Rev. Stahl, of the United Brethren church, had charge of the funeral services which were held at 10:30 o'clock on Monday morning, burial being made in the Houserville cemetery.

GRIEST .- T. Elwood Griest, for many years a well known resident of Unionville, passed away at noon last Saturday, at New Smyrna, Fla., where he had been making his home for several years, as the result of chronic gastritis.

He was a son of Gideon and Martha Griest and was born at Mechanicsville, Adams county, seventy-six years ago. As a young man he came to Centre county and located at Unionville where in due course of time he became engaged in the mercantile business and for many years his store was the leading one in that thriving little village. Some years ago he sold out to the Stere brothers and when his health became impaired went to Florida to make his home.

On April 21st, 1875, he married Miss Martha C. Russell who survives with one daughter, Mrs. Robert Lovering Mudgett, of Coronado Beach,

A Suggestion to Creditors of the Centre County Bank.

On Monday, May 25th, nearly three weeks ago, the Supreme court of the United States handed down its opinion in the Centre County bank case. The effect of the ruling, so far as hope to depositors of getting any of their funds was concerned, was to place them in almost the same position in which they found themselves when the institution closed its doors May 13, 1922.

We are not advised as to what steps are to be taken now. The committee selected by the creditors to represent them has not met, so that it seems reasonable to infer that there are no definite plans of procedure at the moment.

To us the most striking phase of the misfortune that befell when the Centre County bank closed has been the utter dearth of constructive suggestion, either during the three years preceding the ruling or during the three weeks that have elapsed since it was handed down. It seems that some thought, some plan, might have been offered that would point the way to a more satisfactory settlement of the whole affair than interminable, needless and costly litigation. We believe such a plan could and would have been forthcoming had not the peculiar involvement of the situation deterred several whose interests were wholly impersonal and solely for the creditors. However, this is all water that has run past the mill. It is not what might have been that should interest the creditors of the Centre County bank now. It is what can be.

Their real interest lies not in recriminations for what has been done, but in constructive thought of what yet is best to do. The time has come for them to view their situation free from any other than their own personal interests and unbiased and uninfluenced by the interested and timorous motives of others.

The quicker the creditors accept the fact that they must take a loss the quicker they will be in a frame of mind to weigh the advantage of not permitting that loss to become greater and to consider possible means of recouping part or all of it. Because it seems to us that they should be in that mental attitude today-after three years of fruitless litigation—we want to offer a suggestion. Asking only that it be considered by them as wholly one for their benefit and, at least, worth a bit of unbiased thought. It will be criticized, of course. It will be laughed at by some. Others will say it can't be done and still others, from under cover, will douse it with cold water. Each group of doubters will have a motive and the motive is certainly not to the best interest of the creditors of the Centre County bank.

The Centre County bank always was a useful institution in Bellefonte. It is doing it scarcely full justice to say that it did as much for the industry and business of the town as any other financial institution in it. Why not revive it? The creditors, themselves, can reopen its doors, make it their depository, their trustee and in a very few years put it well on the way of paying back to them every cent of the loss that now is certain.

Of course there are those who will advise that it can't be done. They represent two types: One, that doesn't want it to be done and another without enough constructive energy to undertake it.

We have before us the plans which George H. Earle Jr., used when he revived the Real Estate Trust Co., of Philadelphia. When it failed creditors were offered five cents on the dollar for their deposits. Mr. Earle stepped into the breach, pointed a way out and the creditors reorganized the bank with his aid. We happened, later, to be made executor of one of them who had joined in the reorganization plan so that we know that in seventeen years he not only recouped all of his losses, but made a handsome profit beside.

The story of the Real Estate Trust Co., is not an exceptional one. Many other banks in Pennsylvania have failed since then, re-opened their doors and made good to those who stuck to them.

The recuperative power of a banking institution is amazing. Of course all of the creditors of the Centre County bank wouldn't and couldn't go into it, but think of what an institution several hundred of them could make if they set themselves to the work of working a bit for themselves by restoration of good will to the institution.

Why should not the Centre County bank be re-opened by its creditors? They could do it without liability for a cent more than they have in it at present. Or if they don't want to re-open it themselves it is not beyond the range of possibility that others would do it for them, give them the opportunity of going in or letting it alone and also of becoming their trustee to work out the assets of the old institution to the best advantage of all of them and at the least possible cost.

We have made this suggestion merely with the hope that it may crystalize thought on some plan that will get the creditors somewhere, give them an opportunity to get in control of their funds as soon as by any other method they may employ, and offer them the hope of recouping the losses they are certain to bear unless they determine to work for themselves.
