**Bullet-Pierced Bible Prized Memento of Civil War.**

One of the most precious possessions in the family of Mr. and Mrs. Samuel C. Gettig, of Madisonburg, is a small Bible, with a bullet hole in it and its leaves frayed and torn, but no amount of money could buy it from its owner. In fact both Mr. and Mrs. Gettig feel sure that had it not been for the Bible they would not have had their long and happy life together.

Mr. Gettig served during the Civil War as a corporal in Company A, 148th regiment, under Col. James A. Beaver. While on the field he received a package and on opening it found a small Bible sent him by Miss Susan Yearick, his boyhood sweetheart. He carried it in his knapsack and in an engagement south of Petersburg, in July, 1864, the Union army was overpowered by the confederates and forced to retreat. Company A was bringing up the rear when Corporal Gettig felt an impact on his back which almost knocked him to his knees. He felt certain he was wounded but managed to make the breastworks that had been hurriedly thrown up as a stand against the enemy.

Then he removed his knapsack from his back, searched for the supposed wound, but was unable to find any. Opening the knapsack he discovered that a minnie ball, fired at close range had ploughed its way into his knapsack and punctured the Bible to the 25th Psalm, and that undoubtedly saved his life.

Mr. Gettig lived to return home and on July 26th, 1886, married Miss Yearick and both lived to rear a fine family of children and are still enjoying good health. Next month Mr. Gettig will celebrate his 88th birthday anniversary and Mrs. Gettig her 83rd.

**New Kind of Bread Makes Complete Food at 23 Cents Per Day.**

A nourishing bread that will amply sustain life at the cost of twenty-three cents a day has been produced by an Austrian. The bread is made of herbs, nuts, apples and other vegetable substance and baked into a hard brick. Twenty-five grams of the bread eaten without more ado than nibbling it is sufficient for breakfast. Another fifty grams during the rest of the day will give vigorous life.

The cost of all this daily nourishment is one and one half Austrian schillings (23 cents.)

Dr. Stein, who compounded the bread declares that for twelve years it has been his only substance and that he has completely done away with kitchens and dining rooms. The economic effect he declares has been to reduce his living costs sixty per cent and it has given him perfect health, although he is sixty-two years old.

**Giant Racing Car Being Built at Wolverhampton.**

In sharpest contrast to the tiny

914-inch piston displacement racing cars that are roaring around American speedways this summer is a giant-racing car being completed at Wolverhampton, England, with a view to bettering the world record of 172 miles an hour. The new car, with an official horsepower rating of 1,000, will have two 12-cylinder engines. The gasoline bill evidently will be high, for the machine is expected to make no more than a mile to the gallon.

**Too Much "Acid?"**

Excess Uric Acid Gives Rise to Many Unpleasant Troubles.

AUTHORITIES agree that an excess of uric acid is primarily due to faulty kidney action. Retention of this toxic material often makes its presence felt by sore, painful joints, a tired, languid feeling and, sometimes, toxic backache and headache. That the kidneys are not functioning right is often shown by scanty or burning passage of secretions. Thousands assist their kidneys at such times by the use of Doan's Pills—a stimulant diuretic. Doan's are recommended by many local people. Ask your neighbor!

**Your Telephone**

*The Private Branch Exchange spells the highest development of the telephone user's equipment*

OF STANDARD DESIGN only in its simplest forms, it varies from a small board with a handful of telephones to a great complicated switchboard large enough to serve a city of fifty thousand people.

