Items of Interest Dished Up for the Delectation of "Watchman" Readers by a Corps of Gifted Correspondents.

PLEASANT GAP.

John Herman and wife, of Philadelphia, were over Sunday visitors with their parents.

The work at the Rockview peniten-tiary is improving right along. Quite a number of new men are being taken on and the work is advancing in a very satisfactory manner.

Mrs. Crumlish and son Billy returned home on Saturday evening, after an absence in Pittsburgh for over three weeks. They were called funny section craze; I am thinking of to Pittsburgh on account of sickness. cutting it out and greatly improving

I would have ye Editor understand that I want no dandelion in mine. Dandelion may be all right for some people, but it is too slow in procuring the desired result for your humble servant.

W. H. Noll Jr. and wife returned home a few days ago from a three days' visit in Philadelphia. They enjoyed their trip very much, which was only natural, as nearly one-half of their family now reside in the Quaker city.

The lawn fete held at the Bent Bell home on Friday evening proved a de-cided success both socially and financially. Mrs. Lide Bell, teacher of a Sunday school class, and her pupils are being complimented for the way they handled the proposition.

Ammon Kerstetter and family made a grand swing around on Sunday last. They motored to Reedsville, thence to Petersburg and back home by way of Pine Grove Mills and State College. They report the roads in excellent condition and enjoyed their jaunt immensely.

The roof of Lee Sampsel's residence caught fire on Saturday. Our fire company responded very promptly, but upon arriving at the scene of the conflagration discovered that a bucket brigade had succeeded in extinguishing the blaze. The damage was slight, only a small hole burned in the roof.

Some young men have a variety of poetical and classical quotations on hand which they try to work in at every opportunity. A quotation is a good thing in conversation when it fits in neatly, but very ugly when there is no place for it, and it has to be passed on; like a patent medicine sticker on a clean window pane.

I was just meditating over an old saying of our Pennsylvania Dutch saying of our Pennsylvania Dutch farmers, as follows: "Ein keiler April und May brings feil froucht und hay." A cold April and May brings much grain and hay. If there is any virtue in this old saying we should have an abundant harvest. However, time alone will tell; we must await the out-

Rev. John Reish and Dr. Peter Wykoff, of Loganton, motored up the valley and spent the week-end with old friends and relatives at Rock Springs.

Mrs. Mary Markle, of State College, was called to her sister's home, near Pittsburgh, this week, owing to

Mrs. Jennie Sylvis has been visit-ing friends in Spring Mills since Fri-Howard for a two week's visit at her parental home, timing her visit so as to be present at the Memorial day exercises at Howard.

Mrs. W. H. Phillips was called to Freeburg by the death of a cousin, Mr. and Mrs. Charles Thomas, of New Castle, motored in from the western part of the State on Saturday Sunday evening. Mrs. John Mohr Otto is at present entertaining her cousin, Mrs. Haupt, of Philadelphia. and visited Centre county friends over Clearfield, are at present visiting among friends in this place.

Col. D. W. Miller has recovered sufficiently from his two months' illness eral of her sister-in-law, Mrs. Gust Rhue, in Altoona, last Wednesday. to go to his summer home at old Monroe Furnace and make an attempt to get his share of the speckled beauties. visited over the week-end with his parents, Mr. and Mrs. W. H. Watson. Samuel E. Goss, who has grown to be one of the substantial business men of Reading, spent several days last week with his mother, Mrs. W. H. Merl Poorman, at State College, on Goss, as well as other relatives in the valley.

The Stork left a young daughter at the home of Mr. and Mrs. Newton Lauck, last Thursday. Mother and Mr. and Mrs. Joe Gilliland, of Rock child are getting along nicely. ous condition.

are visiting her parents, Mr. and Mrs. Barber, in Mifflinburg. John F. Saucerman has returned Mrs. Calvin Gilbert is housed up from Williamsport following a two with quinsy at this writing. During the past year they have had quite a bit of sickness in the family and their weeks' treatment for rheumatism by a specialist in that city, and is now with his family at Rock Springs confriends hope this will be the end of siderably improved.

In city streets, on country highways, in farm structures and industrial plants, small and large, concrete is being more and more used. Why?

