The cares of business, the rage of passion, the fury of politics, the restlessness of ambition, the thirst of gold, the struggles of competition overtax the physical, intellectual and moral constitution, causing depressing influences and an enfeebled state of reaction, and fast wear out human life.

A very curious incident overtook me a few days ago. While rummaging through one of my pantries, I found a bottle containing a small drink of spirits from a friend.

It happened to be a little balance of the pure, old-time rye sent me some three years ago by a friend at Pittsburgh. How to dispose of it to the best possible advantage was a query to me. I hesitated a moment, thinking of the poor fellow at Whitecroft, who was pulled in a week ago by our noble, industrious state constables, on finding a quart of moonshine in his possession, and was marveled for one year for violating the law.

To say the least, I was somewhat agitated, more particularly since I am a temperate man. To make a long story short and to avoid trouble I speedily drank the vile stuff, and now defy the entire force of state constabulary. "An open confession is good for the soul," I advise all to cut it out.

Prof. Harry E. Breon closed his school term on Friday last, and now expects to devote some time to the development of his prospective coal mines. He has had a number of coal specialists prospecting and all declare that it will only be a short time until his ambitions will be rewarded.

And the people of Pleasant Gap and vicinity will not be blighted to go outside of the county for their coal supplies. A very phenomenal incident occurred on Saturday last, when he picked up a piece of slate four by five inches in size and examining the same found grown into the slate the initials "H. E."

The writer saw the specimen and is satisfied that it was not the work of human hands, as the same grew naturally into the slate. The curious observers now predict that the incident is a good omen and that Harry will soon be able to supply his friends with a bounteous supply of genuine coal. It is to be hoped that these predictions will be verified at an early date.

That's the ugliest portrait I've ever seen, he cried, striving vainly for a better view of the abomination.

Try the next one, then, advised his wife. You are looking at yourself in a mirror now.

Mr. Confer was the recipient of some very useful presents. Refreshments, consisting of candy, cake and ice cream were plentiful and after spending the hours pleasantly the party left for their different homes feeling that the evening had been pleasantly spent and wishing Mr. Confer many more years of happiness and prosperity in our midst.

The writer, while crossing the Brush mountain north of Rebersburg, some time ago, was deeply impressed with the beautiful valley which God has given us to live and spend our years in.

When we looked from the high point of the mountain we could not refrain from saying to ourselves "how beautiful," and how much more beautiful and pleasant would it be if every one inhabiting it would do what is right and pleasing in the sight of Him who formed the earth and pronounced it good. Some time ago we were criticized by a certain man in this valley in respect to writing certain items, which to him appeared as though they were meant to stir up strife and contention. This man did not catch the true meaning of our thoughts and to such criticism we must say that the facts were stated so that the reader might examine and see that we were living far from perfection and far from the principles that God had intended should be lived up to. If we want to utter our personal feelings we must say that it is a shame the way we are living in these days. Instead of harmony and content among the people of today there seems to exist, as never before, a spirit of contention and animosity which works out bitterness and strife in such measure that it has taken, we are sorry to say, some of the church folk and has made them enemies instead of model folks of the world. In other words, it is not the light as spoken in the scriptures.

What we need today (and God speed the day) when we may call each other brothers in the real spirit, so that when we meet we will greet each other with a smile instead of a frown; when, instead of hindering another's welfare we will seek to encourage and lift up and so fulfill the law of Christ. Do we want to live on until remorse shall fill our bosom at the final ending of the way, when we shall see our mistakes as we wish we had then now, and when we wish we had lived a better and sweeter life while we had the opportunity. Have you ever heard of a person nearing the end of life's journey sending for such with whom through life there had been that spirit of jealousy, etc., in order that restitution be made before passing into the great beyond? Do we want that experience? Do we think that that will be a pleasant experience if such should come to us? Would it not be better far to spend our years as we might wish we had spent them when we come to lay down our earthly task. If we do not want this experience, then it will be well for us to cultivate the spirit of kindness and neighborly affection that should characterize our lives and evade the remorse that is sure to come otherwise. Dear reader, consider that the past is past and that we are living in the present and are responsible for the present. It is ours to bury the past and live the best we can. Shall we, or shall we not do this?

A coat of paint is as much the exterior mark of prosperity and good taste, as a new suit of clothes. It is an open sesame to the good opinion of your community.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definitions listed below the puzzle. Thus No. 1 under the column headed "Horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under the "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Two New Postage Stamps Issued.

Two more postage stamps will be added to those used by the Postoffice Department. They were made necessary by the recent Act of Congress raising rates in order to raise the pay of certain postoffice employees.

One of these stamps is a special delivery stamp of the denomination of fifteen cents for use on parcels subject to increased rates. It is of the same size and design as the present ten cent special delivery stamp but the color will be orange.

The other stamp will be a twenty-five cent special handling stamp. It too, will be of the same size and shape as the special delivery stamp but the design is different and its color will be dark green.
