#### Abe Rubbed It In.

Some of you will recall reading our acknowledgement of the supply of "liver scraper" that friend Abe Markle, of State College, deluged us with several weeks ago. We made it the occasion of a mild rebuke to the gentleman for having uprooted so many

dandelions that might have grown blossoms to beautify the landscape, furnish honey for the bees and flavor and kick for an old fashioned beverage that seems to have grown in popularity since the year of Mr. Volstead, P. P., 1918.

posies. He never showed a yellow streak himself and, maybe, he don't enjoy it in nature. As we intimated before we know he is a tee-totaler and. of course, wouldn't have any interest in anything stronger than one-half of one that could be made from dandelions. But he does appreciate the busy little bee. And just to show us that his generosity with the "liver

lough and has been secured for this food supply he brought us two boxes of "pure dandelion honey" last Friday. We never ate "pure dandelion honey' before and we doubt if any one else has but that's what Abe said it was and, with us his word goes, for it was just a little different and a little better than any other honey we have ever tasted.
