EVERYDAY

The world is full of magic things, But, O, the world is wide!
I'll stop within my low, green door,
And find Romance inside.

For everyday has elfin wings, And dancing, faery feet; She gilds my polished, wooden floor, And spurs the hours fleet.

She touches common ways to flame And lights from morn to morn, The little duties, one by one, That worldly folks might scorn.

And that is Love, I know, And thus, from rising sun to sun, Her magic paths I go. -Faith Baldwin, in New York Sun and

CASTLE WITH 1,200 ROOMS

Structures in Mannheim Is the Oldest in Germany-Was Erected in 1720 -Has Museum and Chapel.

Mannheim castle, which the French recently took over, is the largest in Germany. Before the recent revolution it was the home of the grand duke of Baden, who now occupies a smaller castle which he owns in Freiburg. After the revolution the castle was used for municipal offices until the French took it over.

The building has a length of 600 meters and contains 1,200 rooms. It stands in a park of more than fourteen acres. The castle was begun in 1720 by the Electors Carl Philip and Carl Theodore and is regarded as one of the finest baroque buildings in Germany. It contains a museum, art gallery and chapel.-Detroit News.

AS THEY STROLLED ALONG

She-Did you see that boat shoot like an arrow across the stream? He-Yes, dear; you'll notice the river at that point forms a bow.

dandy and man about town was asked how he was going to vote. Without the slightest hesitation he stated that he was going to vote the labor ticket. "That may be a very good thing,

Algy," said his interlocutor, "and doubtless is. But, really, my boy, I never knew that you were identified with labor."

"Cawn't say that I am, but they've put up a pretty young duchess."

Anthem Not Legally Recognized. never been legally recognized as the ing the match, the coin or the bottle. national anthem of the United States. Congress, as late as 1914, refused to winning one is this: declare it so by resolution. Its only air is played.

His Mistake.

A man who found early rising difficult bought an alarm clock. At six the next morning he was roused by a terrific knocking at his front door.

ly: "This won't do; you must not an of water. One night he asked her why noy the neighborhood. Take it inside.' And he handed the new alarm clock to boy to bring the water to her.

"Ah," said the crestfallen householder, "I wondered how the milk can came to be at the bedside!"

On the Job.

general store.

"I want," he said, "that tub of margarine and that bacon and all the told me that it was the fire-alarm sigother foodstuffs."

"Good gracious!" said the recently except in case of fire." bereaved widow who kept the store. "What ever do you want with all them things, Mr. Giles?"

"I dunno," replied the farmer, "but I'm_ the executor of your husband's will, and Lawyer Stiles said I was to be sure to carry out all the provisions

BEANS AS MUSCLE BUILDER

Lumberjacks Work Long Hours at Top Speed on Plain Diet-Meat Called Harmful.

The hardest work in the world is lumbering, for it means working at top speed from dawn till dark, and usually in intense frost. Lumberjacks live principally on beans baked with pork and flapjacks (a kind of pancake) eaten with maple sirup. They also eat quantities of steamed brown

It is a mistake to think that a lot of meat is necessary to make muscle. The coolie, especially the Chinese, who lives on rice, is more active and enduring than the negro fed on meat; and the Arab, who lives largely on dates, is extraordinarily wiry and can travel all day in burning heat that would kill a meat-fed man.

Among the strongest men in the world are the Turkish porters. Two of these have been known to carry a grand piano up a flight of stairs, and one will carry a load of 100 pounds twenty miles in a day on his back. These men live almost entirely on dried fruit and olives.

The Spanish peasant works all day and dances half the night on black bread, onions and occasionally a little cheese; while the Italian who is the best navvy in the world, does his work on an equally simple diet, of which the principal part is chestnut meal, onions and fruit.

Doctor Stefansson, the Canadian explorer, who has lived longer in the Arctic than any other white man, existed for months on nothing but fish. All day he was out in temperature below zero, yet he has put it on record that during that time he actually gained weight.

The staple diet of the Roman soldier was coarse brown bread and sour wine, yet on this he built roads and carried incredible weights of armor and baggage over extraordinary distances .- London Tit-Bits.

TRICKS PLAYED WITH COIN

Various Methods Explained so That You Can Entertain Your Friends.

The trick of making a coin stick on surface will greatly puzzle your friends when you perform the seeming magic for them.

