Monocle Popular with Women of England. Fit Prevents Wrinkles.

The monocle, hitherto one of the hall marks of the fashionable London man-about-town, is threatening to become the latest craze among English-women.

Increasing numbers of fashionable women are to be seen toying with dainty tortoise-shell, gold and platinum-rimmed monocles suspended on black silken cords or rainbow-colored ribbon.

Spectacle makers report an increasing demand by women for the monocle, which is made to fit the eye with faultless precision, to avoid the possibilities of wrinkles or a crooked contour.

Pet Snakes Now Popular.

Boa constrictors caught on the shores of the Amazon are the latest fashionable pets for the women of London. A flourishing business has been done by a London naturalist in selling these pets to professional dancing girls in England and on the continent.

The snakes, which are kept in perforated zinc boxes fitted with tanks, include every variety of Brazilian boa constrictor. American bull snakes also are popular.

"I am importing two shipments of snakes," one dealer announced, "to meet the demand. The smaller snakes are the most popular and there is no danger from their bite. They are easily tamed and make good pets."

Cone's Disciple Plans to Open Classes in Boston.

A school of instruction in the art of self-healing, the first in this country to teach the use of conscious auto-suggestion as practiced by Emile Coue, is to be established in Boston shortly. Announcement of the plan was made by Marchesa A. Manucci Capponi, who accompanied the little druggist of Nancy to this country.

The school will be situated in the North End section, most populous of the foreign colonies in the city, and instruction will be given first to children, he said.

116,080 FORDS FOR FEBRUARY.

Shortest Month Brings New Sales Record. Acute Situation Certain As 6,000 Cars a Day Production Fails to Meet Demand.

Detroit, Mich., March 27.—With 116,080 Ford cars sold at retail in February a new record for the shortest month in the year has been established. February sales exceeded those of January by more than 15,000 and marked the eleventh month in which Ford sales have topped the 100,000 line.

This sales record bears out predictions made at the opening of the year that an acute shortage in Ford cars is certain and this shortage is expected to be felt within the next two months with the increased volume of car buying which is always attendant upon the spring months.

Even the high production schedule set at the Ford Motor company's factory here, which will reach 6,000 cars and trucks a day about April 1st will be unable to meet the apparent demand for Ford products.

Anticipating a great increase in the demand for Ford cars during the present year the factory here laid plans for increasing production to the 6,000 car a day schedule and since January first had been constantly speeding up manufacture to reach this figure. Demand so far has been of such great proportions as to absorb nearly all production, and stocks in hands of dealers are at present the lowest they have been in months.

February sales of 116,080 cars were made in the face of unfavorable weather conditions in many sections of the country which tied up freight traffic and prevented many deliveries. This was particularly true throughout the Northwest, the northern tier of States and in New England. In California, too, cold weather during a part of the month had its effect upon car sales.

Yet with even those unfavorable conditions, the February sales topped those of January by 15 per cent. and set a new high record for mid-winter selling. With February the eleventh month in which Ford car sales have gone over the 100,000, the total for this period is close to 1,250,000 cars.

Peak car sales usually are reached during the summer months with drops in the fall and winter. This feature of automobile absorption by the buying public has been completely changing during the last few months through the activities of the Ford dealer organization which has raised the "peak" line to include every month in the year.

To Train Women Coaches at State Summer School.

A course in athletic coaching for women will be offered this year for the first time at the summer session of The Pennsylvania State College. The course will be similar to one started last year for men which was so successfully directed by Hugo Bezdek, director of athletics. The theory and practice of basketball, volleyball, indoor baseball, hockey and other women's sports will be taken up during the eight weeks of the session. Miss Margaret McClenahan, instructor of physical education at the University of Pittsburgh, will be in charge of the new course. Applications for admission to the summer session, which starts on June 25, are coming in rapidly and the outlook is for the greatest session in Penn State's history. It is expected that even last year's record-breaking enrollment of 2688 will be exceeded this summer.
