Synopsis of crop conditions issued by the State Department of Agriculture indicates that the fruit crop will not be abundant. Crops generally made a fair growth, but more sunshine is needed for a good healthy condition as vegetation is taking on a yellow tinge in some places. Wheat is doing fairly well, and is mostly good. Rye is heading and looking good. Pastures and meadows made a fair growth and are now in generally good to excellent condition, although they have been a little slow in reaching that condition. Alfalfa is reported good in all parts of the State. The planting of early field potatoes continues in the southern counties, and is generally well along, while the wet soil has delayed planting elsewhere. First plantings are coming up a good stand. Oats seeding is making rather slow progress in the northern counties, and continues in some of the central counties. "Truck crops are generally backward, and planting continues in many places. Early gardens are generally fair to good. Reports on orchard fruits are so variable that it is difficult to make any statement that would describe the conditions accurately. The frost seems to have been more or less local, depending upon topography. In general apples are a fair prospect although in some localities there will be very few. Peaches and cherries were more seriously damaged and in some places will be a total loss. In favorable localities there promises to be a fair crop." Tonic for Tired Bodies. Mary Garden says there is no tonic for tired bodies like a long rest unclothed in the hot sun, and that tip has been taken by the men who run the Upper Egypt hotels and the new building at Luxor has private open sun parlors for the guests, where one may rest in one's own apartments and be bathed to one's complete satisfaction in the beaming rays of the Egyptian sun. They claim the tired people of the earth may have their bodily strength renewed by a stay of a few months at their hotels, taking the sun-bath cure, the winter sun there being particularly brilliant and hot and shining practically every day.
