TWO PARENT ROBINS KILL PILFERING HAWK.

Carpenter Lew Miller saw a sight on the hospital grounds in this place, last Saturday morning, that he wouldn't have believed if some one else had seen it and told him the story.

As he was passing the institution Mr. and Mrs. Robin were giving one of their brood a lesson in how to tap the ground and listen for worms. Suddenly, a bird hawk swooped down and grabbed the baby robin. Instantly, its parents went into action. They took to the air, circled the hawk and darted at it with lightning speed from opposite sides. There was a whirl of feathers, the baby robin fluttered to the ground, the hawk fell dead and the victorious old robins glided down to the side of their little one. Miller then went to the scene and found that the hawk had been decapitated as neatly as if a butcher's cleaver had severed its head.
