Questions Announced for Pennsylvania Farm Census.

Recognizing the need of more complete information pertaining to the agriculture of the State the 1921 Legislature passed an act requiring the assessors, when making the triennial assessment, to gather such data relating to the acreage of the principal farm crops, the number of livestock, and other facts pertaining to the agricultural resources of the State as the Secretary of Agriculture might require. The act becomes operative this year. The department already has the questions made up in convenient book form and ready to be distributed to the assessors by the county commissioners. The questions are as follows:

Secretary Willett, in commenting upon the subject, says that he hopes to receive the support of the county commissioners, assessors and farmers in making this census complete, since the facts brought out are greatly needed and will be of material benefit to them, and particularly:

To the county commissioners in making provisions for the needs of agriculture in their counties, based upon the information compiled by the townships.

To the county agricultural association in measuring the progress and changes on farms and in planning their work for the best development of the agricultural communities.

To the Pennsylvania Department of Agriculture for compiling agricultural statistics for the State, of basic importance on forming the State's agricultural policy.

To The Pennsylvania State College for its teaching, research, and extension work in the field of agriculture.

To the U. S. Department of Agriculture, in checking and supplementing census figures insofar as Pennsylvania agriculture affects national agricultural statistics and developments.

To the farmer most of all, by enabling these different agencies and various farm organizations to serve him more effectively through knowledge of these essentials of farm facts.

The information is to be treated as confidential. The filled out blanks will be returned to the Secretary of Agriculture and will have no connection with any taxation measures. Similar laws are now in operation in seventeen other agricultural States.

Get at the Cause!

Many Bellefonte Folks Are Showing How to Avoid Needless Suffering.

There's nothing more annoying than kidney weakness or inability to properly control the kidney secretions. Night and day alike, the sufferer is tormented and what with the burning and scalding, the attendant backache, headache and dizziness, life is indeed a burden. Doan's Pills—a stimulant diuretic to the kidneys—have brought peace and comfort to many Bellefonte people. Profit by this Bellefonte resident's experience:

Mrs. Mahala Kreps, Phoenix Ave., says: "My kidneys were in wretched condition and I suffered a lot with dull, nagging backaches. At night the pains were so severe I couldn't rest. My kidneys acted too often and I had dizzy spells and headaches. Doan's Pills helped me from the first and four boxes cured me. I have had no return of the trouble."

1925 Licenses Not Good Until Jan. 1.

Harrisburg.—Warning has been served by the State Highway Department that 1925 automobile license tags, although being delivered and mailed to applicants at this time, are illegal until January 1, 1925. An automobile bearing only a 1925 license tag at this time is violating the law to the same extent as an automobile bearing no license tag at all.

Motor patrolmen have reported the presence of 1925 tags on the road and a car bearing next year's tag was seen parked in front of the Automobile Division building.

The Department also announces that at the close of business on September 24th, the Automobile Division had issued 46,000 sets of passenger vehicle license tags for 1925.
