

A CARD OF THANKS.

The "Womanless Wedding" performances at the State Theatre last week were wonderfully successful in every respect. The total receipts were \$926.00; the total expenses amounted to \$221.00, leaving a balance of \$705.00 to be divided equally between the producing company and the athletic association of the Bellefonte Academy.

The cordial and generous co-operation of the business and professional men of the community in taking part in the performances and in advertising; the assistance rendered by Mrs. Blair, Miss Miriam Smith, Miss Freda Edmiston and other ladies of the town in the costume and musical features; and the timely assistance of the orchestra made the wonderful success possible. Headmaster James R. Hughes wishes through our columns to express his hearty appreciation and gratitude for these very helpful services.

Electrolux, the gas refrigerator, with no motors and no moving parts, is as far ahead of others in its field as modern transportation is ahead of the horse and buggy. You cannot afford to buy automatic refrigeration without investigating Electrolux, now being specified by hundreds of eminent architects for apartment houses and homes, in definite preference to other types. Operating daily at our show rooms, Central Pennsylvania Gas Co.

It costs very little to recondition a MODEL T FORD

THE Ford Motor Company is making a new car, but it is still proud of the Model T. It wants every owner of one of these cars to run it as long as possible at a minimum of trouble and expense.

Because of this policy and because of the investment that millions of motorists have in Model T cars, the Ford Motor Company will continue to supply parts as long as they are needed by Ford owners.

So that you may get the greatest use from your Model T, we suggest that you take it to the nearest Ford dealer and have him estimate on the cost of any replacement parts that may be necessary.

You will find this the economical thing to do because a small expenditure now will help to prevent costlier repairs later on, increase the value of the car, and give you thousands of miles of additional service.

For a labor charge of only \$2.60 you can have your generator put in first-class condition. A new universal joint will be installed for a labor cost of \$3. Overhauling the carburetor costs \$1.50; steering gear, \$3.50; radiator, \$7.50. A complete overhauling of the rear axle assembly runs between \$5.75 and \$7 for labor. An average price of \$22.50 covers the overhauling of the motor and transmission.

These prices are for labor only because the need and number of new parts depend on the condition of each car. The cost of these parts is low, however, because of the Ford policy of manufacturing and selling at a small margin of profit.
