GAS is the Ideal

COOKING FUEL

WHEN you cook with gas you can adjust the flame to the desired heat—high for quick action, low to simmer, any size flame for any intensity. You see the size of the flame and know exactly how fast your food is cooking. Oven heat is maintained at any desired temperature by automatic heat control. Gas means quicker cooking as well as better cooking. It saves your time and costs you less.

A Perfect Dinner With
Kitchen Comfort

The insulated range is the latest and greatest advance in gas range design! The insulated oven has many advantages.

For one thing you can oven-steam your vegetables and other foods—a method far superior to boiling. Oven-steaming preserves the health-giving minerals and vitamins—retains the natural, delicious flavor in vegetables, fruits and all other foods—even the cheaper cuts of meat are made tender and savory. Scientific oven ventilation makes all foods more delicious, and keeps odors out of the kitchen.

If It's Done
With Heat—
YOU CAN DO IT
BETTER WITH GAS

Oven insulation means kitchen comfort. It keeps the heat in the oven and out of the kitchen. Automatic oven heat control makes it unnecessary to watch foods while cooking. You cook according to exact time and temperature, insuring perfect results and carefree cookery.
