Politically the average voter at the Gap is apparently not manifesting much interest in the coming animated contest. In the language of the late President Lincoln, "there are too many horses for the stalls." The voters are becoming disgusted, and there will not be the cutting and slashing that was anticipated. Existing conditions are of a bewildering character, and many of the voters allege they will vote the straight party ticket as heretofore. I suppose in the larger cities there will be some surprises, but in the outlying districts little change from the ordinary is looked for. All in all the longest pole will knock the permissons. Some of the aspirants will be sadly disappointed. I could name some of them, but time will tell.

—In Pennsylvania oat smut caused a loss of more than two bushels per acre last year. Pennsylvania State College specialists say that seed treatment, costing two cents an acre, prevents smut and so actually increases the yield by two bushels an acre.

A Flying Circus for the Altoona Race Meet.

Recent announcements marking the initial board track showing of the new speed way racing motors at Altoona Saturday, June 12th, has given the popular bowl considerable prestige since it forms their start over the grand national circuit.

Determined to set a new attendance record for out-door attractions in the eastern U. S., the Altoona Speedway Association will stage a circus. Additional thousands will be attracted, but not to the tented, old time P. T. Barnum style, elephants, hippo's, camels, curiosities from all parts of the world or such array as all have witnessed.

Instead of a canvas roof, the sky will be the overhead limit, for this event is the modern "Flying Circus" performance, employing high powered airplanes and noted pilots. The Altoona track management will present a trio of performers as a half hour added feature to the race.

Captain Lloyd Yost, U. S. Army pilot of world war days, now a civilian flyer, and a recognized authority on aeronautics, will offer the spectators a program of thrilling stunts.

Captain British Royal Haynes, formerly with the British Royal air forces, and now a crack civilian stunt performer, will team with Captain Yost in presenting the air program. His citations won for activities with 3 1/2 years of war work are numerous, while his name embodied in stories of extra-

ordinary heroism places him among the foremost pilots of England.

The third of the group is known as the "Great Diabola," premier parachute jumper, and a real "Circus" performer. From dizzy heights over the Altoona bowl, he will drop through open space in his sensational goose-flesh producing stunt. These "Three Musketeers" of the air form a most unusual group, and will be the outstanding feature of the race program.

Back Lame and Achy?

The Advice of This Bellefonte Resident Should Help You to Get Well.

Do you suffer nagging backache? Feel dizzy, nervous and depressed? Are the kidneys secretions irregular; breaking your rest?

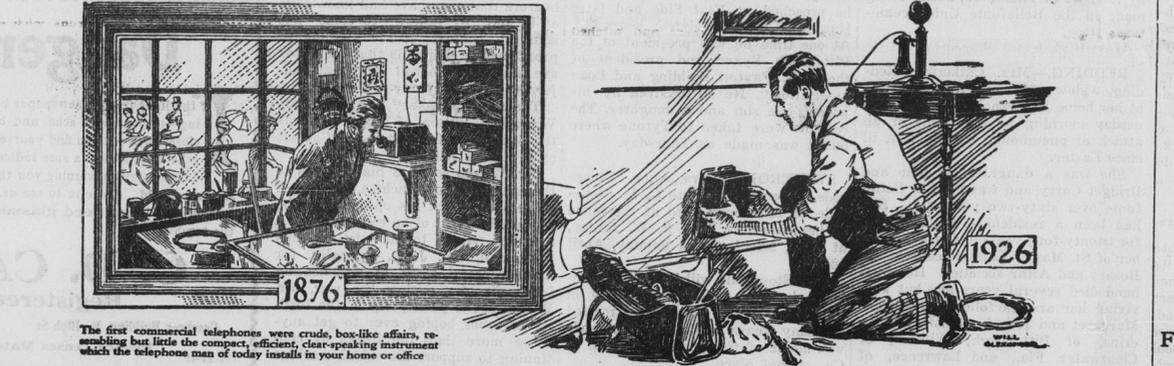

Likely your kidneys are at fault. Weak kidneys give warning. You have backache; rheumatic twinges. You feel weak, tired, all worn-out. Heed the warning. Don't delay!

Use Doan's Pills—a stimulant diuretic to the kidneys.

Your neighbors recommend Doan's Here is a Bellefonte case.

C. E. Hartman, mgr. Weis Store, 118 E. Logan St., says: "Mornings the muscles in my back were lame and drawn. When I stood a long time I had a severe ache across my kidneys. My kidneys were weak, too and I had to get up quite a bit at night to pass the secretions. Any little work tired me and toward the end of the day I was so worn-out, I hardly felt like moving. I used Doan's Pills and three boxes, from the Mott Drug Co., cured me."

THE FIRST TELEPHONES

The first commercial telephone line in Pennsylvania was run between 1111 Chestnut Street and the old Continental Hotel in Philadelphia not long after the Centennial.

Two instruments, a few hundred feet apart, comprised the first Bell telephone service in the state.

Other cities quickly followed suit. By 1900 there were fifty thousand users; by 1905, nearly two hundred thousand; by the end of 1915, five hundred thousand. Today, the operations of this company cover close to a million telephones.

So does the service grow; and so does this constant broadening increase its value to every user.

As to quality of service, our objective is a continuously increasing promptness and dependability—that each year shall show greater facility in its usage, either cross-town or cross-country, and still further diminishing of mechanical and human failure in its operation.

As to further expansion, we neither have nor can have an exact goal, except to match the extension of our service with the public need for it.

Ten years ago it seemed to some that Pennsylvania was "saturated" with telephones. Since then the System has about doubled.
