# Centre County Lamb Growers Entertained by Kiwanians and Rotarians.

Efficient livestock production was the keynote of the joint meeting of the State College Rotary and Kiwanis Clubs, Tuesday evening of last week, at the Centre Hills Country club, which was attended by one hundred and fifteen. The Kiwanians and Rotarians entertained as their guests the members of the animal husbandry department of the Pennsylvania State College, the ten members of the Centre county lamb feeding club and their fathers and sponsors.

After due justice to a roast lamb dinner, the agricultural committees of Kiwanis and Rotary, headed by Dr, H. H. Havner and E. K. Hibshman, respectively, took charge of the program.

Doctor Havner opened the speaking program by referring to the position of Pennsylvania in the livestock world. While not first in number of animals, the State ranks high in the efficiency of its livestock, he said.

F. L. Bentley, acting head of the animal husbandry department, gave a review of the beef cattle show at Chi- girls' pig breeding clubs. cago, and told of the winnings of the five head of steers shown by the College.

P. T. Ziegler, in charge of meat work at the College, reported on the Inter-collegiate meat judging contest at Chicago.

E. K. Hibshman told of the Centre county lamb feeding club, five members of which are sponsored by State College Rotarians and five by Bellefonte Kiwanians. He introduced Allen L. Baker, State club leader, who gave a brief summary of livestock work among the boys and girls of the State. He mentioned that the Centre county club is one of seven lamb feeding groups in the State with 44 members.

County agent R. C. Blaney stated that sheep and wool improvement work had been a great asset to Centre county. In five years the Wool Growers' association has graded and sold cooperatively 60,000 pounds of wool, with increased profit to the growers of \$4,000 above what local prices would have brought them. Mr. Blaney then introduced the members of the Centre county lamb feeding club as follows: Jane Vial, State College; Roy Sunday, Pennsylvania Furnace; Ray Homan, State College; James Campbell and Donald Campbell, Pennsylvania Furnace; Harry Emel, Clarence Hoy, and Floyd Weight, Bellefonte; Charles Harter, Nittany, and George Luse, Centre Hall; and their respective sponsors: E. K. Hibshman, S. W. Fletcher, J. W. Henszey, D. F. Kapp and C. G. Aikens, of the State College Rotary club, and John Knisely, J. B. Payne, E. C. Musser, Walter R. Cliff and A. F. Hockman, of the Bellefonte Kiwanis.

esting Talks at Annual Gathering.

Some very interesting talks were made by Centre county farmers at the annual meeting of the Agricultural Extension Association, held in the Moose Temple theatre, Bellefonte, on Thursday, December 23rd. About one hundred and twenty-five were in attendance and Newton I. Wilson, of

Loveville, presided. John G. Miller, of Pine Grove Mills, told of the organization of a Holstein bull association in that section and

the purchase of three bulls. J. M. Campbell, of Pennsylvania Furnace, the champion potato grower in Centre county in 1926, gave a detailed account of his system. Thomas Beaver gave a talk on his experience in growing sweet clover for pasture.

R. P. Campbell, of Centre Hall, president of the Wool Growers' association, reported that there were 78 members in the pool this year and because of the pool they realized an extra \$900 for their clip.

J. Will Mayes, of Howard, told how to beautify the farm homestead with shrubbery.

J. K. Alexander, of Unionville, talked on the benefits of reforestation. and George Peters, of Port Matilda, reported the work of the boys' and

Charles Decker, of Nittany, discussed poultry culture and caponizing, while H. A. Grubb, of State College, told of the advantage of co-op-

eration among farmers. Earl Peck, of Nittany, gave a detailed report of the cowtesting association during the three years of its existence, while agricultural extension work was

discused by R. H. Bell, of State Colege. Prof. F. P. Weaver, of State Col-

lege, talked on taxation, and Dr. T. L. Guyton, of Harrisburg, gave an illustrated talk on the corn borer. Officers elected for the ensuing year were president, Foster Musser, Pine Grove Mills; vice president, J. J. Markle, State College; secretary, J. Thompson Henry, Martha Furnace; treasurer, W. C. Smeltzer, Bellefonte.

