

**PATIENTS TREATED AT  
CENTRE COUNTY HOSPITAL.**

Charles Laird, of Ferguson township, was discharged on Monday of last week, after undergoing surgical treatment.

Mrs. Phyllis Krumrine, of State College, was discharged on Monday of last week after undergoing surgical treatment.

Mrs. Carrie R. Zerby, of Millheim, was admitted on Monday of last week for surgical treatment.

Simon S. Sepsish, of Clarence, became a surgical patient on Monday of last week.

Mrs. Fred Hartman, of State College, was admitted on Tuesday of last week as a surgical patient.

Phillip B. Gross, of Bellefonte, became a surgical patient on Tuesday of last week.

Mr. and Mrs. J. P. Craddock, of Spring township, are the parents of a baby daughter, born in the hospital on Tuesday of last week.

Prof. P. Thomas Zeigler, of State College, was admitted for surgical treatment on Tuesday of last week.

Francis W. Creamer, of Bellefonte, was admitted as a surgical patient on Tuesday of last week.

Mrs. Paul Spearly, of Benner township, was admitted for treatment on Wednesday of last week.

Mrs. Edna D. Haupt, of Benner township, was discharged on Wednesday of last week, after undergoing surgical treatment.

Mrs. Boyd S. Thomas and infant son, of Bellefonte, were discharged on Wednesday of last week.

Mrs. Augusta Hyslop and infant son, of State College, were discharged on Wednesday of last week.

Miss Helen E. Kline, of Pine Grove Mills, was admitted on Wednesday of last week as a surgical patient.

Mrs. J. L. Tressel, of Bellefonte, was admitted on Wednesday of last week for surgical treatment.

William Wantz, of Milesburg, was admitted on Wednesday of last week for surgical treatment.

Robert Cain, young son of Mrs. Mabel Cain, of Pleasant View, was discharged on Wednesday of last week, after undergoing surgical treatment.

Mrs. John Eckel, of Bellefonte, was admitted on Thursday of last week for treatment.

Miss Bessie Fye, of Burnside township, was admitted for surgical treatment last Thursday.

Miss Ida C. Bell, of State College, became a medical patient on Thursday of last week.

Harry, eight-year-old son of Mr. and Mrs. William Solt, of Axe Mann, was discharged on Thursday of last week, after undergoing treatment for gunshot wounds.

Mrs. Jasper Paulik, of Clarence, was discharged on Friday after having been a medical patient.

Samuel W. Stover, of Lemont, was discharged on Friday after undergoing surgical treatment.

Mary and Joseph, seven and three-year-old children, respectively, of Mrs. Verna Crastina, of Clarence, were discharged on Friday of last week, after undergoing surgical treatment.

Mr. and Mrs. John Steele, of Bellefonte, are receiving congratulations on the birth of a daughter, on Friday.

Andrew W. Butterfield, of Bradford, was discharged on Saturday after undergoing surgical treatment.

Hazel M. Rhoads, of Bellefonte, was discharged on Saturday after undergoing surgical treatment.

Clair G. McVitty, of Fleming, was discharged on Sunday after undergoing medical treatment.

Lawrence H. Lowery, of Howard, was admitted on Sunday as a surgical patient.

Joseph J. Verbicas, of Clarence, was admitted on Sunday as a medical patient.

There were 52 patients in the hospital at the beginning of this week.

**CENTRE COUNTY SICK GO  
TO GEISINGER HOSPITAL.**

During the year 1930 151 patients from Centre county were treated at the Geisinger hospital, at Danville. While it is not known how many hospital days they spent in the institution it would, without a doubt, figure up to quite an item in the receipts of that institution. The towns represented and the numbers of patients were as follows:

- Aaronsburg 5, Beech Creek 2, Bellefonte 35, Boalsburg 3, Centre Hall 16, Clarence 1, Coburn 3, Fleming 4, Lemont 1, Madisonburg 2, Milesburg 5, Millheim 10, Orviston 2, Philipsburg 1, Rebersburg 9, Smulton 1, Spring Mills 3, State College 40, Valley View 1, and Woodward 6.

Capt. C. T. Fryberger, of Philipsburg, celebrated his eighty-seventh birthday anniversary, last Friday. Though close to being a nonagenarian he daily gives his personal attention to his lucrative insurance business. Capt. Fryberger is a veteran of the Civil war, having served from September 15th, 1861, to July 25th, 1865. Harry H. Hewitt, another Civil war veteran of Philipsburg, also celebrated his anniversary on Friday, it being his 85th.

**FARM NOTES.**

To prepare a fruit tree for planting, all injured and broken roots are pruned off. Also long, slender roots should be pruned back to conform with the others. Great care should be taken that the roots do not become dry. They may be protected in the field by keeping moist packing over them or, better still, by keeping the roots immersed in water. This may be done by drawing a barrel along with you either in a wagon or on runners.

