The congestion is such that a bad epidemic or public catastrophe might result in 9; Bobby, aged 8, and Donald, aged serious loss of life for want of hospital facilities."

"After careful and scientific consideration of the needs of the hospital, conferences with the doctors and the hospital staff and with hospital experts, and a study of the conditions in the county, the directors of the hospital have determined to launch a campaign for \$250,000, to be paid in pledges covering a period of three years. According to the vote of the executive committee this money is to be used as follows:

(1) For the paying of approximately \$85,000, present indebtedness and maintenance of the hospital. This indebtedness represents only a small part of the free work that, has been rendered to the community.

(2) \$25,000 for the completion and equipment of the present maternity unit.

(3) For the construction of an additional unit of approximately thirty-five beds.'

"The Board of Directors was loath to set its object so high and at first contemplated raising only sufficient money to do a small portion of the necessary work. The doctors of the community, however, in united action so emphasized the pressing need of increased bed capacity and improved facilities and the danger to which the community is subject without them, that the board could not be deaf to their pleas."