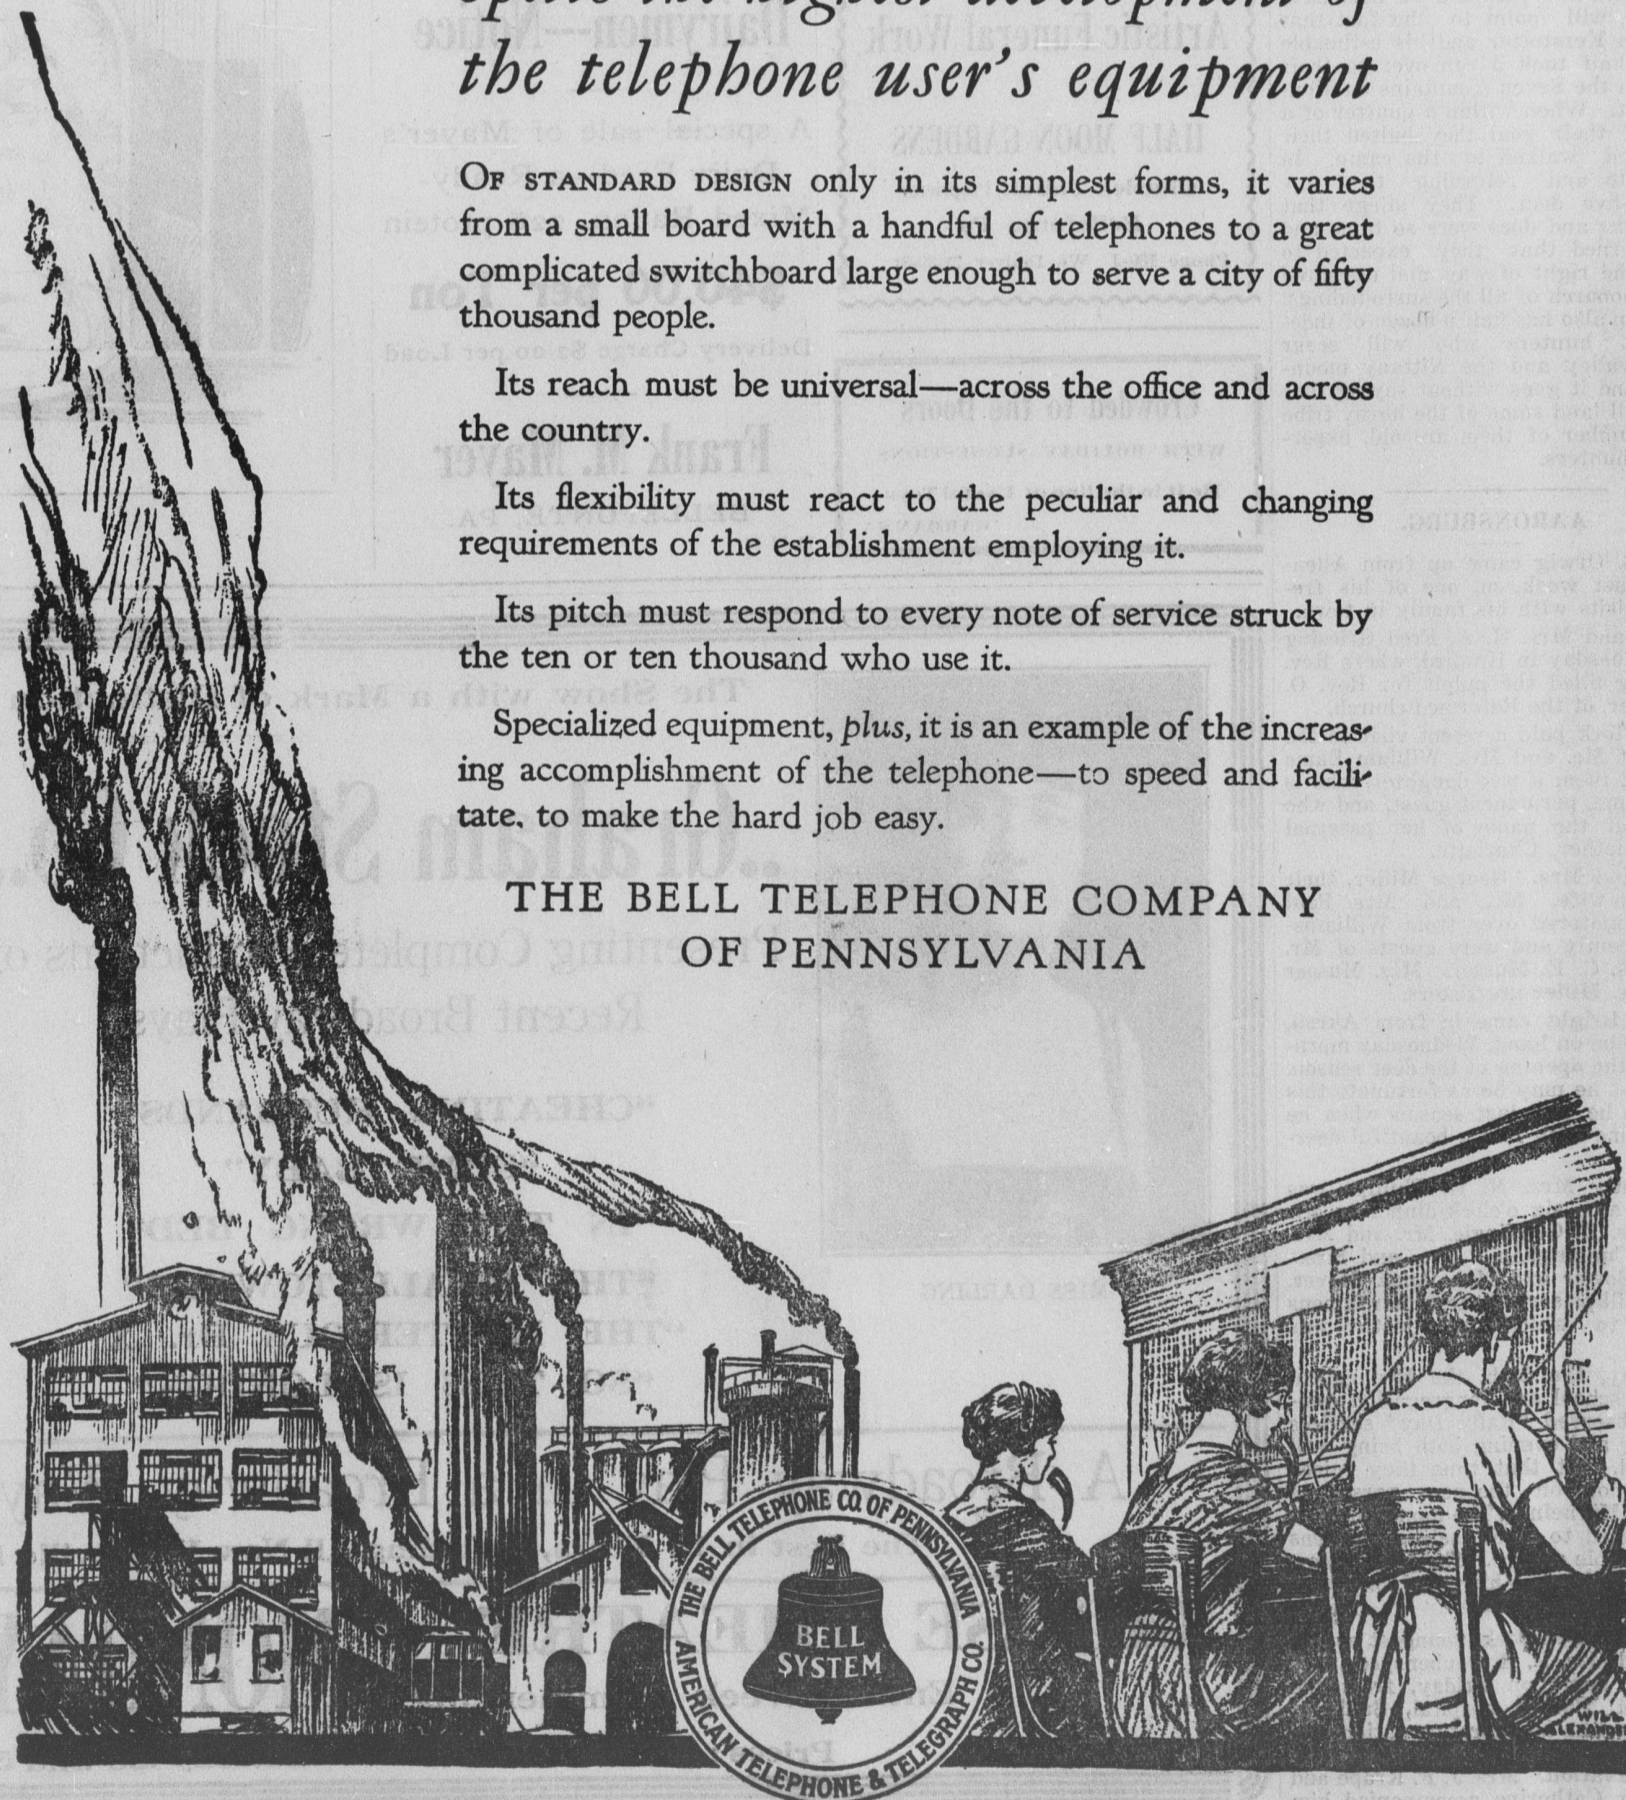

Its reach must be universal—across the office and across the country.

Its flexibility must react to the peculiar and changing requirements of the establishment employing it.

Its pitch must respond to every note of service struck by the ten or ten thousand who use it.

Specialized equipment, plus, it is an example of the increasing accomplishment of the telephone—to speed and facilitate, to make the hard job easy.