It is important to discover sires capable of improving the production of a given herd when their daughters take the places of the dams in the herd. It is equally important to discover as many sires as possible that are not capable of improving the production of at least a fair to medium herd of cows. When the progeny of these latter sires are withdrawn from the various breeds, they will be released of a tremendous handicap.

Fire blight bacteria live over the winter on both apple and pear trees and at one time it was thought they could not live over in limbs less than one inch in diameter. This theory has been disproved and the fire blight germs are able to overwinter in twigs as small as 3/4 inch in diameter. During the latter part of the summer the fire blight germs cease active invasion of new tissues and remain more or less dormant until spring.

Success in poultry work is often determined by the hatchability of the eggs from which the flock is raised," declares Clyde Ingram, poultry specialist of the Louisiana State University poultry department. Hatchability can be improved in many instances, through the selection and proper management, will breeding pens, Ingram continues, and that combined with a good ration and proper management, will work to a definite end.

British hens may soon find that they must lay eggs up to a certain standard of weight, as an electric egg recorder keeps track of their performances. It can be set so that if an underweight egg is laid, a device will automatically trap the hen in her nest. She will then be removed, painlessly put to death, and used for food.

The best strains of vegetable seed are the first to be sold by seedsmen. Early orders get the best seed. Good seed must be clean, viable, disease-free, and true to a good name. Such seed cannot be produced cheaply.

One Keystone farmer set a quarter of an acre to Christmas trees in 1924. When he started to harvest last fall he had \$1250 worth of trees on this small area. Norway spruce was the kind planted.

Farmers needing emergency hays this year can cut wheat, rye, oats, sweet clover, soybeans, Suda grass, or millets. Your county agent will tell you how to handle these crops for hay.

When plants "run out" blame it on some virus disease. You control such diseases by roguing and by planting susceptible crops far enough away from host plants carrying the diseases.

Pennsylvania's fall pig crop is 7.6 per cent less than the fall of 1929, surveys reveal. For the United States, however, the decrease is only one per cent.

Quality chicks from flocks of high average egg production develop into the most profitable birds. Records show that high producing birds lay eggs at a lower cost per dozen and make a higher net profit than low producers.

Grape arbors can be used to good advantage in making the farm home grounds attractive. Try to give some thought to the location of these.

One hour out of every 10 that the tractor is used should be devoted to keeping the machine in good condition.

The quickest and surest way to get rid of stumps is to grub them out.

Hens are rarely profitable layers after two or three seasons' production.

Keep the covering around the roots of trees until immediately before planting.

Comfortable stables or other quarters for the dairy herd greatly reduce the cost of production.

There is no danger from pruning apple trees at any time during the winter or early spring.

Soy bean production will continue to increase as we find better methods and machinery for handling the crop.

It is a mistake to start vegetable plants too soon. Six to eight weeks ahead of the time to set in the field is soon enough.

A dirt floor is hard to clean and it is almost impossible to keep it level. A few loads of gravel will keep the hens from digging deep holes in it.

Oyster shells make the best egg shells. If there is plenty of lime stone around the poultry house the birds will help themselves to that.

Good rotation increase crop yields, reduce production expenses, and provide a better and more profitable diversity. Spring is the time to put them into effect.

**WHILE YOU SLEPT . . . .  
TEAM WORK  
PUT THIS JOB THROUGH  
TO COMPLETION**

At two-thirty that cold Sunday morning of November 2nd, there were two men at the foot of every eighth pole of the 250 along the ten mile transmission line between Kane and Mt. Jewett. And at two-thirty the current, which at a pressure of 22,000 volts had been flowing through the line, was cut off. There was a job to be done quickly, to keep the regularity of electric service to West Penn customers at a maximum.

As the signal was flashed, one man from each team climbed up the pole, loosened the insulators and lowered them to his helper. Just as quickly new insulators were sent up the pole, fastened in place and the wires tied in. Then down the pole . . . on to the next

. . . and up again for the same operation. In less than four hours the job was done . . . more than eight hundred insulators, on two hundred and fifty poles, had been replaced with new and better ones.

A task like this commands the cooperation of West Penn people from every department. On each of the thirty-four teams the linemen was a skilled and experienced worker. Helpers had volunteered from other departments. You could have found a salesman, a sub-station man, a meter reader or an accountant at the foot of every pole that night. This activity was carried out while folks were sleeping to assure them electricity to percolate their coffee and brown their toast for Sunday breakfast.

There are West Penn people in your territory, friends and neighbors of yours. Every day . . . day after day . . . they are using their skill and experience, their training and foresight, to make West Penn service . . . dependable and uninterrupted . . . mean more to you.

