(Concluded from preceding page.)

least two stairways constructed entirely of incombustible material, loed remote from each other and continuous from grade line to most story.

All exit doors in schools, hospitals, theatres, and other places of blic assemblage, shall open outward.

Section 19:

FIRE STOPS.

At each floor level in all buildings hereafter erected, all stud walls, rtitions, furrings and spaces between joists where they rest on divin walls or partitions, shall be fire-stopped with incombustible maial in a manner to completely cut off communication by fire through icealed spaces. Such fire-stopping shall extend the full depth of the sts, and at least 4 inches above each floor level. Stair carriages shall fire-stopped at least once in the middle portion of each run.

Section 20: AREAWAYS.

All areaways shall be guarded with suitable railings, or be protected incombustible covers or gratings. If gratings be used, they shall ve a wire screen of not more than 1/2 inch mesh securely attached to under side. Open areaways shall not project beyond the lot line.

Section 21:

FRAME BUILDINGS.

No frame building hereafter erected or altered shall exceed two pries or 30 feet in height, except that private dwellings may be three ries or 35 feet high.

No frame building hereafter erected for any occupancy other than ain elevators, coal elevators and pockets, ice house and exhibition ildings, shall cover a ground area exceeding the following:-One-story ilding, 7,500 square feet; two story building, 5000 square feet. In no case shall a frame building be erected within five feet of the le or rear lot line, nor within 10 feet of another building, unless the ace between the studs on such side be filled solidly with not less than inches of brickwork or other equivalent incombustible material. In rows of frame houses the dividing walls or partitions between sterial; or they may be built with 4 inch studs, filled solidly with brick used for any other purpose. rk laid in mortar, or with other incombustible material and be coverwith metal lath and plaster. Such dividing partitions shall rest on asonry walls and shall extend to under side of roof boards. A flush rtition. In rows of more than three houses every alternate division good engineering practice. all or partition shall be constructed of solid brick work not less than inches in thickness.

Buildings with wooden frame work clad with sheet metal or stucco veneered with brick, shall be classed as frame buildings. Outside e fire limits, when any building is to be erected of brick, stone, hollow ock, or concrete, that might under this ordinance be constructed of od, the Fire and Police Committee or other designated official is reby authorized and directed to allow reasonable modifications of this dinance relating to brick buildings, in consideration of the use of combustible material instead of wood. Such modifications, however, all not permit variations from the requirements of Section 12, 18, and of this ordinance.

Section 22:

ELECTRICAL INSTALLATIONS.

All electrical installations shall conform to the requirements of e National Electrical Code.

Section 23:

CHIMNEYS. The smoke flue of every high pressure steam boiler, and every ap-

lance producing a corresponding temperature in a flue, if built of ick, stone, re-inforced concrete or other approved masonry, shall have alls not less than 12 inches thick, and the inside 4 inches of such alls be fire brick laid in fire clay mortar, for a distance of at least feet from the point where the smoke connection of the boiler enters e flue.

Metal smoke stacks may be permitted for boilers, furnaces and nilar apparatus, where large hot fires are used, provided they have a sarance from all combustible material of not less than one-half the ameter of the stack, but not less than 15 inches unless the comstible material be properly guarded by loose-fitting metal shields, in hich case the distance shall be not less than 12 inches. Where such ack passes through a combustible roof, it shall be guarded by a lvanized iron ventilating thimble extending from at least 9 inches bethe under side of the ceiling or roof beams, to at least 9 inches ove the roof, and the diameter of the ventilating thimble shall be not ss than 36 inches greater than that of the smoke stack. Metal noke stacks shall not be permitted to pass through floors.

Section 29:

HEATING FURNACES AND APPLIANCES.

Any woodwork, wooden lath and plaster partition or ceiling within 4 feet of the sides or back, or 6 feet from the front of any heating boiler, furnace, bakery oven, coffee roaster, fire-heated candy kettle, laundry stove or other similar appliance, shall be covered with metal to a height of at least 4 feet above the floor. This covering shall extend the full length of the boiler, furnace or heating appliance, and at least 5 feet in front of it. Metal shields shall be loosely attached, thus preserving an air space behind them. In no case shall such combustible construction be permitted within 2 feet of the sides or back of the heating appliances, or 5 feet in front of same.

No furnace, boiler, range, or other heating appliance shall be placed against a wall furred with wood.

Heating boilers shall be encased on sides and top by an incombustible protective covering not less than 11/2 inches thick.

Section 30:

OPEN FLAME HEATING DEVICES. All gas, gasoline, oil, or charcoal burning stoves or heating devices,

shall be placed on iron stands at least 6 inches above combustible supports, unless the burners are at least 5 inches above the base with metal guard plates 4 inches below the burners.

No open flame heating or lighting device shall be used in any room where gasoline or other volatile inflammable fluids are stored or handled.

Section 31: GAS CONNECTIONS.

Gas connections to stoves and similar heating devices shall be made by rigid metal pipes. For small portable gas heating devices, flexible metal or rubber tubing may be used when there is no valve or other shut-off on the device.

Section 32: VENT FLUES.

Vent flues or ducts, for the removal of foul or vitiated air, in which the temperature of the air cannot exceed that of the room, shall be constructed of metal or other incombustible material and shall not be uses shall be built of brick, hollow tile, concrete or other incombustible placed nearer than 1 inch to any woodwork, and no such flue shall be

Section 33: SAFETY OF DESIGN.

All parts of every building shall be designed to safely carry the ortar joint shall be made between the roof boards and the wall of loads to be imposed thereon, and shall in all other respects conform to

Section 34:

DUTIES OF ENFORCING OFFICER. The Fire and Police Committee or other designated official is hereby authorized and empowered:

First: To enforce all ordinances relating to the construction, equipment, management and condition of all property within said Borough. Second: To supervise the construction or reconstruction of all buildings

Third: To report monthly to Council regarding the condition of the Borough on all matters pertaining to fire preventions.

