

Where the Better-Class Photoplays are Sho Each Evening at 6.30 o'clock.

Week of Sept. 27th

Monday and Tuesday

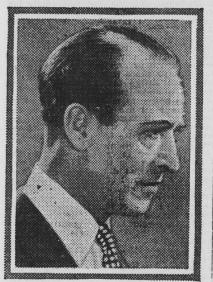

Headed by Anna Q. Nilson, Walter Pedgion and Louise Fazenda.

Pédgion and Louise razenda. Shimmering grown—marble halls and satin walls. She left them for the open road—crooning steel wheels whirling over steel rails at night—lashed to the brake-beams—a lurching couch for a restless woman—a magic carpet of adventure carrying her to—what difference where? just so long as it was away. "Shebo" they called her, "Miss Nobody," but her great-est adventure came when she found that a girl cannot masquerade a woman's heart under man's clothes.

It's a First National Show and the best in town

Also a Mack Sennett "Our Gang" Comedy "One Wild Ride." Usual admission 10 and 25 cents.

Wednesday and Thursday

H. B. WARNER IN

"Silence"

And Verna Reynolds, Raymond Hatton, Rockliffe Fellours, Virginia Pearson and Jack Mulhall. The heart story of a crook who tried

to redeem his past, the fascination of the

Early Peoples Knew of **Possibilities of Iron**

The peoples of the Near East were among the earliest manufacturers of iron, according to Dr. J. Newton Friend in an address before the members of the Royal institution, London. In 1300 B. C. the Hittites were using iron weapons in their numerous wars, and among the treasures of early history preserved to posterity is letter thought to have been addressed to Rameses II of Egypt from the Hittite king, saying that he is sending with the communication ar

iron dagger. The Romans were skilled metallurgists with considerable knowledge of how to handle iron ores. Virgil's Aeneld, written around 40 B. C., contains an account of a smithy in full blast, and Pliny in his "Natural History," which was brought out in 77 A. D., shows an equal familiarity with the working of the metal. An iron ring recently unearthed from a Roman site was evidently made by solder. ing together the ends of a bent strip of iron with some sort of copper alloy. Cast iron, said Doctor Friend, was first known in Sussex in 1350 and soon became fairly common.

Vanishing Heath Hen

Was Farmer's Friend The New England heath hen is now in the last stages of extinction, the Louisville Courier-Journal reports. The farmer has found that he not only has lost a source of food for his table. but a protector of his crops.

Like the western prairie chicken, to which it is closely allied, and the "Bob White" of the Central West, the heath hen is a great enemy of insect pests. But of the thousands that once inhabited field and woods patch, less than 100 are alive today, and these are found only on the island of Martha's Vineyard.

The Middle West lost a prolific food supply when the passenger pigeons died off. But the wild pigeon was otherwise of little economic value. It was largely a grain eater, though beech mast and weed seeds also formed its food.

The heath hen, however, is as valuable as the quail to farmers. Ornithologists and conservationists have pointed this out. Hence efforts are being made to save the bird from extinction and, if possible to bring it back to its former numbers.

Penny Not Worth While

At Times square a matinee crowa waited for the long-distance busses. Other crowds pushed by in a steady stream, yet above the traffic noises came the clink of a dropped coin. Those passing looked down, alert, curious, until a single penny whirled into sight, spun around and then flopped to the sidewalk. No one picked it up. It was tramped on, Many looked, but none stopped until

HURRICANE SWEEPS PATH OF DEATH THROUGH FLORIDA.

Known Dead Over 300, Thousands Injured and Homeless and Property Loss Many Millions.

While there are probably several score of Centre county people in Frorida at the present time, some of them right in the path of the terrific and destructive hurricane which swept over that State from east to west on Saturday, leaving a trail of death in its wake, so far as can be learned all escaped death or injury. At least none of them have yet appeared among the long list of names of the dead and injured so far published. The known dead at the latest compilation stood at 368, with more than

2000 injured and property damage estimated at \$50,000,000. Miami proper had 125 dead and ap-proximately 2,000 injured; Miami su-

burbs, including Coral Gables, Miami Shores, Little River and Hialeah total 45 dead and the injured was numbered into hundreds. Hollywood, with 75 dead and six

hundred injured, presented the most pitiful scene in the storm area as scores of children cry for their parents and an equal number of adults, scantily clad, many in bath-ing suits, searched the wreckage of their homes for traces of loved ones now missing. At Fort Lauderdale there were 13

dead, twenty other persons were probably fatally injured and 503 others less seriously injured were be-ing treated by the Red Cross, hospitals and emergency stations. It was said by Red Cross officials there that about 7,000 persons were dependent upon them.

