OLD ACADEMY STUDENT TO IMITATE FRANKLIN.

When Benjamin Franklin was experimenting with electricity in Philadelphia, almost one hundred years ago, one of his stunts was to send an electrical impulse across the river Schuylkill and returning it through the river igniting inflammable substances.

Franklin's experiments are to be repeated during Christmas week, in Philadelphia, when Dr. E. E. Free, an old student of the Bellefonte Academy, will send an electrical impulse through wires above the Schuylkill and when the current comes back through the river alcohol will burst into flames.

Prof. Free is a native of Dagus Mines, Elk county. After graduating from the Bellefonte Academy he took a course at Cornell and Johns Hopkins. He spent a year as assistant chemist at the University of Arizona Agricultural Experiment Station and from 1907 to 1912 was physicist and scientist in the Department of Agriculture, Washington.

During the World war he served in France as a major in the Chemical Warfare Service. For a time he was editor of Scientific American. Since 1928 he has been lecturer on outlines of science in New York University.

ELLIS SNYDER INJURED. MARKET WAGON WRECKED.

Wednesday morning Ellis Snyder, who lives on the Cook farm near Milesburg, was on his way to the Bellefonte curb market, driving one horse in a spring wagon. On the curve in the state highway, near Haupt's Place, he was run into from the rear by an auto driven by Earl Emehizer, of Runville, who was on his way to work at the limestone quarries.

Snyder's wagon was literally smashed to pieces and his market produce scattered over the highway. His horse had one leg broken and had to be shot and Snyder was seriously injured and is in the Centre County hospital. He is badly cut and bruised and has a possible fracture of the hip. An X-Ray will have to be taken to determine the latter.

The accident happened about 5 o'clock in the morning and Emehizer alleges that there was some fog and as Snyder did not have a light on his wagon he was unable to see him because he was on a curve at the time, until too close to prevent running him down. Report from the hospital yesterday was to the effect that Snyder's hip is fractured.