Section 35:

PENALTY FOR VIOLATIONS.

Any and all persons who shall violate any of the provisions of this ordinance, or fail to comply therewith, or who shall violate or fail to comply with any order or regulation made thereunder, or who shall build in violation of any detailed statement of specifications or plans submitted and approved thereunder, or any certificate or permit issued thereunder, shall severally for each and every such violation and non-compliance, respectively, forfeit and pay a penalty of not less than Five Dollars nor more than Twenty-five Dollars. The imposition of one penalty for any violation of this ordinance shall not excuse the violation, or permit it to continue; and all such persons shall be required to correct or remedy such violations or defects within a reasonable time; and when not otherwise specified, each ten days that prohibited conditions are maintained shall constitute a separate offense. The application of the above penalty shall not be held to prevent

the enforced removal of prohibited conditions, as provided in Section 2 of this ordinance.

Section 36:

CONFLICTING ORDINANCES REPEALED.

All ordinances and parts of ordinances inconsistent herewith are hereby repealed.

THE FIRST NATIONAL BANK

BELLEFONTE, PA.

ROM time to time a farmer was annoyed to discover after marketing livestock that better prices had been quoted by dealers located not

much farther away. He became a telephone subscriber and, accord-ing to his account, the first business call he made netted him a saving of 35 cents per hundred-weight on ten hogs. These he sold to a dealer after comparing prices in two neighboring towns.

ost estates include securities, stocks, bonds, etc., among their assets. The proper management and disposition of such assets requires special knowledge and experience not usually had by an individual. This Bank, with its well organized Trust Department, can act as Executor or Administrator, thus assuring prompt and efficient administration. And the charges for such trained services are fixed by law, and do not exceed individual charges.

Section 24:

CHIMNEYS FOR LOW TEMPERATURE APPLIANCES. All chimneys which form a part of a building construction, and not ed for high pressure boilers, or other furnaces where high temperares are maintained, shall be constucted in accordance with the reirements of the "Ordinance for Construction of Chimneys" issued by e National Board of Fire Underwriters.

Section 25:

SMOKE PIPES. No smoke pipe shall be within 12 inches of any woodwork, or any ooden lath and plaster partitions, or ceiling, unless the surface above

e pipe be protected by metal lath and plaster. Where smoke pipes pass through a wooden lath and plaster parti-

on, they shall be guarded by galvanized iron ventilated thimbles at ast 12 inches larger in diameter than the pipes, or by galvanized on thimbles built in at least 8 inches of brick or other incombustible aterial.

No smoke pipe shall pass through any floor, or a roof having wooden ame work or covering.

Section 26: HOT AIR PIPES AND REGISTERS.

All heater pipes from hot air furnaces where passing through comistible partitions, or floors shall be double tin pipes with at least 1/2 ch air space between them. Horizontal hot air pipes leading from rnace shall be not less than 6 inches from any woodwork, unless the oodwork be covered with loose-fitting tin, or the pipe be covered with least 1/2 inch of corrugated asbestos, in which latter cases the disnce from the woodwork may be reduced to not less than 3 inches.

No hot-air pipe shall be placed in a wooden stud partition or any ooden enclosure unless at least 5 feet distant horizontally from the rnace. Hot-air pipes contained in combustible partitions shall be veen the two on all sides, or be securely covered with asbestos. Neith-the outer pipe nor the covering shall be within 1 inch of wooden udding, and no wooden lath shall be used to cover the portion of the artition in which the hot air pipe is located. Hot air pipes in closets shall be double, with a space of at least 1 inch between them on all sides. Every hot-air furnace shall have at least one register without valve aced inside another pipe arranged to maintain 1/2 inch air space belouvres.

A register box placed in the floor over a portable furnace shall ave an open space around it of not less than 4 inches on all sides, and supported by an incombustible border. Hot-air registers placed in ay woodwork or combustible floors shall be surrounded with borders of combustible material, not less than 2 inches wide, securely set in place.

The register boxes shall be of metal, and be double, the distance beveen the two shall be not less than 1 inch; or they may be single if overed with asbestos not less than 1-8 inch in thickness, and if all oodwork within 2 inches be covered with metal.

Cold air ducts for hot-air furnaces shall be made of incombustible aterial.

Section 27:

STEAM AND HOT WATER PIPES.

No steam or hot water pipe shall be within 1 inch of any woodork. Every steam or hot water pipe passing through combustible oors, or ceilings, or wooden lath and plaster partitions, shall be protect-1 by a metal tube $\frac{1}{2}$ inch larger in diameter than the pipe, and be rovided with a metal cap. All wooden boxes, or casings enclosing team or hot water heating pipes, or wooden covers to recesses in walls which steam or hot water heating pipes are placed, shall be lined ith metal.

Section 28:

DRY ROOMS.

No combustible material shall be permitted in the construction of ny dry room hereafter erected, in which a temperature of 125 degrees ahrenheit or over may exist. If a temperature under 125 degrees ahrenheit is to be used, the dry room may be constructed of wood, but shall be lined throughout with 1-8 inch asbestos, covered with sheet ietal.

If windows are placed in walls or ceilings of dry rooms they shall e of wired glass set in fixed incombustible sash and frames.

This ordinance shall take effect and be in force from and after its passage and legal publication.

Ordained and enacted into an ordinance at a regular meeting of Council on the 21st day of April A. D. 1930. JOHN S. WALKER, President of Council.

Attest: W. T. KELLY,

Secretary

And now, April 24, A. D. 1930, the foregoing ordinance is hereby approved.

H. P. HARRIS Burgess
