of the railroads with respect to the handling of freight."

If you are going to buy a new car for the summer see Willis Wion. Let him demonstrate a Nash for you.
