

A New Service

FOR

Bellefonte and State College

Gas is admittedly the most efficient fuel for cooking that has ever been offered the American Housewife. The time is drawing near when these and nearby towns will be using this modern convenience.

Not the least of our problems is the matter of making the change necessary in the appliances to be used. As a public utility we are not interested in the sale of these appliance except as it relates to the practical use of the product we manufacture---GAS

Because we are tremendously interested in converting as many as possible to the new service, we have arranged with the **LARGEST MANUFACTURER OF GAS RANGES IN THE WORLD** to take direct charge of this feature of our service.

You will have their guarantee of satisfaction and our word and bond that your interests will be protected. As a result of this contact with the **DIRECT ACTION STOVE COMPANY**, Division of **THE AMERICAN STOVE COMPANY**, manufacturers of the **FAMOUS LORAIN OVEN HEAT RED WHEEL REGULATOR**, you will be assured of many great savings.

Watch their ads appearing under our name. Through our mutual efforts we have what is without a doubt the most unusual **CUSTOMER PRIORITY PRIVILEGE** offer in the history of any community of not only the State but anywhere in this U. S.

Under our management their direct representatives will call upon you immediately. They are gentlemen of integrity and ability and you will find them experienced with the problem you are facing.

Every statement and promise they make will be rigidly lived up to by this company. We are proud to offer you their service.

Central Pennsylvania Gas Company.
