BELLEFONTE COOKS ELECTRICALLY
... here is why!

The cook you can't see keeps your kitchen clean

An electric range not only saves you watching and tending the cooking... it actually saves you scouring, scrubbing and laundering! For electricity is the most convenient and cleanest fuel you can use.

There's no smoke to blacken pots and pans... no soot to collect on kitchen walls and curtains... no noxious fumes to taint the air you breathe. How much more pleasant that makes the kitchen!

An electric range saves food, too. The oven is so tightly sealed against evaporation that very little moisture escapes. As a result, foods retain their appetizing and nourishing juices. And everything goes farther. Home economists figure that there is about 20% less shrinkage in electric cooking. Cook electrically for economy!
