APRIL 22 and 23
MATINEE DAILY

BELLEFONTE COOKS ELECTRICALLY
... here is how!

An electric range follows your cook book... without any attention from you

You can leave your range alone in the kitchen to tend the cooking... just as you would a competent maid. For it will do automatically all the things you'd do if you were there.

When you set the clock and the thermostat, you free yourself from all cooking worry and responsibility. You can put your entire dinner in the oven, then go out shopping or to an afternoon party. On your return, you will find the entire meal done to a turn,

piping hot, all ready to place on the table.

And your family will say that they never tasted better cooked food. It is evenly browned. All the rich, healthful juices have been retained. The flavor is delicious.

This is not the result of "luck." Electric cooking is uniformly good cooking. For you can duplicate your best results every meal. Cook electrically for economy.