# Monday, December 27th.

After standing idle for six months the electric chair at Rockview was again put in use on Monday, December 27th, when Paul Orlakowski, of Allegheny county, and Paul Fasci, of

Lackawanna county, expiated the crime of murder by electrocution. Orlakowski was convicted of being implicated in the murder of assistant deputy warden John A. Pieper and guard sergeant John T. Coax during a riot in the western penitentiary, at Pittsburgh, in February, 1922. At the time he was serving a seven to ten years sentence for having assisted in the robbing of the Imperial bank, of Allegheny county, of a large sum of money. As none of the money was recovered it has always been supposed that Orlakowski had knowledge of its where-abouts, but if he did he failed to reveal it before going to the chair. Fasci was convicted of being implicated in the holdup of a train in Lackawanna county in July, 1923, in which a \$75,000 pay roll was stolen and Edward Murphy, of Lock Haven, a passenger on the train, murdered. Fasci was the last of the gang to pay the penalty. Three others had already

been electrocuted and one was shot by officers while resisting arrest. As no one claimed the bodies both

Orlakowski and Fasci were buried in the penitentiary cemetery.

### PINE GROVE MENTION.

Don't forget to write it 1927. Mrs. Rachel Wilson is recovering from an attack of pneumonia.

John F. Kimport spent last Friday at Centre Hall on a business trip. Warren Bailey is spending a few weeks with relatives in Altoona.

Mrs. Fred Fry has been confined to bed the past week suffering with a

heavy cold. Pstmaster George Glenn, of State College, is spending a few days in

Philadelphia. That famous "white horse" hade its counds the last day of December serv-

ing quit notices. Rev. Joseph G. Rigby, pastor on the M. E. charge, is holding revival services at Franklinville.

Ira Burket was taken to the Geisinger hospital, at Danville, last week, as a medical patient.

Dr. and Mrs. W. S. Glenn will leave today for their customary win-ter sojourn in Florida.

The grip and the mumps are keeping many grown people and children housed up in this section.

Mr. and Mrs. S. E. Fleming are planning to flit to their new home east of Boalsburg on March 1st. Mrs. Ed Isenberg is in the Mercy

hospital, Altoona, where she under-went an operation for appendicitis.

Mrs. J. B. Heberling underwent an operation, at the Williamsport hos-

# Centre County Farmers Make Inter- Two Electrocutions at Rockview on Put Faith in Image to Frighten Smallpox

Motoring along a country road in India, the attention of tourists was called to a curious-looking object by the roadside. It was a roughly carved little image, mounted on a small stool with three legs.

The image betrayed no signs of expert workmanship and was quite clearly the handwork of some rough village carpenter. They eyes and mouth were roughly carved, and vermillion paint brought these into prominence. The little creature had also two wooden arms.

Stopping the car, the tourists waited until some villager came along the road, and questioned him as to the reason why this image had been left by the roadside. He pointed out that it had been placed a few yards over the boundary line of the village, and that it had been there since the early hours of the morning.

It was an image of the goddess of the village temple, so common in south India, and represented the deity who controls smallpox. The scourge had broken out and had laid low a number of people, and it was felt that unless the goddess could be persuaded to transfer the evil more would fall sick. So the little image was made and removed outside the bounds of the village. Naturally the people in the next village did not appreciate this attention, and the custom is to move it from village to village. Then sometimes it is possible to get a Mohammedan, for a small fee, to destroy it

completely. Thus does the Indian villager deal

with the troublesome disease.

# **frachoma** Blamed on Faulty Food Habits

Trachoma, that dangerous disease which so often ends in blindness, may be caused by inadequate diet, like scurvey, rickets and similar deficiency diseases, according to a statement from the National Committee for the Prevention of Blindness. While trachoma is spread all over the world, the highest incidence is among people who have faulty food habits.

The apparent contagiousness of trachoma may be due to another eye disease that is associated with it. On Ellis island, where there is always some trachoma and where hundreds of cases of it are handled each year, no doctor, nurse or orderly has ever contracted the disease. Similarly, in long steerage trips from eastern Mediterranean ports, passengers with trachoma never caused outbreaks of this disease during the voyage, although the conditions for the transmission of a contagious disease were most favorable.—Hygeia Magazine.