At Dania there had been found 14 bodies and 140 persons injured. Virtually every home or business building was wrecked. At Davie, five were killed and 40 injured. Reports are that 41 dead have been located at Moorehaven and Clewiston,

across Lake Okeechobee. Because of the inaccessibility of the towns an accurate check was impossible. It was indicated several hundred were injured. Fifty persons were suffering from injuries at Progresso and three at

Pompano. Progresso reported six dead and Pompani one. At Floranda there were three injured and at Deerfield two.

Throughout the storm area it was estimated conservatively that forty thousand persons were homeless and virtually without clothing or immediate methods to recoup their loss.

Martial law, declared Saturday, continued in effect throughout the storm area until late Monday evening when the restrictions in Miami were modified. None were allowed during the day to enter the stricken area except upon some mission of relief, official business of the government or State or for the press of the nation.

Hundreds were turned back by the soldiers despite their pleas that relatives were in the storm area and had been unheard from. It was considered best until things had better adjusted pushed and started rolling again. themselves that the water and food supply be not further strain

ernor will not be alone, for many thousands of other good Republicans of the State, who put right principles and the best welfare of their country above party, will do the same thing.

Eight Million Dollars to Make Train Service Safer.

Extension of automatic signals and train control devices now being made \$600. on the Pennsylvania Railroad involve

LUMBER?

expenditures totaling \$8,000,000. The expenditures being made at this time represent the greatest investment and most extensive installation in signal protection ever undertaken on the Pennsylvania Railroad or any other

Important new principles to guard against failures in the observance of signals are being worked out by the company in connection with this pro-\$300.

gram. A new device has been designed which consists of electrically oper-\$475. ated mechanism by which the indication given by the "wayside" signals-that is the signals displayed on masts

at the side of the track or on overhead signal bridges—is duplicated in minia-ture within the engine cab, keeping the indications continuously before the engineman and fireman.

railroad at one time.

In addition to the engineman and fireman having continuously before them signals in the cab, each "less favorable" indication by these signals is immediately called to their attention by an audible warning-a whistle which is connected with the signals. There are two sets of signals in the cabs, one on the engineer's side and

the other on the fireman's side. Thus, each will receive an identical separate warning.

a chubby little fellow, holding tight to his mother's hand, spied it. "Mother, mother !" he cried in excitement. "I see my penny! Stop-

let me-let me pick it up!" 'Come, come," chided the mother, impatiently, as she jerked him along. "It's only a penny. Let It alone. You'll get your gloves dirty, dear."-New York Times.

Colonial Workmanship

fhe greatest quality in all Colonial work is dignity. In the houses of the rich and the houses of the poor there is apparent the same dignified scorn of ostentation and the same pride in honest building and honest living. Although it has been said that Colonial architecture is old-fashioned and belongs to a day that is past, this is no more true of Colonial design than of any other of the traditional styles. Furthermore, Colonial architecture seems out of date only because its progress was stopped by the Greek revival and the eighteen eighties. If it had continued to grow and develop. how much more lovely would our countryside be than it is now with its potpourri of all styles-including the Scandinavian!

Mother's Orders

Ruth and Marjorie were spending che afternoon with their little friend, Jane. At five o'clock they informed their hostess that they must be going. "My dears," said Jane's mother, "can't you stay and have supper with us?"

"No, thank you," both replied. "Mother told us to come home at five."

Hats and wraps were brought. As they were being put on, Jane's mother asked again: "Are you sure you must go 'before supper?"

"Yes, thank you; we must go," replied Ruth.

Marjorie seemed to have a different opinion, and said to her sister: "We don't have to go. Mother said we could stay to supper if she asked us 'wice."

English Woman's Ten Names The petitioner in a case before the London divorce court was imposingly described as Mrs. A. B. K. F. I. H. G. P. D. Hill.

When asked by counsel to announce ner full name, Mrs. Hill handed a sheet of foolscap to the judge. "Here they are," she said.

"Is your first name Acie?" asked Lord Merrivale. "It is." "Well, that will do," said the presi-

dent. "It is not your fault that you were given all these names." Upon the paper was written:

"Acie, Bethel, Kitzinger, Firth. íshl, Helena, Goiga, Pretoria, Denver Hill."

ditional mouths to feed. It was decided, too, that the work of checking the dead and injured and caring for the housing of the destitute would be hampered by permitting additional persons within the area.

Sanitary engineers and inspectors were mobilized on Monday to avert epidemics in the path cut by the hurricane.