**ODD FELLOWS HONOR  
FOUNDER OF ORDER.**

Members of Centre Lodge, No. 153, I. O. O. F., started their social activities for the new year, last Thursday evening, with a very interesting program commemorating of Thomas Wildey, the founder of Odd Fellowship in America.

Charles Musser was the efficient master of ceremonies, introducing the speakers and musical numbers as only "Charley" can. Music was furnished by the brass octette from the I. O. O. F. band throughout the program.

The program opened with prayer by Reverend Stuart Gast. Past grand Cyrus Hoy then gave an interesting talk on the life and work of Thomas Wildey and his efforts to transplant a branch of the lodge from England to this country. The next speaker of the evening was John Henry Frizzell, of State College, who gave an unusually interesting talk on the organization and progress of Odd Fellowship in America since Thomas Wildey formed his first branch of five members in Baltimore in 1818 until the present time.

The final speaker was C. Paul Wagner, of Williamsport, grand conductor of the Grand Lodge of Pennsylvania, who in a masterly manner gave his listeners an outline of the aims of the Order for the future, and proved by statistics that Odd Fellowship is on the ascendancy throughout the world.

An added musical feature of the evening which met with the approval of all present was a piano solo by little Jean Clevenstine, seven years old, who made her first public appearance with the aplomb and unconcern of an experienced trouper, and showed wonderful ability for her age and short period of training.

Bellefonte Encampment, No. 72, and Crystal Springs Rebekah lodge were well represented. There were also many visiting members from Williamsport, State College and other lodges throughout the county.

**PRISON WORKERS  
FINISH TAG ORDER.**

Of the 1,508,000 sets of motor vehicle tags called for in the 1931 contract to the Western State Penitentiary.

The rate of manufacture at the prison is about 9000 sets of tags per day. When the 1931 contract was completed it was expected that work on the 1932 tags will begin about March 1.

**NEW IDEAS THAT GIVE YOU  
COMFORT AND RIDING EASE**

Danger of injury from flying glass in a collision is reduced by a curtain that automatically drops between driver and windshield at the instant of impact.

Carburetor intake silencer makes a car's engine practically noiseless. Built into cylindrical shaped devices are multiple tubes and chambers, which neutralize the sound waves coming out of the carburetor and so eliminates power roar. It also is an air cleaner.

A flat-tire alarm clamps to the valve stem. Deflation of the tire allows a spring to release a trigger, and a chain flies out and beats a tattoo on the mudguard.

You can step out of your car into the rain in safety if you carry this new umbrella that fastens to a convenient place beneath the top. It is so secured that it does not rattle and the material of which it is made is so resistant that it does not mar easily.

**The BEST Gray Hair  
Remedy is Home Made**

To half pint of water add one ounce bayrum, a small box of Barbo Compound and one-fourth ounce of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Apply to the hair twice a week until the desired shade is obtained. It will gradually darken streaked, faded or gray hair and make it soft and glossy. Barbo will not color the scalp, is not sticky or greasy and does not rub off.

**DENTIST CLAIMS HE  
HAS NEW ANESTHETIC**

After experimenting for 20 years, Dr. Jonathan G. Hinkle, graduate of the University of Iowa dental college, now of Bethany, Mo., has perfected an anesthetic which he claims will allow patients to undergo major operations without pain while fully conscious.

The anesthetic removes all of the after-effects common to chloroform and ether, Dr. Hinkle claims.

Customer—"So you got rid of that pretty assistant you had?"  
Druggist—"Yes, all my gentlemen customers kept saying that a smile from her was as good as a tonic."

**DISTURBED SLEEP**  
Relieve the Irritation with Buchu Leaves.

Mrs. Anna L. Denson, 214 Wykes St., Alliquippa, Pa., says, "For 9 years I suffered agony with my bladder. Was told the only hope for a cure was an operation. Dreaded to see night come as I was disturbed many nights every 15 minutes. After taking Lithiated Buchu (Keller Formula) a few days, I had much relief. I am now almost cured. Sleep all night without being disturbed. I have gained 18 pounds. I am always glad to tell or write my full experience. The tablets contain lithia, buchu leaves, juniper etc. It acts on the bladder as epsom salts do on the bowels. Drives out foreign deposits and lessens excessive acidity. This relieves the irritation that causes getting up nights. The tablets cost 2c each at all drug stores, Keller Laboratory, Mechanicsburg, Ohio, or locally at C. M. Parrish's."

**Employers,  
This Interests You**

The Workman's Compensation Law went into effect Jan. 1, 1916. It makes insurance compulsory. We specialize in placing such insurance. We inspect plants and recommend Accident Prevention Safe Guards which Reduce Insurance rates.

It will be to your interest to consult us before placing your Insurance.
