Get at the Cause!

Many Bellefonte Folks are Showing How to Avoid Needless Suffering.

There's nothing more annoying than kidney weakness or inability to properly control the kidney secretions. Night and day alike, the sufferer is tormented and what with the burning and scalding, the attendant backache, headache and dizziness, life is indeed a burden. Doan's Pills—a stimulant diuretic to the kidneys—have brought peace and comfort to many Bellefonte people. Profit by this Bellefonte resident's experience.

Mrs. Mahala Kreps, Phoenix Ave., says: "My kidneys were in wretched condition and I suffered a lot with dull, nagging backaches. At night the pains were so severe I couldn't rest. My kidneys acted too often and I had dizzy spells and headaches. Doan's Pills helped me from the first and four boxes cured me. I have had no return of the trouble."

Training for Telephone Service—

In the Commercial School, men and women, too—are trained in business office practices. A beginners' course of three weeks is followed by several advanced courses which are open after practical experience in business office work. The fundamental of these courses is courtesy to subscribers and fellow-workers.

In the Plant School are poles, houses, wires, cable and all of the other practical things which the embryo telephone repairman or installer will meet in his daily work. "Graduate" courses in advanced work are offered also.

The only place to become a practical telephone worker is in the telephone business. The Operators' School combines several weeks' classroom instruction with actual experience at a practice switchboard.

No service performed for you in a day's work by any member of your office or shop force is more vital or more personal than that performed by those who maintain your telephone line and handle your calls.

You surround yourself with trained people from whom you expect the highest efficiency. It is just as essential that your telephone equipment, ninety-eight per cent of which is along or beneath the streets and at the central offices, shall be effectively manned.

The telephone organization in Pennsylvania comprises a skilled force of 23,000 men and women. A very large percentage are technicians, in the literal sense.

Even the simplest telephone work requires a trained eye and experienced hand. Almost every man and woman who enters this service must first spend several weeks, or even months, in a training department.

Our telephone school system, not only for beginners, but for those pursuing advanced studies, matches the biggest university in the state in enrollments during a twelve-month period.

It is a side of the business to which increasing attention is given each year. It is one of the real foundations of good service today and better service tomorrow.