The supplies of food, water and clothing available, en route or promised, are sufficient to meet all requirepublic donations for the thousands who lost their all. Orphans must be clothed, given homes and educated and widows and aged people must be succored. There are also many who will be helpless from injuries. It was the worst storm that ever

struck Florida, but instead of being disheartened and dismayed business people throughout the stricken district are adready figuring on building bigger and better.

M. J. GRIFFITH LOST ALL BUT HIS AUTOMOBILE.

M. J. Griffith, son of J. Harvey Griffith, of this place, who has been in Miami for three years, wrote his father, under date of last Sunday, that words utterly fail to describe the terrors of the storm. He and his wife and two children were terrorized for two days and a night. Their home was entirely swept away and they lost everything but the clothes they had on and their automobile.

Mr. Griffith is in the septic tank business at Miami

Charles C. Keichline, who is in the postoffice at Lake North, writes: "I am O. K.," which must mean that he is uninjuried and suffered no serious loss.

-Two telegrams received from Miss Mary Musser, of Miami, Florida, this week, announced that she escaped unscratched from the hurricane which despoiled that city last Saturday, but The Towers, a large apartment house where she worked and lived was badly damaged.

Gov. Gifford Pinchot withdrew his name as a candidate for Senator on the Labor Party ticket, Monday, and in doing so also did just what both his friends and enemies expected him to do, announced that he would not support William S. Vare, the Republican nominee. Unlike some of the other Republican leaders of the State, he is too honest and independent to support Vare now after denouncing him throughout the primary campaign as anfit for the office. He says he is a Republican and will support a major-ity of the Republican candidates, but that he cannot stand for Vare. While he will not take an active part in the campaign, his statement is considered equivalent to an endorsement of Hon. William B. Wilson. In this the Gov-

Calvin Moyer, of Freeburg, spent week with his sister, Mrs. Philips. C. E. Musser has as a guest his brother, Mitchell Musser, of Scotland, S. D.

Mr. and Mrs. J. W. Beaver, of Pottsgrove, and their daughter, Miss Edna, and friend, Mr. Heckert, of Milton, were guests Sunday at the home of Mr. and Mrs. Geo. E. Stover.

Mrs. Harry Detwiler, of Rebersburg, and daughter-in-law, Mrs. Stover Detwiler and two children, of ments, it was stated. The need is for Philadelphia, spent a day recently as guests of their cousin, Mrs. John Durst.

Mr. and Mrs. W. C. Wyle, their son James and Miss Bertha Graham, are guests at the home of Mr. and Mrs. W. A. Guisewite. Mrs. Emma Beaver. of near Millmont, is also a guest in the Guisewite home.

Brief callers at the Thomas Hull nome on Sunday were Mr. Hull's cousin, Alfred Diehl and a party of friends, from Washington, enroute to State College to visit Mr. and Mrs.

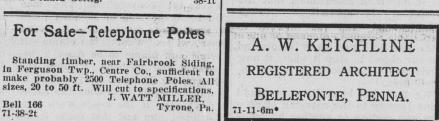

Thomas Kessinger and children. Mr. and Mrs. H. E. Crouse entertained a motor party from Mrs. Crouse's home town, Winfield, on Sunday. Among the party were two nephews of Mrs. Crouse and the Misses Smeltz, one of whom is a fine musician, having officiated as organist for Sunday school and church service in the Evangelical church Sunday afternoon.

Women in U. S. Treasury

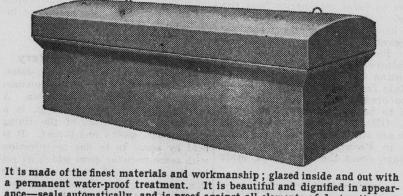

The assistant treasurer of the United States informs us that in the spring of 1862 Mr. F. E. Spinner, treasurer of the United States, prevailed upon Secretary Chase to permit him to appoint a woman to cut and trim United States currency. This work was then done with shears in the hands of men. He appointed Miss Jennie Douglas, and, as he afterward expressed it, "her first day's work settled the matter in her and in woman's favor." On October 9, 1862, the following woman employees were appointed: Miss Fannie L. Halstead, Miss Annie York, Miss Belle S. Tracy, Miss Elizabeth Stoner and Miss Mary Burke. These women were the first for whom congress regularly made an appropria-

New Value to Alder

Alder, which is much used as a wood in making furniture in those sections where it grows on a commercial scale, may have another value far exceeding that for furniture. It is now believed that the little nodules or "bumps" on the roots of alder have nitrogen fixation properties. The German chemists have been working on that theory and American universities have been attempting to prove it with some degree of success. If it is true, the alder having the ability to take nitrogen direct from the air would be a great soil builder.
