#### MANY PEDAGOGUES HERE. County Teachers' Institute Held Interesting Sessions This Week.

Over three hundred teachers were in attendance at the seventy-seventh annual teachers' institute held in Bellefonte this week. The first session was held on Monday afternoon when Rev. Frank B. Hackett, of Bellefonte, led the devotional exercises. This was followed by a feast of songs under the leadership of Mrs. M. R. Krader. Greetings to the teachers were extended by assistant county superintendent H. C. Rothrock, who urged prompt and regular attendance upon the part of the teachers. He then ter with Education?"

Dr. Beeler submitted four propositions, as follows: America is the most criminal nation on earth; our country too free to the refuse of other countries; teach in present generation what you want in next generation; more teen age boys and girls in schools of correction than ever before. Dr. Beeler made the statement that notwithstanding all the above more money is now being spent on education than ever before. Public schools are more perfect than ever before.

Dr. J. F. Marsh, of the State Board of Public Instruction, discussed teaching as salesmanship. He advised the teachers to study the physical and nervous make-up of their pupils, their ancestry, etc. Every individual has twelve things to consider: Fear, anger, curiosity, manipulation, play, initiation, construction, ownership, rivalry, fighting spirit, get something to eat, and gang-spirit.

TUESDAY'S SESSION. On Tuesday the institute split up into three parts, the rural section being held in the court house, where Dr. Beeler discussed the psychology of the school subjects; Dr. Lee Driver made a general address and Dr. Marsh talked on the laboratory of a rural school.

The grade section was held in the Contest. High school auditorium where Miss Zoe Thrall, of the Indiana State Normal, talked on geography in the grades. She enumerated as the physical needs food, shelter, clothing, tools, heat and light. To secure these needs we must follow such occupations as farming, herding, hunting, fishing, lumbering, mining, manufacturing and commerce, while among the higher needs for music, art, literature, religion, government, and science. She then related what determines these needs and stated that geography is the influence of the physical environment upon life. Discussion of the same subject was continued by Dr. Marsh, while Dr. Beeler continued his talk on the psychology of the school subjects.

The High school section was held in room 13, at the High school building, with Mr. Pletcher presiding.

Tuesday afternoon's session was again consolidated in the court house That's Good." He showed how a the railroad yards. Problem." Dr. Beeler asserted that the farm is the most important single also stated that the farmer is the only person who does not set the price on his products. The spirit of the American farmer must be revived. He must be taxed fairly and judiciously, and all other phases of American life must be taxed similarly.

WEDNESDAY'S SESSIONS. Wednesday morning's sessions of institute was divided into three sections, Miss Thalls, Dr. Beeler and Dr. Marsh being the speakers at the court

A new instructor in the person of Dr. J. A. Foberg, of Harrisburg, made his first talk to the grade section in the High school building. His subject was teaching mathematics in elementary schools. Dr. Marsh talked on English composition and Dr. J. Freeman Guy discussed the newer view-point in teaching reading. He advocated starting children to read at the age of six years, but to be careful not to harm the health of the child.

The afternoon session was held in the court house and one of the interesting talks was given by Miss Thalls on "China, the Nation of the 20th Century." She stated that China is one of the civilizations that has existed for thousands of years and predicted a great future for that country. Among its ancient and interesting objects of man's handiwork are the grand canal, the great wall, suspension bridges and the mariner's compass. Its people discovered the art of making gunpowder, paper, porcelain, the printing press, silk, while the Peking Gazette is the oldest daily newspaper. China is rich in coal, iron, tungsten, lead, zinc and copper, but lacks transportation.

In talking on the problems of democracy Dr. Beeler said that there must come a new condition of affairs, a new fellowship, before world wars will cease. There must come a new philosophy of work, a new interest in education. A christian religion must come to the world before we are safe in the spirit of democracy.

Institute sessions yesterday were a continuation of discussion of the various questions brought to the attention of the teachers on previous days, the afternoon diversity being special talks by members of the boys' potato clubs of the county, who had a splendid exhibition of their work at the Y. M. C. A. In the evening the Business Men's association entertained the boys and their sponsors at a potato supper at the Y. M. C. A. The final session of institute will be

Miller, Edwin Stroman, William M. Lewis and Charles Freudenberger. At the time the arrests were made it was the general opinion that they were the result of a sudden invasion of the county by Pinchot's squad, but such is not the case. The properly constituted authorities of Centre county were back of the raids. It was through information furnished from Bellefonte that operator Henshel was sent here to get the evidence and the raid was made with the full knowledge of the law officers of Centre county. #### John S. Spearly.

Possibly to John S. Spearly, above all candidates on the ticket of either party, should be given credit for having made a success in life over obstacles that would have discouraged most of us. He is a son of Charles and Anna Spearly and was born at Snow Shoe, December 25th, 1871. His mother having died when he was a mere boy he was sent out to work For fifteen years he worked on farms citizen. in Buffalo Run valley farming for the Brennans, Breons and Reuben Crust.

When large enough to stand the gaff of such work he went to Taylor ore mines and put in three years at the munificent wage of 80 Rupp when he was Register of the cents a day. He has been living on the farm ever since.

He has been school director, registration assessor, assessor and tax collector of Benner township; having held the latter office for the past fifteen years and every time since his first election he was returned to ofwonderful record in itself, but when it is known that all of his duplicates but two are settled in full, with only small balances due on them, and that he has never had a tax sale there must be general admission of his attention to business and tactfulness in doing it.

As we intimated in the beginning Mr. Spearly is a graduate of the school of hard knocks. He knows how hard he has worked to get what he has and because of that can be relied upon to be most prudent in handling the money of the tax payers if elected Commissioner.

He is a member of the Evangelical church and has five children.