First because it meets the modern necessity for economy. Atlas is cheaper today than thirty years ago. And second because man's work must be safeguarded.

Structures built with Atlas protect both the worker and his product, for they are permanent and firesafe. Tell your building material dealer about your building plans and ask him about materials. He can be of real help.

Sunday.

Apples, as we know them today, in ancient times grew wild in parts of Europe and Asia, and their cultivation began in Europe centuries ago, but it remained for Americans to make the greatest progress in this direction. One of the first of these benefac-

tors was Loammi Baldwin. While prominent in his capacity as an engineer, he would long since have been forgotten except for his horticultural experiments, which resulted in the production of the famous apple which bears his name.

The United States now produces the bulk of the world's apple crop and Canada adds to North American su-premacy. The European belt extends from Norway to southern France. The fruit is also cultivated in New Variant Terreric and atter course Zealand, Tasmania and other countries.—Detroit News.

Mr. and Mrs. Simon Hockenbury, Mr. and Mrs. William Jodon and Mrs. Eliza Jodon, of Bellefonte, spent Sun-day afternoon with Mrs. Sallie Friel. him in the sign language," replied Link Lagg of Slippery Slap. Dale home on the Branch where they were \$4.200. entertained at dinner. While here they called on uncle David Houser, who is in feeble health with throat trouble. As they were starting home Mr. Miller ditched his car by the side of the road, but Hugh C. Dale hauled the machine onto solid ground and they proceeded on their way.

some of the family being ill and in a hospital. Miss Irene Pletcher has gone to

management of the farm, he will have little to do with the turning of the soil, as his lumbering interests require to the barn floor, a drop of about ten is being improved in many details. As a matter of history, of the vast called who made a thorough examina-

As a matter of history, of the vast amount of children born, fully one-half die before they reach the age of five years. It is mere mockery of creative wisdom to suppose for a moment that this enormous fatality is una-voidable. The smallest injury, quite unforseen, will in numerous cases prove fatal in a very brief space of time. There is a much greater chance of prolonging the lives of these innocents when proper care is taken than is imperative that all mothers of a family should studiously educate themselves on this important point, which affects the health and longevity of their offspring.

There is no fixed standard of physical perfection; each nationality or each individual, for that matter, being at perfect liberty to establish standards. What if the face does lose its color, the eyes grow dull and wear a dark circle, the expression become pinched, the head aches, limbs and feet swell, the hands become clammy, the tongue coated, the temper soured and the whole woman out of sorts? It is the fashion to have a waist less than twenty-five inches, and they think they may as well be dead as to be out of fashion. The woman whom

Mr. and Mrs. Irvin Stover, of Yea-gertown, attended services in the Re-formed church on Sunday and spent remainder of the day visiting friends

The town schools closed a successful term last week; the High school with commencement exercises and a reception at the tavern and the grammar and eighth grade with a picnic, on Saturday.

Power of a Thunderstorm.

When a great storm is raging, with flashes of lightning illuminating the sky and thunder crashes deafening our ears, we realize something of the stupendous power of electricity. If a cat's back is rubbed in the dark

during hot, dry weather, sparks will often fly from it. They are perfectly harmless, though they are identical with lightning flashes, and the cracking that accompanies them is thunder on a small scale.

In a thunderstorm the earth represents your hand and the clouds are the cat's back. The pressure that causes a flash of lightning may be as much as 1,000,000,000 volts—that is, 5,000,000 times greater than that which is used for household lighting. Could we collect and harness the ower set free by a single flash of lightning, we should have at our disposal a force greater than anything

that can be produced by man. In a famous scientist's laboratory the experiment was tried of producing a million-volt spark. It leapt a ten-foot gap with a noise like the explosion of a bomb and came near to wrecking the entire building. This is the highest pressure that has so far

Saturday until Monday. A convention of the ninth district Sunday school will be held in the Lutheran church on Saturday at 2 and 7:30 p. m. Box lunch between ses-its nath is destroyed.

Worth Revamping.

He-You refuse my proposal. Is this absolutely final? She—Yes, indeed. Shall I return

your letters?

Please do; there is some very good material in them I can use again.-Yale Record.

The main feature was the debate, "Resolved, That foreign immigration should be abolished." After a very decided in favor of the negative.
