Lake Worth, Fla., 2-27-26.

Dear Friend Watchman: Just a few lines, this beautiful day, to remind you and my other friends in good, old Bellefonte that I have not forgotten any of you. Just to think, on Feb. 22, I celebrated my first anniversary of residence in this land of sunshine, flowers and land boomers. It scarcely seems a year since I came here, started south to look over the Peninsula for a few days and then leave, but the further I went the more tion at Harrisburg. 1879 to 1880, supimpressed I became that the frenzied development was not all of a mush room nature. With thousands and thousands of northerners getting the fall and winter habit there is assurance of stability and prosperity here for years to come. Besides, agricul- Elmira, Cortland and Northern railture, industrial and other activities road. 1890 to May, 1893, with the that are going ahead by leaps and

bounds, add to this assurance. It is all epitomized in a mental picture of rushing crowds, busy business establishments, crowded trains, busses and private cars; an ever changing panorama, that will stay in my mind for ever.

Someone remarked to me that Florida "is a fever." In so far as hundreds of thousands of outsiders are concerned I think this is true, especially in the sense that it gets hold on one's imagination and is hard to shake off. Having been knee deep in it for more than a year I know I shall pine for it after I have departed. The magnolias, the oaks, the sweet gum, the tall stark pines, the Spanish moss and the varied and apparently never end-

ing flowers grow on you wonderfully. So far as I have been able to learn Florida is being very fair. It is not seeking or encouraging any industries that will not, from an economic standpoint, have reasonable expecta-tions of successful operation. She wants only such as can utilize the natural products of the State and industries as would give

promise of success in this climate. Naturally I don't want to leave the impression that all is "beer and skit-tles" here, for it is not. But, within reasonable ranges Florida offers the wayfarer much of delight and considerable opportunity. Right now she is basking in a prosperity such as no other State has known. The edge is bound to wear off this, but even when that time comes there will be a sound and hopeful foundation under it all.

Already I find things becoming more normal, not nearly the feverish confusion that greeted me on my arrival here a year ago and those who have come to stay are doing their part in bringing order out of the chaos. My little contribution has been by way of helping to get the post-office to func-tion satisfactorily. You will recall that in my last letter I referred to the awful congestion of mails. Well this year we handled the Christmas rush with little if any delay and that was

some accomplishment. As a place to live Lake Worth is one of the very finest in the State and in conclusion I can only add that Florida "Pines for you."

Yours, C. C. KEICHLINE.

Philadelphia Negro Electrocuted.

Thomas Legins, negro, of Philadelphia, was electrocuted at the Rockview penitentiary on Monday morning for the murder of his wife, Corrine Scott Legins, in March, 1924. Prior to going to the chair Legins confessed to his spiritual advisor, Rev. Lacosta Harewood, a negro minister of Philadelphia, that he had killed his wife because she had refused to live with him. He shot her three times. Legins was twenty-eight years old and was born in Georgia. He assigned as a reason for his crime his home influence as a boy. His father, he said. was a drinking man, and when under the influence of liquor made free use of his gun, and he inherited this trait. Legins' body was claimed and shipped to Philadelphia for burial.

In its early years it gathered, cared for and settled more than 100,000 children.
