BOLD ATTEMPT MADE TO ROB **ROCKVIEW PENITENTIARY.**

Burglars Broke Into Administration Building but Could Not Break Open the Safe.

There have been numerous cases of prisoners breaking out of Rockview penitentiary but never until Sunday night, or early Monday morning, had any one undertaken to break into it. And in this case it was bold burglars steal the petty cash out of the small known, but whoever it was must have had knowledge of where the money is of Bellefonte, and Dr. S. S. McCormick, kept as the safe is the only thing that of Hublersburg, have made formal apwas disturbed.

The would-be robber or robbers gained entrance to the building, which bank which is to be located in Belleis located just outside the barbed wire | fonte. stockade, by breaking a pane of glass in a window in the east end of the building, then reaching in and unlocking the sash fastener. Once inside the building they made their way to This door was locked but was forced open with a jimmy. A heavy iron grill separates the cashier's office from the business office and the men climbed over this grill in preference to forcing the locked door.

The safe in the cashier's office was tilted over on its back, the handle and combination dial broken off and the door dented in as if hammered with a sledge, but it resisted all efforts to break it open. Evidently tiring of their job and perhaps fearing discovery the robbers left without getting a cent for their bold attempt.

But the safe was so badly battered that it could not be opened in the usual way and it was necessary to cut it open with hammer and chisels on Monday. When opened everything inside was found intact. The only money kept in the safe is the petty cash for use in the daily operations at the institution, and this at no time exceeds the sum of \$500 to \$600. Just how much money was in the safe Sunday night prison officials declined to state.

An effort is being made to discover the identity of the would-be robbers through the finger print method.
