Aided the Cause

There was a burst of applause as the pianist finished his last solo. He bowed and, after thanking his audience, was about to leave when a man approached and presented a check. This the pianist refused, saying he would prefer it to be used for some charitable purpose.

"In that case," said the donor, "I suppose you wouldn't mind if we added it to our special fund?"

"Not at all," said the pianist. "What is the special fund for?"

"To enable us to have better entertainments next year."

Unfortunate Remark

Words whispered at a funeral led to the arrest of a woman at Sene, France, for the murder of a man. "In a few minutes all will be over, and our minds will be at rest," the woman was overheard to say to a friend as the coffin was lowered into the grave. Her words were carried to the police, and the woman finally confessed that during a drunken quarrel she killed the man by striking him in self defense, a blow behind the ear with a blunt instrument.

Persian Fruits

Persia is credited with having given many fruits to the world at large, including the peach and orange, but the real origin of these may have been eastern Asia or India. The greatest fruit crop of Persia is the grape, which grows in abundance. They are gathered during the latter part of August and just at that time there is a periodical rain which very conveniently washes the fruit or otherwise it would go unwashed.

Information Exchanged

At a military dance one officer said to another as they adjourned for refreshments:

"I don't know how it is, but my wife's lipstick always tastes different from any other woman's," and he carefully wiped his lips.

"Yes, doesn't it?" remarked the other, absent-mindedly.—London Tit-Bits.

BELLEFONTE COOKS ELECTRICALLY ... here is why!

An electric range gives modern meals the goodness of old-time "Dutch Oven" cooking . . .

The sugar-crusted hams, golden baked beans and rich puddings cooked in old-time Dutch ovens are only a tradition today. But their delicious flavor is recreated in the modern electric oven.

For in electric cooking as in Dutch oven cooking . . . thorough insulation prevents loss of moisture, because very little evaporation takes place. Nothing is dried out and tasteless. Roasts are juicier. Vegetables are more appetizing and nourishing.

Best of all, an electric oven gives such tasty results without any attention from you. All the worry, the watching, the responsibility rests with the range itself. Once you have set the clock and adjusted the thermostat, you can stay out of the kitchen until mealtime. Cook electrically for economy.
