Every Up-to-date Centre County Farmer Should Visit the Train in Bellefonte Today.

On Monday R. C. Blaney, Centre we give you his word for it that it is an exhibition worth seeing.

there was a crowd of over five hundred farmers from Lycoming county present to inspect the blooded bulls. And as evidence of how favorably they were impressed with the stock ten bulls were purchased before the train got away from Jersey Shore. As stated last week, practically all the bulls are from eight to fifteen months old, though there were three Jersey bull calves. Mr. Blaney states that the stock is all fine looking and has the marks of the genuine purebred. As fast as bulls are taken from the street, where she had been prior to train others are added, so that there will be a good supply on board when the train reaches Bellefonte today

One entire car of the train is taken up with the State College exhibit, while others contain exhibits of the of Agriculture. But the State College exhibit is said to be the best of any on the train. None of these exhibits include any livestock but the State College car shows feeds and feeding, with ratios of costs and returns, a cow testing exhibit and dairying and marketing of milk products. The cow testing exhibit is unusually unique and explicit. It consists of two wooden cows, one sleek and fat and the other skinny and poor. Through the use of a small electric motor it shows fifty cent pieces being fed into the skinny cow and dimes dropping into the milk pail. #### Little Story On Centre County A Apples.

It is an admitted fact that no apples grown anywhere in the United en a month's leave of absence by the States can rival in flavor the Pennsylvania fruit. Whether it is the soil, the climate, or whatever it may be, there is a definite, distinct taste about a Pennsylvania apple that cannot be found in the choicest pick from the apple orchards in New York, Oregon, or the State of Washington. Such being the case it is hard to understand why the average Pennsylvania farmer does not give more attention to his orchard.

The writer has not missed one curb market held in Bellefonte during the August, but we have failed to see one The farmers who bring them in are probably offering the best they have, but if such is the case there is some-

Either the trees need pruning or the crop should have been sprayed and thinned out. In the experimental orchards, at State College, where the trees are properly pruned, the fruit sprayed and as much care given the apple crop as is given any other crop grown, the fruit is almost perfect and as high-class as fruit can be. the town's history.
It was on December 18th, 1918, ten years ago, when the first regular mail plane swooped in over Nittany mountain and landed on the Beaver field with a pouch or two of mail for Bellefonte and took quite a number of outgoing letters. Airmail was then in its infancy and the New York to Chicago route an experiment. But much has happened since that day ten years ago. The route has been extended to San Francisco, with sidelines to various points in the United States until this country now leads the world in its mileage of airmail routes.

Bellefonte was continued as a regular stop for several years but was finally reduced to an intermediate field. but still retained under government National Air Transport, a private corporation. That Bellefonte might again be made a regular stop is the hope of many people, and the committee in charge of the celebration is working with this ultimate result in

They have designed and had made a neat cachet for a letter, commemorating the event, and which will be liberally distributed for sending broadcast over the United States that day. These cachets, already stamped, will be sold at cost and business men generally, as well as private individuals, are urged to make use of them.

One man in New Jersey has already arranged to mail in Bellefonte, that day, five hundred letters and it is likely other places nearby will take similar advantage of the occasion. It is expected that every mailplane both east and west will stop at the Bellefonte field that day to deliver and take on mail.

Other details of the celebration are being worked out by the committee and will be announced in due time.

Mr. Rossman was driving a Ford sedan and was right on the track when the train, said to be running fifty miles an hour, hit the auto. He was thrown clear of the wreckage and tossed about fifteen feet, falling between the rails of the west-bound track. When picked up he had a large hole in the back of his head and injuries on his right hand. His body was not mangled but he had a number of broken bones and death was probably instantaneous. It is said that Mrs. Mensch heard the crash and ran to the crossing to find her father dead and her mother unconscious.

Mrs. Rossman sustained a broken leg, bad cuts on the face and head

and internal injuries. Mr. Rossman was a son of Mr. and Mrs. John Rossman and was born in Gregg township 69 years ago. Upwards of fifty years ago he married Catherine Weaver and for many years they lived on a farm in Pennsvalley. Some years ago Mr. Rossman quit farming and had since been living a retired life at Spring Mills. His surviving children are Mrs. Nel-Wert, of Akron, Ohio; Mrs. Bright Bitner, of Spring Mills; Mrs. Harry Mensch, of Milton; Bruce and Charles Rossman, of Millheim. He also leaves two brothers, Howard and Harvey Rossman, both of Spring Mills. He was a member of the Reformed church for many years. Funeral services will be held at 9:30 o'clock this morning, burial to be made at Millheim.

# An Entrancing Flower Show

A visit to Half Moon Gardens right now would repay any lover of the beautiful in flowers.

We have never seen more exquisite chrysanthemums than those that fairly fill one of the large green-houses up there. Great white, yellow, lavender and orchid blooms, some of them fully eight inches in diameter, are crowded so close together as to give one the impression that the entire interior is covered with an exquisite floral blanket.

Half Moon Gardens flowers always last longest because they are never cut until ordered. When you get them there they are fresh from the earth, with all their pristine beauty and fragrance.