Take a coin, and, placing it flat against a door or some other smooti. surface, rub it back and forth vigorously a dozen times or more. Take away your hand after repeating a mystic chant, and the coin will stay there. After a few moments it will drop. The explanation is that the rubbing of the coin on the smooth surface heats and drives the air out from under the coin, thus leaving the English politics has some angles unto us. A well-known London face to hold it in place. After the under it and it drops off. Be sure the coin you use has a good rim on it and the surface on which you put it is very

Another trick is performed with a bottle, a match, and the coin. Break the match stick so that the two parts hang together by only a few fibers of wood. Place it in a v-shape on the neck of the uncorked bottle, and then on the match lay the coin. Now ask your friends if they can make the "The Star Spangled Banner" has coin fall into the bottle without touch-Various solutions will be tried, but the

Dip your finger in a glass of water, official recognition occurred nearly a and placing it above the angle hundred years after it was written, formed by the match, allow a few when it was formally ordered to be drops to fall in the broken place. The played in the army and navy on oc fibers of the wood, swollen by the casions of ceremony. Its standing is moisture, will try to straighten themundisputed in other lands, and when selves, and you will see the angle of ever America is honored in music this the match increase little by little until it gradually works out from under the coin and the money drops into the bottle.

The Wise Bellboy.

Among the guests at a small hotel was a woman from a country district. When he opened it he was confronted The landlord noticed every night that by a policeman who exclaimed, stern she came downstairs and got a pitcher she did not ring the bell for the bell-"No bell in your room, madam? Let

me show you.' He took the pitcher of water in his

hand and escorted her to her room. Entering the apartment, he pointed out to her the knob of the electric A farmer walked into the village bell. She gazed at it with wonder and then explained:

"Is that a bell? Why the bellboy nal, and that I must never touch it

Inventor of Hose Supporter.

A little contribution to the history of women's garments: The origin of the garter-not the round kind, but the other variety. It was invented, for his personal use, by one of the most illustrious German philosophers, Kant, who had observed that the type of round elastic garter he had been using to hold up his silk stockings stopped the circulation of the blood. Kant set his brilliant mind to work, and finally devised a combination of elastic and catgut harness attached at the top to his vest. Thus the hose supporter was

Something to Worry About.

"You look blue, old man." "I am blue. I've been rejected." "Oh, cheer up! There are plenty

of other girls, you know." "Girls be hanged! It's an insurance company that has done the rejecting."

-Boston Transcript.

ANIMALS ARE GOOD LINGUISTS

Horses and Dogs Learn and Remember Meaning of Words in More

Than One Tongue. Can horses and dogs pick up a for-

eign language and still remember that of the land of their birth? This subject was broached by one of the speakers at the World Service exposition in Liverpool and it was declared that a British horse can recognize its own language abroad.

The experts who have been consulted agree that this is so. They emphasize the fact, however, that it is primarily the inflection of the voice that the animal learns to understand when sent to a foreign country. It pays much closer and quicker attention to the tone than to the sound of

the words. Dogs, like horses, remember the sound of the language of their masters, and even after many years in a foreign land can remember the meaning of sentences.

A clear proof of some dogs' cleverness is to be found in the way they pick up several native tongues and dialects when they leave their British masters in India and Africa, in places where several languages are spoken.

Cats, on the contrary, seem incapable of picking up more than their names in the language of the country in which they live; they do not deign to comprehend the human tongue, and a cat that does is exceptional.-Philadelphia Inquirer.

WAY TO TEST YOUR RUBIES

Genuine Stones Contain Tiny Flaws and Characteristic Peculiarities.

After the diamond the ruby stands supreme among precious stones, being the most popular of all colored gems. The genuine stone is obtained from a mineral called corundum.

To obtain one ruby thousands of tons of soil have to be washed and carefully examined. The finest gems come from the great ruby mines of

All genuine stones contain certain tiny flaws and blemishes and characteristic peculiarities. Spurious rubies get their imperfections during manufacture; and as chemists are more careful than nature, these imperfections are less noticeable.

You can test your rubies by certain differences between the real and the artificial. A genuine ruby contains irregularly shaped bubbles; the imitation gem contains bubbles which are perfectly round. Again, natural rubies have a silky sheen, due to a number of tiny parallel lines running in three directions. Imitation stones never have this characteristic.

To examine your ruby, place it in a strong light and look at it through a microscope. If the stone is in a setcoin has had time to cool, the air gets | ting, place a drop of oil on its face, and hold it up with the back face to the light. The drop of oil prevents reflections of light which would confuse the eye.

Pioneer in Transportation.

Although man has covered the world with railroad systems and steamship lines, Mother Nature is the pioneer in transportation service. For ages she has been moving her own products from point to point by many different methods. One of the most unusual of these transfers occurs in the formation of bottom ice which freezes at the bottom of fresh and salt water bodies. Stones, rocks and other debris become imbedded in these cakes, which, after a time, move upward toward the surface, often with sufficient force to shoot high in the air. Then these pieces of ice, sometimes as large as a house, become huge "freighters," traveling considerable distances with the winds and current. As they melt the stones and other fragments sink to the bottom again. That parts of sunken ships have been carried many miles in this manner has been proved by deepsea divers, who have found them literally covered with stones that came from other localities .- Popular Mechanics Magazine.

New Kind of Stamps.

The arrival of twins at a flat one evening caused a great sensation and the sister of the young mother was so impressed by the unexpected honor of being aunt to a pair that she lost her wits for the time being.

