PLEASANT GAP.

Earl Leggo, of Pleasant Gap, has been subpoenaed as a witness in the Musser murder trial.

Frank Barnes and wife motored to Lock Haven on Saturday last, to take in the K. K. K. demonstration.

Our farmers are complaining. They allege that owing to the frequent rain falls they are unable to raise their early potatoes.

One of the inestimable benefits of being married is that one thereby may be informed of his shortcomings with affectionate frankness.

Some women miss happiness by reason of conditions which make joy impossible; but for most women it is both possible and natural.

M. P. Musser left for Pittsboro, on Wednesday of last week, to visit his son Abner and family. He will return the latter part of this week.

Prof. Baird, principal of our High school, has moved his family to Pleasant Gap. Our boys and girls like him very much and admire his courage and force of will.

Mr. and Mrs. Lawrence Hile motored to Millmont, on Saturday, returning home on Monday. They report having had a most cordial visit among old-time friends.

Americans laugh oftener and more heartily than the people of any other nation; they have a wit and humor distinctively their own, but there are none so quick to see and appreciate the fun of other nationalities.

A car load of anthracite coal was delivered to the consumers at the Gap the early part of this week. Prices have slightly declined. However, there is plenty of room for further decline, owing to the vast over-production at the mines.

The High school ball team of Milesburg played our High school club on Friday afternoon, the score being 14 to 9 in favor of Milesburg. Our boys organized recently and will no doubt show Milesburg where to get off at their next meeting.

I know a woman in Pleasant Gap who is devoid of sufficient brains to know that pockets put in a shroud would be regarded as a nuisance by the most intelligent residents of our good, quiet, orderly community. Being of a very modest disposition I will avoid being personal.

It is somewhat annoying when we are obliged to pay \$2.50 or \$3.00 for marketable peaches, when your neighbor, who has just returned from a little motoring trip into the country brings home the same quality of fruit and assures you he paid fifty cents a bushel. The automobile, on numerous occasions is a money saving commodity.

The trustees of the western penitentiary last week decided to ask for \$1,000,000 for maintenance and \$2,000,000 for construction work for Rockview for 1926-'27. This is gratifying news and will have a tendency to eliminate the hand-to-mouth way of procedure as heretofore. Money judiciously spent on construction work at Rockview at this time would prove a blessing.

Mr. and Mrs. Raymond Melroy are enjoying a trip through the New England States. They started in at the "Pool of Nymphs," Watkins Glen, N. Y., from which place they proceeded to Bennington, Vermont. There they visited the highest battle monument in the world, over 307 feet in height. This monument commemorates the decisive victory over the British, August 16, 1777. The monument was erected in 1886-9 at a cost of \$115,000, and is very attractive. From Bennington they will continue an extensive tour, embracing most of the New England States. Their pilgrimage is indefinite in character, but will come to a close before the animated fall election takes place.

We are about to have another new industry here. Mr. Roy Bell and Geo. Showers will branch out their chicken industry on a much larger scale. Their farm will be known as the Pleasant Gap Poultry Farm, and the firm will be Bell and Showers. They did quite a nice little business in a quiet way

the past season but expect to embark on a much larger scale beginning near the close of the year. They now have a capacity of producing 2400 chicks weekly but expect to triple their capacity by December 1st. Their specialty is to raise pure-bred stock only, consisting of Barred Rocks, Rhode Island Reds and Tom Barron English strain white Leghorns. Later on others will be added. If hard work and an abundance of ambition count for anything the success of the new firm will be assured.

True politeness is one of the best traits we can possess. It is one of the noblest characteristics that one can conscientiously practice, and it is not born in us, but can be easily acquired. It goes a long way in smoothing over the rough edges of life and has been the means of enabling many a young man to rise in the world who otherwise might have remained in the lower strata. It is not necessary to fawn upon the rich and the great and influential, for a man should at all times preserve a proud independence; but if one is considerate of others he will find, often to his surprise, that these kindnesses bear unexpected fruit. A man need not go through the world shoving all others aside and trampling the weak under foot; at the same time he should not permit himself to be imposed upon. The women, particularly, to whom the social atmosphere is life itself, the few bits of caution, advice, warning and general information given will not come amiss, although we do not wish to intimate that the majority of ladies are unfamiliar with the rules and regulations of society, for they are not. Ladies are adepts in conforming to the slightest, and, to the average observer, the most insignificant forms laid down by the autocrats of society, but it sometimes comes to pass that they need recourse to the letter of the dictum and cannot trust to what they think is the proper thing to be done in the circumstances and under the conditions then prevailing.

Liquid Light to be Next.

The simple electric light switch by means of which a room can be flooded with brilliant light, or even a whole town illuminated in a moment, was a tremendous step in advance, but we are now promised a light which never goes out. There is nothing to pay, except the original cost of buying, say, half a pint of liquid light.

This liquid light is poured into a bulb, and the resultant light is said to be superior to electric or any other known light, except nature's own brand of daylight. This light, being, in fact, radio-active, will remain good for seven years or more, when the bulb may require refilling.

It is claimed, also, that this liquid will eventually make coal oil power a thing of the past. If that is the case, the real abolition of smoke seems to

be in sight, for, although electric as long as fuel is necessary for its power is smokeless, there will be smoke generation.

Must Comply with Law in Sale of Cider Vinegar.

It is not difficult for farmers to comply with the Pennsylvania law regarding the sale of cider vinegar, providing the vinegar has been made from apple juice and contains no added water, drugs or acid.

A farmer is required under the law to label all containers with his name and address. This may be done on any farm with a set stencils, or a card. When these requirements are fulfilled, the vinegar may be sold to the wholesale and retail trade in the State, without inspection or permit of any kind.

MEDICAL.

Work Wearing You Out?

Bellefonte Folks Find a Bad Back a Heavy Handicap.

Is your work wearing you out? Are you tortured with throbbing backache—feel tired, weak and discouraged? Then look to your kidneys! Many occupations tend to weaken the kidneys. Constant backache, headaches, dizziness and rheumatic pains are the result. You suffer annoying bladder irregularities; feel nervous, irritable and worn out. Don't wait! Use Doan's Pills—a stimulant diuretic to the kidneys. Workers everywhere recommend Doan's. Here's a Bellefonte case:

Mrs. Howard Shuey, S. Water St., says: "My back ached so I couldn't get a night's rest. My work tired me out and I often had to neglect it. I was hardly ever free from headaches and dizzy spells and my kidneys didn't act right, either. Doan's Pills from the Parrish drug store stopped the backaches and other signs of kidney trouble."

Vested Interests

Certain political orators tell us that the people of the United States are the prey of men who enjoy special privileges.

They shout loudly about Robber Barons, and Predatory Wealth, and Vested Interest and Wall Street.

These terms mean nothing without a bill of particulars.

Let us have some names. Who are the offenders?

Which of the 30,000 independent banks; or the 15,000 great corporations all fiercely competing for business.

Which of the 2500 railroad systems, or the 4000 public utility companies, or the millions of men engaged in trade and agriculture? Which of the labor unions oppress us?

Does Mr. Ford who last year made one hundred millions? Twenty years ago he was poor.

Does not this spell opportunity rather than privilege?

In the vast business of the country there are many things needing correction. But we are all working together under the same laws, all members of a great business army, mutually dependent, so closely interwoven as to form one great industrial fabric. Wrong doing is the exception rather than the rule.

Yet there is a favored class! It is composed of those who, by Intelligence and Industry, by Thrift and Self Denial have saved some money. The Twenty million depositors in our savings banks are members.

You can join.
