

**CIRCUS IS COMING  
OH JOY! WHAT A DAY!**

With no advance in prices still charging the pre-war rates of 25 and 50 cents for general admission either performance.

Downie Bros. circus, that has made circus history will visit Bellefonte for two shows, afternoon and night, on Friday, June 20. Starting the day in true circus fashion as the old days, Downie Bros. offer a long free street parade at noon, in which all the beautiful curved wagons, all the animal dens are mounted on powerful motor cars and the grandest and most modern all circus parades.

With an array of circus talent a list of which reads like a circus special register. The World's famous odding troupe of bareback riders attiring the incomparable Joe Hodin, Prince of funsters and four aster equestrians. Two young men and two ladies make up the balance of this talented troupe that have just returned for this special engagement with the Downie Bros. circus. Their European triumphs. Then the famous Morales family of Old Mexico, a picturesque Mexican family of four girls and two boys of unusual talent, including Senor Felix Morales with his upside down ride on a thread of steel from the very top of the tent to the ground, covering a distance of 60 feet standing on his head. Then the usual ring trapeze artists that thrill us to win your favor, that thrill us with their daring, that make us marvel at their skill. Downie Bros. aerialists include the kings of queens of the air. The Waiters duo. The aerial Shellys, and the Walters trio. Then the famous Earl Larkin trio of head balancers with their funny furniture movers. Then too, Gene and Mary nos, the last word in carrying rich pole artists, the sturdy little army supporting a 25 foot pole while the agile Gene cuts cat like persons on the top.

Then the trained ponies, horses, cats and Prof. John White's, world's champion high jumping greyhounds, that hold world's records in high jumping. And Karl Clark and his trained Florida razorback orida hogs, that have been taught the farmer to do almost everything but talk.

Chief of the Animal part of the show is the famous Downie Bros. internationally famous for his acts at the New York Hippodrome and the world's largest show house as in the height of its glory.

**PLEASANT GAP.**

Mrs. Ethel Ramsey and son, Mrs. W. H. Nolls, Sunday.

The Howard community health service met at the home of Mrs. Willard McDowell, on Wednesday afternoon, and arranged to hold a festival on the playgrounds at the High school building Thursday, June 19th. Music by a band. This organization has done a splendid and much needed work in our community. At the present time there are 2 eye cases to be taken care of and the ladies of the committee hope to raise sufficient funds to enable them to carry on the regular work and the milk service for the underprivileged children, in the schools for the entire term next year. The only means of raising funds for this organization is by holding the annual festival and the contributions of individuals. Let us all "do our bit" toward making this festival a real success. The report for the last year's work, beginning June 27, 1929, up to the present time is as follows: 1 eye case, 11 dental cases, 125 given Schiek test, 1 maternity case, milk provided for 4 cases in the home. Toxic anti-toxin given 112, milk service started in the schools, with milk provided for a period of 12 weeks.

**SERVING MANY BUSINESSES**  
Experience of large fleet owners reveals  
the unusual reliability and economy  
of the new Ford

A SIGNIFICANT TRIBUTE to the value of the new Ford is found in its increasing use by Federal, state and city governments and by large industrial companies which keep careful day-by-day cost records. In most instances, the Ford has been chosen only after exhaustive tests of every factor that contributes to good performance—speed, power, safety, comfort, low cost of operation and up-keep, reliability and long life.

Prominent among the companies using the Ford are the Associated Companies of the Bell System, Armour and Company, The Borden Company, Continental Baking Corporation, Firestone Tire and Rubber Company, General Electric Company, Goodyear Tire and Rubber Company, Kellogg Company, Knickerbocker Ice Company, Morton Salt Company, Pillsbury Flour Mills Company, The Procter and Gamble Company, and Swift & Company.

Each of these companies uses a large number of Ford cars and trucks. The Associated Companies of the Bell System use more than eight thousand.

Modern business moves at a fast pace and it needs the Ford. Daily, in countless ways and places, it helps to speed the production and delivery of the world's goods and extend the useful service of men and companies.

Constant, steady operation over many thousands of miles emphasizes the advantages of the sound design of the Ford car, its high quality of materials, and

unusual accuracy in manufacturing. Beneath its graceful lines and beautiful colors there is a high degree of mechanical excellence.

An example of the value built into the Ford is the use of more than twenty ball and roller bearings. They are hidden within the car and you may never see them. Yet they play an important part in satisfactory, economical performance. Their function is similar to the jewels of a fine watch.

Throughout the Ford chassis, a ball or roller bearing is used at every place where it is needed to reduce friction and wear and give smooth, reliable mechanical operation.

At many points, as on the transmission counter-shaft, clutch release, fan and pump shaft, and front drive shaft, these ball and roller bearings are used where less costly types of bearings might be considered adequate.

Additional instances of the high quality built into the Ford are the extensive use of steel forgings, fully enclosed four-wheel brakes, Rustless Steel, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, torque-tube drive, three-quarter floating rear axle, and the Triplex shatter-proof glass windshield.

The Ford policy has always been to use the best possible material for each part and then, through large production, give it to the public at low cost.
