With production increasing in an endeavor to meet the demand, it is expected that the company will finish the year with a total approximating 1,800,000 Ford cars and trucks for domestic use alone.

This is the opinion expressed by officials in view of the present prosperous conditions, the increasing number of orders and the outlook for even better times prevailing during the coming months.

In bringing up production, efforts all along have been devoted to building better. As a result many improvements have been made and though Ford cars and trucks are today at the lowest price level in the history of the company they are of higher quality and present a greater value to the purchaser than ever before.

The demand for Ford trucks and Light Delivery cars is particularly optimistic since it reflects the attitude of business men, as well as farmers, toward expansion and greater efficiency. Sales of Ford trucks are more than double those of last year, which indicates the extent of the general prosperity.

For months Ford dealers have had no stocks on hand, buyers absorbing the cars and trucks as rapidly as they are turned out of assembly plants. With this condition continuing production is certain to remain at capacity to aid dealers in making deliveries as quickly as possible.

Penn State Graduate School Crowded. A total of 64 men and women are enrolled in the graduate school of The Pennsylvania State College this summer, taking courses leading to advanced degrees according to information just given out by Dean Frank D. Kern.

Of this number, 47 are men and 17 women. No less than 41 have registered for the first time this summer, the majority being faculty members or college graduates who are teaching in Pennsylvania. The graduate school was established about a year ago and is taxed to the utmost to give the instruction that is now being requested.

Intimation that in 1924 the Department of Highways will complete its oiling schedule in June, rather than in July, is contained in a letter to Department engineers from William H. Connell, deputy secretary of highways.

Mr. Connell early this season directed the Department's maintenance forces to complete the oiling schedule by July 1, declaring he saw no reason why the traveling public should be inconvenienced throughout the entire summer and fall by the presence on the roads of distributing crews. The Department by July 1 completed 500 more miles of oil than was originally intended.

THE FARMER'S DOLLAR. From Department of Agriculture report covering a period of thirty years, as compiled by the Secretary, Henry C. Wallace.

The statement is very significant. During the past thirty years the Republican party has been in control of our national affairs, a greater part of the time. The figures show that only in two years, under Republican administration, has the farmer's dollar purchased a hundred cents in value.

BIG SHOWING IN SIX MONTHS.

Detroit, Mich., July 30.—A total of 1,050,185 automotive products were built by the various divisions of the Ford Motor company during the first six months of the present year, according to figures just compiled.

The output for the half year was as follows: Ford cars and trucks, domestic and foreign, 941,245; Canada 46,871, Fordson tractors, 58,557 and Lincoln cars 3,512.

A new monthly record for production was established by the Domestic assembly plants in June with a total of 175,040 Ford cars and trucks, exceeding the output of May by nearly 5,000.

New production marks have been set up almost daily since January, but there hasn't been a time when manufacture even approximated the demand.

With production increasing in an endeavor to meet the demand, it is expected that the company will finish the year with a total approximating 1,800,000 Ford cars and trucks for domestic use alone.

This is the opinion expressed by officials in view of the present prosperous conditions, the increasing number of orders and the outlook for even better times prevailing during the coming months.
