Circus Day Approaches and the Heart of Childhood Thrills

It's the approaching visit of the Walter L. Main circus that is the question of the hour in Bellefonte at least for the small boys of six, and for that matter, many of the "boys" of sixty. The billboards, barns and fences, laden with pictorial displays of the many attractions of the circus, have for several days been the point of focus of all eyes. The kiddies are restlessly awaiting the day when they will experience their annual big holiday event, acknowledged to be better than Christmas and the Fourth of July put together.
 About the time the milk man is making his rounds on the morning of Tuesday, September 13th, the big palatial special train of the Walter L. Main circus will be pulling slowly into the railroad yards. Scores of the kiddies will be surprising their parents by jumping out of bed without even being called. They will be seen running towards the tracks and there will later be found watching intently the wonderful spectacle of the unloading of a mammoth circus train.
 The Old World has been sacked for features for the Walter L. Main circus this year. The question of salary was not considered and booking agents spent many months watching the performances of famous circuses abroad and in the Orient in the hope of securing new talent for the Walter L. Main circus program.
 There are hundreds of performers who take part in the big show program. Every artist was selected because of some special merit. New acts and faces will tend to eliminate the fallacy of thinking that "all circuses are alike." Among the noted features are the DeLong Sisters of acrobats from the Royal Circus, Brussels; Mille Rebras who loops the loop on a bicycle; the De Martin family from the London Hippodrome; Miss Lillian DeJarmette society equestrienne, and countless others.
 The immense menagerie, containing lions, tigers, leopards, polar bears, zebras, and hundreds of other wild beasts of the jungles, will be thrown open for inspection one hour before the big show begins. Performances will start at 2 and 8 p. m., and doors will be opened at 1 and 7 p. m. The street pageant will be at 11 a. m.

Rose Love's Messenger
 In medieval France, where much was made of the significance of colors and every emotion was thus illustrated, red became the color of love and the red rose became love's messenger. Could anything be more fitting? For, according to ancient tradition, was it not Venus' blood that stained the white rose, her foot being pricked once when she hastened to the aid of Adonis?—New York Times.
Alluring Prospect
 "Are you a musical comedy producer?" asked the warden. "I am." "Welcome to our penitentiary! If you can cheer these surroundings by producing a few good tunes and some genuine laughs—" "You'll get me a pardon?" "No. We'll secure a salary for you so large that you can't afford to quit."—Washington Star.
Theme and Technique
 Theme is the principal air or subject on which the musical movement is built; sometimes there are two or three in the same piece. Technique is the mechanical or technical side of playing as distinct from the artistic. The speed, correctness and skill with which a musical composition is performed.
World Getting Crowded
 The greatest single change of the past one hundred years has been the rapid increase in the number of people inhabiting the earth. During that time the population of the world nearly doubled. A century ago it was less than 1,000,000,000. Today it is about 1,700,000,000.—American Magazine.

Fish Caught With Seed
 Natives of Dahomey are catching fish by "doping" the swimmers with a certain seed. They scatter the seed over the river, the fish eat it, become stupefied and rise to the surface helpless. Then the natives spear their prey. Fish weighing as much as 20 pounds are obtained.
Were Not Scribes
 King John of England did not sign the Magna Charta, because King John could not write. Nor did Mohammed write the Koran, for he, too, was unable to write, and was forced to dictate all of the Mohammedan Bible to scribes who could use a pen.
Gutta Percha Valuable
 Gutta percha is prepared from the juice of certain trees found in the Malay peninsula and the adjacent islands. It hardens and decomposes more readily than India rubber, which is now often used as a substitute in the coating of submarine cables.
Marine Knots
 "Knot" is the nautical name of a geographical mile equal to 1 1/4 statute or land miles. The rate of speed of a ship is expressed in knots, as the log line is divided by knots into parts each one hundred and twentieth of a geographical mile.
Aviation Records
 A German aviator in Leipzig made a world's record in aviation on July 5, 1912, by remaining in the air with four passengers for 33 minutes 42 seconds, and another record by remaining up with two passengers for 2 hours 41 minutes.

PRICES ON SHOES ADVANCE!
 You, the Purchasing Public, may not believe this statement. It will perhaps "go in one ear and out the other," but regardless of what you think or believe, the wholesale prices on shoes are advancing by leaps and bounds. The manufacturer blames it on the hide market. What the actual truth is, we do not know. We do know that prices on shoes have advanced from 25c. to 50c. per pair in the last month—and they say "the worst is yet to come. Regardless of this, Yeager's Tiny Boot Shop will continue to sell Freeman-Beddoe Shoes for men at \$4.85 a pair, even though they have a retail value of \$7.00.