There have been several ideas advanced as to the origin of the military salute. It was supposed to have been the practice in Rome at the time of Julius Caesar for inferiors to raise the palm of their hand to the front of their caps in order to show that it contained no dagger. This was on account of the fact that assassinations were so common in those days. It has been suggested that time and custom have modified this to the military salute. Another idea suggested was that in the British army during the American Revolution it was customary for inferiors to uncover before superiors and equals in acknowledgment of their presence. On account of the clumsy headgear, this custom degenerated into saluting without removing the cap.

# Ears Become Attuned

# to Familiar Noises

That both women and men of this generation are more subject than their forebears to nervous breakdowns is the claim of most experts. On the other hand, it is denied by a few whose opinions carry weight. The effect of the noise of modern

life is being very carefully studied by the Institute of Industrial Psychology, and Doctor Miles, a member of the staff, has reached the conclusion that the bad effect of noise on human nerves is far less than it has been supposed to be.

Investigation seems to indicate that one can adjust to the increasing noises of modern cities with great rapidity and ease and that little or no harm is done.

Typists placed at work for hours in the most infernal uproar-steam whistles, crashing tinware, pistol shots and intermittent groans and screams -are troubled only until the novelty wears off. Then nerves quiet down and the noises cease to be impressed. The woman who is excessively annoyed by noise should be examined by a physician, for there usually is something of serious importance giving rise to the "nerves."-Kansas City Star.

# Look With Suspicion On Too-Good Youth

Poor little good boy! Nobody befleves in him; everybody distrusts him. All the wise educators and psychologists peer at him suspiciously and solemnly announce that he can't possibly be approved of. If he is tractable and obedient they shake their heads dolorously and prophesy that it won't last; that he'll do something dreadful later in life to make up for it and he'd much better be getting his allowance of original sin out of his system while he's young, ingrowing sin being a serious complaint. Weil, maybe. But somehow, we can't help wondering if it's quite as bad as all that. We always had a sneaking idea that the boys and girls who did as they were told and got into no serious mischief grew up to be the dependable, conscientious, industrious men and women who do the bulk of the world's work and do it quietly and efficiently, without ringing any bells or blowing any horns to call attention to themselves and that one or two of them may even have become presidents of banks or railroads or something. Probably we're wrong, but it's a comfortable theory, : nyway.-Cleveland Plain

# Explaining Military Salute

Each of the young shepherds has three lambs. They are being fed and fitted for exhibition and sale at the State farm products show in Harrisburg, January 17 to 21. County agent Blaney invited all to go down to see the boys and girls at work in the capital city.

-On Christmas day Mr. and Mrs. V. E. Mussina, of Williamsport, announced the engagement of their daughter, Miss Margaret, to Prof. Clarence H. Smeltzer, son of Mr. and Mrs. W. C. Smeltzer, of Bellefonte. Prof Smeltzer is a member of the faculty at Temple University, Phila- \$1,600. delphia.

### PLEASANT GAP.

Our schools are all in full swing again following the holiday vacation, which was greatly enjoyed by both boys and girls.

A few days ago a certain indi-vidual dropped into one of our stores and boasted to a real estate owner that he was going to buy himself a home this spring. After emphatically impressing this fact upon all present he purchased a quart of kerosene and told the clerk to charge it, as he walked from the store. "Building walked from the store. "Building castles in the air," remarked the clerk, as he pulled his pencil from behind his car.

The Noll Bros., who have always kept their store open until ten o'clock have decided to adopt the eight o'clock closing hour, which will give all those who have been making the store a general meeting place an opportunity to spend two more hours each evening in getting better acquainted with their families. It is also probable that Mr. Stitzer, who conducts the store at the cross roads, will adopt the eight o'clock closing hour.

Two costly automobile accidents occurred here during the week. T. E. Jodon drove to his farm to look after some work he was having done and parked his car close to his barn, off of the main highway. G. E. Benner, of Centre Hall, came along on his way to Bellefonte and losing control of his car crashed into the Jodon car, badly damaging the same. He promptly told Mr. Jodon to have the car repaired and send the bill to him. The other wreck was that of Rev. Charles Rishell, who crashed into a telephone pole near Peru, badly damaging his car. Fortunately no person was injured.

