

PLEASANT GAP.

M. M. Keller and family spent Sunday at Oak Hall.

Mrs. Fred Roush, of Altoona, spent the week-end here.

Dale Brooks came home from the hospital on Monday.

Miss Lois Rishel was home from New York last week.

There are quite a number of cases of grip in this locality.

Jack Mulfinger, of Spring Mills, was a visitor here last week.

John Wilson, of Osceola Mills, spent Sunday at the Millward home.

Mr. and Mrs. Fred Clements spent Friday shopping in Lock Haven.

Mr. and Mrs. Earl Weaver are rejoicing over the arrival of a young son.

A family from State College is expected to move into the Collins Baumgardner house the coming week.

Miss Jean Noll, who has been nursing Mrs. Blaine Mabus and son Dick, at Bellefonte, is home with a sore throat.

Seven ladies of our town were initiated into the P. O. S. of A. by the degree team of Bellefonte. The order is in a thriving condition.

From personal observations I feel positive that Senator Pepper will have a walkover in Centre county at the primaries, with Vard second and Giff an insignificant third.

George Showers and Bent Bell, of the Pleasant Gap poultry farm, are unable to supply the demand for their chicks and have already decided to double their capacity next season.

Miss Grace Confer, our newly-appointed postmistress, is getting along extremely well. She is courteous and accommodating, and her services are highly appreciated by the patrons of the office.

Raymond Melroy has opened an ice cream parlor in the rooms in the hotel recently vacated by Supt. Ray Noll. He is sure to make a success, since he is an all-around good fellow, the kind intended to make a success in all undertakings. The business is flourishing.

The importance of good nursing has never been properly appreciated, otherwise more books would have been written on the subject. Good nursing is just as important as the science of medicine. A great many people are apt to criticize the charges of a professional nurse, but I don't agree with them. The nurse, like the doctor, is expected to respond to any and every call, even if it takes her in contact with loathsome and contagious diseases. Because of this fact, and also for the reason that she is compelled to spend several years in training at nominal wages, she is worth in the sick room every cent she demands. Nursing the sick is a trying job and those who do it are worthy of their hire.

Ten Million Forest Trees to be Shipped This Spring.

Secretary Stuart announced recently that ten million forest trees will be shipped this spring from the nurseries operated by the State Department of Forests and Waters.

From the Mont Alto Nursery in Franklin county there will be shipped 3,700,000 trees. The Clearfield nursery comes second with 3,500,000 trees, and the Greenwood nursery in Huntingdon county will contribute 1,200,000 trees.

In spite of the late spring, more than 400,000 trees have been shipped already.

The demand for forest trees has been so great for this spring that the entire nursery supply, except a few short-leaf pine, were allotted months ago. Several hundred forest land owners, who were disappointed in not getting trees this year, have already filed their applications for trees for the spring of 1927.

Forest tree planting will be featured this spring in every county of the State. The 10,000,000 trees that will be planted will bring back to production more than 9,000 acres of land. In 50 years, when many of these trees will be large enough to cut, they will produce more than 300,000,000 board feet of lumber urgently needed by the people and industries of the State.

Road Hogs Not Popular With Average Motorist.

If motorists would learn the rules of the road, always bearing in mind to share the road with other users of the highway and "keeping to the right," there would be fewer accidents. Hogging the road is the cause of many accidents, particularly at turns.

Carelessness is particularly noticeable at turns. It is no easy matter to turn corners at speed prescribed by law, and novices should practice traveling at low speed just before reaching corners and before making the turn at a speed not more than four miles an hour. Drivers should always signal by waving the hand which way the car is to turn or when it is to come to a stop. In making a turn on a country road, where the motorist cannot see beyond the turn, unusual precaution should be taken. Too many motorists make these turns with their machines far over the middle of the road, thereby endangering the other fellow, who frequently is doing the same thing on the opposite side of the turn. It is well to remember that half of the road is yours and the other half belongs to the other motorist.

Beware of Fake Seed Salesmen This Spring.

This is a timely warning issued by the Pennsylvania Department of Agriculture. Reports have been received by the Department from other States in which the so-called Zenith Lawn Accessory Company, a firm making a specialty of selling "Herbae Prati," is operating.

A statement has been received from the United States Department of Agriculture which reads in part as follows: "The Post Office Department has denied the company the use of the mail. Grossly erroneous statements as to the suitability of 'Herbae Prati' for lawns have been made. Its qualities have been proclaimed in such phrases as 'the boss of all grasses;' 'the world's most beautiful blue-grass;' 'a lawn in 30 days anywhere;' 'it will grow where other grasses have failed, in any soil or climate;' 'heat, cold or shade will not affect it.'"

"An analysis of the mixture made by the department seed testing laboratory showed it to be composed mainly of meadow fescue and Italian rye grass. The victims have paid as high as \$1.50 a pound for the mixture, whereas, according to the department, the constituents of the 'Herbae Prati' mixture could have been purchased from reputable seed firms for not more than 18 to 20 cents a pound.

"The postal fraud order has put a stop to the use of mails by the firm, but traveling agents are still active throughout the country selling 'Herbae Prati' by house to house canvass and to local seed handlers."