She rushed to the nearest post office and asked for stamps so that she might spread the glad tidings.

The clerk said, affably, "How many, miss?" "Two," she cried, joyously.

"What?" "A boy and a girl," she said, then

fled in dismay.

Getting the Expression. The beautiful movie actress could roll her eyes and arch her brows, but she couldn't seem to get her finer shades. So the director thought he

would try a little strategy.

"Now, Miss Resplendent, we shall have to shoot that scene again." She took her position.

"Register indignation. Your last effort was rotten." "Sir-r-r!

"Hold it. That's more like indig-

Relapse.

He-What do you say to a honeymoon in Europe? She-But dearest, you know how afraid I am of seasickness.

Yes, but you ought to know that love is the best remedy for that. Perhaps-but-think of the return

TIGER SACRED TO THE HINDUS

Believe When Animal Kills Man Victim's Ghost Rides Astride It

and Warns of Danger. The natives of India believe that when a tiger kills a man the vic-

tim's bhut or ghost rides astride the tiger's back and warns him of danger. A rather gruesome story of this nature is related in the Northwest provinces. A man had been killed by a tiger and partly eaten when the animal was driven off by the villagers. They then got the deputy commissioner sahib to come and shoot the

Under his instructions they built a machan in a tree just beside the dead native, and at dusk the sahib took his place in this. About ten o'clock he saw, in the moonlight, the tiger stealthily approaching to finish off his kill—the dead native. But just as Stripes was within killing distance the sahib saw the dead Hindu sit up and point an arm and hand toward him in the machan. Of course the tiger, thus

warned, slunk back into the jungle. Then the sahib climbed down and with forked sticks pegged down the dead Hindu's arms, climbing back into the machan, curious as to what would happen. About three o'clock the tiger returned, feeling quite sure the sahib would have gone home. He crept stealthily forward, and as this time there was no warning from the peggeddown Hindu, he came close enough for the sahib to place a soft-nosed .45 bullet just behind his shoulder blade,

a direct line to his heart. That I don't believe this story is true does not abrogate the rights of perhaps fifty millions of Hindus who do believe it.—Saturday Evening Post.

SEEDS OF GREAT INVENTIONS

Little Things Discovered From Which Spring Matters of Worldwide Use.

Every electric light in the world, from the small pocket torch to huge advertising signs, owes its existence to a little ring about six inches in diam-

This ring, which is in the Royal Institution museum in London, is that from which Faraday, the great inventor, obtained the first induction spark, thus making a discovery which is the basis of our modern electric-

lighting system. In the same museum is another instruments from which great results have sprung. This is Faraday's hand pump used in his experiments in turning gas into liquid. Today we accomplish the same feat with the aid of two large engines working compres-

Equally interesting is the model from which Sir Humphrey Davy constructed the famous lamp bearing his name. Every one has heard of the Davy safety lamp, used in coal mines because it will not cause explosions of

firedamp, and so on. This lamp was so important in the mining industry that colliery owners of Newcastle gave its inventor a silver dinner service as a recognition of his

great work. The Royal Institution was founded by Count Rumford, himself an inventor. A hundred and twenty years ago he made the first fire grate. This grate is in the museum and it takes the attendants there a good two hours a day to keep the fire in it burning properly.-London Tit-Bits.

Condor Passing From Lofty Home. In the clear, cold heights of the Sierras, the American condor, giant vulture of the air and the largest bird that flies, is making its last stand for existence. Although the huge creature still wings its almost solitary way over the lofty range, it is facing the necessity of hunting a new home. Not more than a century ago it held sway over the sky course from snowy Mount Hood on the north to San Jacinto on the south. This feathered giant nests only once every two years and lays but one egg in an inaccessible crag near the mountain top. After the youngster is hatched it remains for months a helpless chick wrapped in its natal down.-Popular Mechanics.

Politeness All Wasted. Nooatime is a busy time in the fancy work department. A young girl, receiving her package, tried to slip out gracefully but failed. Having bumped into someone she murmured, "Pardon me." No one moved or scowled at her and, wonderingly, she turned to find, much to her companion's amusement, that she was being polite to a dignified figure in an attractive pink apron, marked \$1.98 .- Indianapolis News.

Cloth Made From Hemp Bark. Weaving snow-white fabric from the bark of hemp is becoming an important industry in some sections of China. This cloth, called "hsiapu" by the natives and classified by foreigners as Chinese linen, is excellent in texture and is worn extensively. Compared with the finest silks and satins, the best quality of this grass product is quite expensive.-Popular Mechanics Magazine.

International Exchange. "Hello, old man; you look worried

What's on your mind?" "I shipped a bale of cigar coupons to a money broker in Moscow. 1 heard they were going over there as currency. So I told him to get me the best exchange he could and take a fair profit for himself."

"Get any returns?" "Yes, he just sent me a package of Confederate notes."