B. Johnson, and was born near Loveville about 81 years ago. the farm near Guyer. Her husband

# Ski Travel Made History

Messengers on skis provided a turning point in Sweden's history in the Sixteenth century. When King Gustay Vasa called for men to repel the Danish invaders, the cautious phlegmatic men of Darlecarlia, the ancient Swedish province, took counsel and were not sure whether they should respond. Bereft of support, the king started for the Norwegian border, but had not been on his way long till the Darlecarlians decided to throw in their lot with him against the foreigner and messengers raced after him on skis and brought him back. To that event and those men modern Sweden owes her renaissance. To this day an annual ski race is held in winter to com-

memorate this turning point in the country's history .-- London Sphere.

# Citizens Called to War

There were three drawings made for the draft during the World war. One was made for each registration. The first and second drawings were made by the secretary of war, Newton D. Baker. The number drawn in the first drawing was 258, on July 20, 1917. The number in the second drawing was 246, on June 27, 1918. In the third drawing, President Wilson drew the number, which was 322. This was September 30, 1918. The first man to be selected for the draft in the United States was Harry C. Gilbert of the District of Columbia.

Nude Horse

Dorothy and Sally, age five and three, were visiting their grandparents in a -southern Indiana town. One morning they had been out playing when they suddenly burst into the house very much excited and frightened. Being asked the reason for their hurried entrance, Dorothy gasped out: "Oh, there was a horse went running down the street and nobody was with it. And it didn't have a thing on, not even a strap-nothing but just its skin and its tail."-Los Angeles Times.

distance, drew back his arm, and hurled-his favorite in-curve. Canavan measured its approach with a keen eye and swung, putting all his strength behind it. Right on the nose! It sped toward the left field fence. The left fielder was running backwards. Would he make it, would he make it? The grandstand watched

with open eyes and mouths. "Look !" Myrtle grabbed her escort's arm and pointed a trembling finger, "Look at that pink and purple hat!"-Exchange.

# **Two Counties Honored**

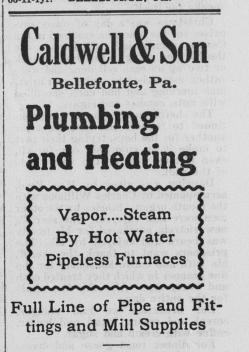

Virginia is known as the mother of Presidents because eight Presidents of the United States were born within her borders, says the Pathfinder Magazine. Washington, Jefferson, Madison, Monroe, William H. Harrison, Tyler, Taylor and Wilson first saw the light of the day in the Old Dominion. Two counties had the honor of giving birth to four of these distinguished men. Washington and Monroe were born in Westmoreland and Harrison and Tyler, born in the same county, It is an interesting fact that Harrison and Tyler, born in the same county were elected President and vice-president, respectively, at the same time. So it happened that when Harrison died a month after taking oath of office he was succeeded by a man born in the same county.

### **Giant Among Stars**

The naval observatory says, according to George Ellery Hale, the diameter of Betelgeuse is certainly more than 100,000,000 miles and probably as much as 215,000,000. The diameter of the sun being 864,000 miles, Betelgeuse is therefore roughly of 250 times greater diameter and 15,000,000 times greater volume. However, it is supposed to consist of matter in an extremely attentuated condition. Though the weight of Betelgeuse is now known, the fact that no star whose weight has been determined is as much as 100 times as heavy as the sun makes it unlikely that Betelgeuse is heavy in proportion to its volume.

### Strange Race of People

There is an ancient race in India, the Todas, nearly extinct now, that resembles the gypsies. Its members speak a strange tongue, make hovels out of mud topped with a kind of pyramid, in the hills. They are sullen, savage, chary of approach. They worship dark, occult gods, who preside over death and life. They do not wander like the gypsies. In their isolation one supposes that the wolves and the vultures and the jackals are their familiars-fear being on neither side. They worship stones and stars, the grass, the dawn and the moon. -Grit.