While the presence of these traveling agents has not yet been reported in Pennsylvania, the public should be constantly on guard, says D. E. M. Gress, the State's well-known botanist and seed specialist.

Our Largest State.

Texas, the largest of the United States, has an area of 262,290 square miles. To the casual reader these figures may seem very little. They show, however, that the Lone Star State is more than fifty-four times as large as the State of Connecticut, as an old Southern statistician tells us.

If it were possible to run a railway train from Connecticut to Texas and back in a day and if the train could take the entire population of the Nutmeg State, as given in the last census, at every trip, and upon its return to Connecticut there should be as many persons in the State as there were before the train left with its cargo, and if each person were placed upon an acre of ground upon his arrival in Texas, the train would be obliged to make 224 trips, or to depopulate Connecticut 224 times, before accomplishing its mission, and then there would remain in Texas nearly half a million of empty acres. The man who hears that he could

not elbow his way around in the crowded Southwest without chafing the nap of his coat sleeves, may gather some solace from the statement that the entire population of the globe, divided into families of five persons each, could be located in Texas, each family with a house on a half-acre lot, and there would still remain many millions of vacant lots.—Exchange.

Electrified Food to Join Artificial Sun in New Rickets Cure.

The use of ultra-violet electric rays upon various foodstuffs may be the next application of electricity to the well being and health of mankind, according to recent experiments covered in a report of the Scottish Board of Health, says the Pennsylvania Public Service Information Committee.

Oranges and other fruits have for years been successfully ripened by the use of ordinary electric light. The report of the Board is based upon further researches along these lines.

It has been found that numerous foods whose use tends to cause rickets can be made definitely anti-rachitic by the application lamp. Milk exposed to the artificial sunlight rays becomes richer in vitamins, and a substance inherent in many foods, cholesterol, is made beneficially active by the electric sunlight.

The essential vitamins in food are largely destroyed by cooking, according to the report, and it seems probable that they can be restored by this use of electricity.

Ultra-violet rays produced by quartz lamps are being used to cure various diseases, notably rickets, and this application is closely tied in with the modern problem of smoke abatement, since these same diseases are both caused and aggravated by a dearth of sunlight containing the beneficent rays.

Taking No Chances.

Cohen, accompanied by his wife, visited the oculist to have his eyes examined.

"Now Mr. Cohen," ordered the oculist, "close your right eye and read this sentence."

The patient read the sentence, whereupon he was asked to close his left eye this time and repeat the performance by reading another line of words.

At this point he hesitated. Removing his wallet, he turned to his wife and transferred it to her with a whisper:

"Here Becky, you'd better hold on to this for a while. You can never tell when he'll want me to close both eyes at the same times."—Everybody's Magazine.

—First Visitor—My dear, these cakes are as hard as stone.

Second Visitor—I know. Didn't

you hear her say when she passed them around, "Take your pick?"

MEDICAL.

Get Rid of That Backache!

Bellefonte People Point the Way. The constant aching of a bad back, The weariness, the tired feeling; Headaches, dizziness, nervousness, Distressing urinary disorders— Are often signs of failing kidneys And too serious to be neglected. Get rid of these troubles!

Use Doan's Pills—a stimulant diuretic to the kidneys. Hosts of people recommend Doan's. This is a Bellefonte case. You can verify it.

Samuel Weaver, S. Water St., says: "My kidneys acted irregularly and I almost got down with backache. Mornings I felt so lame and stiff, I could hardly bend to put on my shoes. After using Doan's Pills, from Runkle's Drug Store, I was benefited in every way." (Statement given April 5, 1922.)

"On July 22, 1925, Mr. Weaver said: "Time hasn't shaken my faith in Doan's Pills. This confirms my statement of 1922."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Pills—the same that Mr. Weaver had. Foster-Milburn Co., Mfrs., Buffalo, N. Y. 71-2

H. E. FENLON

Bell 174-M Temple Court Commercial BELLEFONTE, PA. 66-21

It was on June 25, 1876, at the Centennial Exposition in Philadelphia, that the amazed acclamation of Emperor Don Pedro of Brazil first brought Bell's invention to public notice. Now, fifty years later, two out of every five farms in the United States have telephone service.

The telephone has just passed its fiftieth birthday

This half-century of history has been marked by extraordinary progress. The service has been extended into a Bell System of close to seventeen million telephones. Its facility and dependability have reached a height which to the user seems commonplace by very familiarity.

But a review of these fifty years emphasizes most the necessity for further progress in pace with the requirements of the future.

In Pennsylvania even the most remote towns have their telephone service, and thousands of lines radiate off through the back-country, bringing it into the universal community which this service creates.

But this was so ten years ago; and, yet, since 1916 the number of telephones has almost doubled.

New users and new uses continuously push this growth forward. New developments of equipment and method make possible a constantly increasing usefulness of the service, despite the magnifying complexity of the great switching system which is the mainspring of it all.

The "pioneer" era of telephony was inspired in its overcoming of great obstacles. But each year calls for new and just as essential pioneering in the growing intricacies of so complex a service mechanism.

THE BELL TELEPHONE CO. OF PENNSYLVANIA

ONE POLICY, ONE SYSTEM, UNIVERSAL SERVICE
